

# FSSA Asian Growth Fund (Irish VCC)

## Investment objective and policy

The Fund aims to grow your investment.

The Fund invests at least 70% of its assets in shares of companies based in, or closely associated with, Asia (excluding Australia, Japan and New Zealand). The Fund may invest in any emerging markets in the Asia Pacific Region (excluding Australia, Japan and New Zealand), in companies of any size or industry. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. The Fund will not invest more than 50% of its assets in China A Shares.

The Fund may use derivatives with the aim of risk reduction or efficient management.

## About FSSA Investment Managers

FSSA Investment Managers is an autonomous investment management team within First Sentier Investors, with dedicated investment professionals based in Hong Kong and Singapore. We are specialists in Asia Pacific and Global Emerging Markets equity strategies, managing assets on behalf of clients globally.

We are bottom-up investors, using fundamental research and analysis to construct high-conviction portfolios. We conduct more than a thousand direct company meetings a year, seeking to identify high quality companies to invest in. We look for founders and management teams that act with integrity and risk awareness; and dominant franchises that have the ability to deliver sustainable and predictable returns over the long term. As responsible, long-term shareholders, we have integrated ESG analysis into our investment process and engage extensively on environmental, labour and governance issues.

### Risk factors

This document is a financial promotion for the FSSA Asian Growth Fund in the EEA and elsewhere where lawful. Investing involves certain risks including:

- **The value of investments and any income from them may go down as well as up and are not guaranteed. Investors may get back substantially less than the original amount invested.**
- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Reference to specific securities (if any) is included for the purpose of illustration only and should not be construed as a recommendation to buy or sell. Reference to the names of any company is merely to explain the investment strategy and should not be construed as investment advice or a recommendation to invest in any of those companies.

For a full description of the terms of investment and the risks please see the Prospectus and Key Information Document.

**If you are in any doubt as to the suitability of our funds for your investment needs, please seek investment advice.  
If you are unsure of the terminology used in this report, please seek independent financial advice.**

### Performance review

Over the past 12 months, key contributors to performance included **Tencent**, amid a rebound in its core gaming business and improved regulatory conditions in China. Meanwhile the company's profitability has improved, driven by the shift in its business mix with newer businesses (such as video account ads and e-commerce) contributing higher gross margins. **Oversea-Chinese Banking Corp (OCBC)** reported better-than-expected earnings growth, driven by non-interest income and increased activity in

wealth management.

On the negative side, **Universal Robina** reported worse-than-expected profits, driven by weak demand for branded foods and operating losses in the sugar segment. **Unilever Indonesia** also fell amid consumer down-trading and increased competition. Progress on the group's turnaround has been slower than expected, and underlying sales are still decidedly weak.

### Calendar year performance (% in USD) to 31 March 2025

These figures refer to the past. Past performance is not a reliable indicator of future results. For investors based in countries with currencies other than USD, the return may increase or decrease as a result of currency fluctuations. Since inception performance figures have been calculated from 05 August 1999. All performance data for the FSSA Asian Growth Fund Class I (Accumulation) USD as at 31 March 2025. Source for fund - Lipper IM / First Sentier Investors (UK) Funds Limited. Performance data is calculated on a net basis by deducting fees incurred at fund level (e.g. the management fee and other fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis. Source for benchmark - MSCI, income reinvested net of tax.

▲ On 22 September 2020, First State Asian Growth Fund was rebranded as FSSA Asian Growth Fund.

### Portfolio review

New purchases over the quarter included **Netease**, the second-largest gaming company in China. The company has a portfolio of games with loyal users and a strong pipeline of new games that should support decent growth prospects. With a long track record and impressive returns over the past 20 years, we like the company's strong alignment and mind-set for returning value to shareholders.

We also bought **Kasikornbank**, the second-largest bank in Thailand. After years of poor performance, the Thai banking industry and Kasikornbank are moving towards prioritising profitability over growth. We expect provisions will decline after a decade of clean-up and returns on equity should improve from here.

We sold **Central Pattana** and **Fanuc** to consolidate into more attractive opportunities.

### Stock spotlight

**Techtronic** is one of the world's largest producers of branded power tools and floor-care products today. Founded in the mid-1980s and listed in 1991, Techtronic now occupies a leading position in North America with key brands such as Milwaukee, AEG and Ryobi. There is strong alignment with the main shareholders, the Pudwill family, while new CEO Steven Richman was internally promoted after running the Milwaukee brand for 17 years. Techtronic spends significantly on research and development (R&D) to improve existing products and create new categories, which has helped to boost margins. It was also the first to move towards cordless products (which eventually reshaped the entire industry). The company sees healthy demand for its professional tools under the Milwaukee brand (which contributes around two-thirds of the firm's revenue), driven by infrastructure spending and factories opening in the US.

Recently, while growth has slowed down to mid-single digits per year, the management is expanding into new areas like Japan, Europe and Asia. This should help to mitigate some of the risks around US trade tariffs. Meanwhile they are staying disciplined about capital allocation and reducing leverage. Longer-term, we still like the company as the strongest operator in a three-player industry, which is continually launching innovative products and entering new categories.

### Market capitalisation breakdown (USD)

Data source: For illustration purposes only. Portfolio weights may not add up to 100% as cash holdings are excluded and full coverage of stocks is not always available. This information is calculated by First Sentier Investors. Past performance is not indicative of future performance. Reference to specific securities (if any) is included for the purpose of illustration only and should not be construed as a recommendation to buy or sell the same. All securities mentioned herein may or may not form part of the holdings of First Sentier Investors' portfolios at a certain point in time, and the holdings may change over time. These figures refer to the past. Past performance is not a reliable indicator of future results. For investors based in countries with currencies other than USD, the return may increase or decrease as a result of currency fluctuations.

### Outlook

News about US reciprocal tariffs have rocked global markets, as President Trump announced sweeping import taxes that were far higher and affected a much broader swathe of countries than expected. The situation is still fluid, but our broad take is that the tariffs are being used primarily as a negotiation tool – an attempt to drive more manufacturing back into the US. If high tariffs do remain in place, it's clearly negative for the global economy.

From a portfolio perspective, even in a more adverse scenario, we remain confident in our holdings' ability to navigate the environment, as they have done in the past. Our companies are characterised by strong competitive advantages – whether in brand strength, distribution, or cost leadership – and have historically managed to preserve margins and profitability across cycles, despite headwinds. Most of our portfolio holdings have strong balance sheets (net-cash) which should allow them to weather a difficult period and invest counter-cyclically to gain market share.

### Our long-term investment themes:

- Dominant consumer franchises which have an edge in brand, distribution and innovation.
- High quality financials, supported by a strong deposit franchise or a specific loan niche.
- The rise in healthcare spending, due to increasing incomes and healthy consumer choices.
- Beneficiaries of a smarter, more connected world.
- An ageing population and the growing trend of automation.
