3. HDFC Bank: India's largest private sector bank

- Nearly 60% of loans and deposits in India are still controlled by inefficient state-owned banks. Well run private banks like HDFC Bank have been gaining market share rapidly. This is expected to continue
- Management has a track record of managing risks prudently. It has maintained industry leading Return on Assets (ROAs) across economic cycles and periods of disruption
- Its loan book has grown at 28% CAGR and EPS by 22% CAGR* over 20 years. The merger with HDFC Limited improves the long-term growth potential of the bank as it can now address the large mortgage opportunity directly. It has led to a short-term increase in funding costs, which should normalise in the coming periods

Steadily increasing market share and earnings per share
