Information about the Company

The Company is an Open-Ended Investment Company with variable capital. The Company is structured as an umbrella company currently authorised as a UK UCITS scheme and operates under Chapter 5 of the Collective Investment Schemes Sourcebook ("COLL").

Different Funds may be established from time to time by the ACD, with the approval of the Financial Conduct Authority ("FCA") and the agreement of the Company's Depositary, the Northern Trust Investor Services Limited. Each Fund may issue different classes of share and, within each class, there may be different types of share. On the introduction of any new Fund or class or type of share, a revised Prospectus will be prepared setting out the relevant details of each Fund or class.

Each Fund is invested as if it were individually authorised as the type of scheme known as a UK UCITS scheme, as specified in the Sourcebook. For investment purposes, the assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. The shareholders are not liable for the debts of the Company.

ESG/Sustainability Reporting

Sustainable investment labels help investors find products that have a specific sustainability goal. The products below do not have a UK sustainable investment label as they do not have a non-financial sustainability objective. Their objective is to achieve capital growth over the long-term by following their investment policy and strategy.

Stewart Investors Asia Pacific and Japan All Cap Fund, Stewart Investors Asia Pacific Leaders Fund, Stewart Investors Asia Pacific All Cap Fund, Stewart Investors Indian Subcontinent All Cap Fund, Stewart Investors European (ex UK) All Cap Fund, Stewart Investors Global Emerging Markets All Cap Fund, Stewart Investors Global Emerging Markets Leaders Fund, Stewart Investors Worldwide Leaders All Cap Fund and Stewart Investors Worldwide All Cap Fund (in this section referred to as the “Funds”).

Sustainability Assessment

The Funds will invest in companies that the Investment Manager (Stewart Investors) believes contribute to, and benefit from, sustainable development. Stewart Investors considers that a company will contribute to, and benefit from, sustainable development if its activities lead to positive social outcomes or positive environmental outcomes. The contribution of the Funds’ investments to the social and environmental outcomes are assessed by reference to the two frameworks described below.

Positive social outcomes - human development pillars

Stewart Investors assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars, by reference to, amongst other things, the UN Human Development Index.

- **Health and well-being** - access to safe, affordable and nutritious food, medical care, and hygiene products.
- **Physical infrastructure** - access to reliable, affordable and safe energy, housing, water and sanitation.
- **Economic welfare** - access to safe and productive employment, financial services, and material necessities.
- **Opportunity and empowerment** - access to education and training, information and communication technologies, and transport and logistics.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager’s website (link below) – <https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/human-development-pillars.html>

Please note small changes made to the pillars by the Investment Manager for 2025 – <https://www.stewartinvestors.com/uk/en/private-investor/insights/human-development-pillars-update.html>

Positive environmental outcomes – climate solutions

Stewart Investors assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown¹, a non-profit organisation that has mapped, measured and modelled over 90 different climate solutions that it believes will contribute to reaching drawdown - i.e. the point in the future when emissions stop increasing and start to steadily decline.

Below is a list of climate solutions categories together with corresponding examples that Stewart Investors believe lead to positive environmental outcomes:

- **Buildings** - products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials.
- **Circular economy and industries** - improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes.
- **Conservation and restoration** - supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.
- **Energy** - adoption of renewable energy and other clean energy and related technologies.
- **Food system** - sustainable farming, food production and distribution of food-related products and services.
- **Human development** - advancement of human rights and education that drive environmental conservation and sustainable use of resources.

¹ Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis framework. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors framework. For the list of Project Drawdown climate solutions please go to <https://drawdown.org/solutions/table-of-solutions>.

- **Transport** - efficient transport technologies and growth in fossil fuel-free transportation options.
- **Water** - less energy-intensive methods for treating, transporting and heating water.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager’s website (link below) – <https://www.stewartinvestors.com/uk/en/private-investor/how-we-invest/our-approach/climate-solutions.html>

Assessment

In assessing whether a company “contributes to and benefits from” sustainable development, the Investment Manager will consider whether:

1. There is either a direct¹ or enabling² link between the activities of the company and the achievement of a positive social or environmental outcome.
2. The company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company’s business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company’s strong culture and sense of stewardship e.g. for equity and diversity.
3. The company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Exposure to harmful or controversial products, services or practices

The Funds only invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social or environmental outcomes. All investee companies contribute to improving human development and may also contribute to positive environmental outcomes.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. The Investment Manager also receives regular updates from a controversy monitoring service. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

The Funds' exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. This includes an assessment for compliance with the international standards including the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights, United Nations global norms and exposure to high-risk sectors. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (0% threshold for controversial weapons and tobacco production). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

The Investment Manager's **position on harmful and controversial products, services or practices** (link below) is disclosed on their website. Part of this disclosure includes details of any companies held across the Funds that generate revenue above the set materiality threshold for direct involvement in a relevant activity together with the reason for continuing to own the company. The disclosures are updated on a quarterly basis.

Remuneration

Quantitative Disclosure

The table below shows remuneration (calculated on the basis set out in Note 1) paid on behalf of First Sentier Investors (UK) Funds Limited (the “ACD”) to (1) its entire staff (“Staff”) and by its delegates to portfolio managers who are code staff and (2) staff whose professional activities have a material impact on the risk profiles of the ACD or the Company (including delegates) (“Code Staff”).

	Headcount	Total Remuneration £ (Note 1)
Total Remuneration paid by the ACD to Staff and its delegates of which:	28	11,869,018
Fixed remuneration		1,252,687
Variable remuneration		10,616,331
Aggregate Remuneration paid to UCITS Remuneration Code Staff (“Code Staff”) of which:	40	13,254,882
Senior Management	10	5,973,913
Control Staff	5	210,807
Other Code Staff	25	7,070,162

Note 1 - Total Remuneration is calculated as the proportion of overall remuneration for Staff and Code Staff relating to work directly attributable to the Company. The proportion of overall remuneration is calculated on the following basis:

- For Staff and Code Staff carrying out portfolio management activities, remuneration is apportioned on the basis of assets under management of relevant sub-funds of the Company and total assets under management allocated to the individuals investment team.
- For Senior Management and Control Staff, remuneration is apportioned on the basis of the total number of sub-funds within the Company over the total number of funds and clients managed within EMEA or the Group as appropriate.

Remuneration Policy

First Sentier Group (the “Group”) has adopted a Global Remuneration Policy to support the Group's vision, purpose and strategy and applies to all Group employees globally, including individuals whose professional activities may have a material impact on the risk profile of the Group or the UCITS Funds it manages (“UCITS Identified Staff”).

The Global Remuneration Policy is reviewed annually by the First Sentier Group Limited (“FSGL”) People & Remuneration Committee (“PRC”), the FSGL Board (“FSGL Board”), the EMEA Remuneration Assurance Committee (“EMEA RAC”) and each Group Subsidiary Board that has adopted the policy. The Global Remuneration Policy has been adopted by the Board of Directors of the ACD (the “Board”) and the remuneration of Staff is governed by this Remuneration Policy. There have been no material changes to the policy in the past year or any irregularities that have occurred since the last review.

The PRC helps the FSGL Board fulfill its responsibilities in relation to people policies and provides objective review and oversight of remuneration-related policies, frameworks and practices.

Total reward packages including individual variable awards (short-term and long-term incentives) for all Group employees are reviewed and approved by the Group CEO, with the PRC, and the FSGL Board, where required.

In addition, the EMEA RAC along with the Board, and the PRC where appropriate, is responsible for reviewing the application of the Group Global Remuneration Policy and practices for staff within scope of EMEA remuneration regulations (applicable Remuneration Codes issued by the Financial Conduct Authority (“FCA”), the Central Bank of Ireland (“CBI”) and any other remuneration codes in force in EMEA or other remuneration codes applicable to EMEA employees) and for decision-making in relation to the application of certain remuneration practices and processes (including regarding remuneration setting (and risk adjustment) for EMEA staff and employees identified as Code Staff/MRTs).

Remuneration Framework

The Group's remuneration framework forms part of a broader attraction and retention strategy including benefits, culture, recognition, performance feedback, development and organisational purpose.

When setting and reviewing remuneration outcomes, the Group CEO and the FSGL Board, retain and exercise absolute discretion to vary remuneration budgets and incentive pools, as well as individual outcomes, in line with business financial performance and the business' affordability to pay, as well as in the event of any significant reputational issue, significant breach of risk appetite, and any other financial or non-financial criteria considered appropriate.

The Group's remuneration framework is delivered through a total reward package consisting of four key elements:

Key elements	Purpose
Base remuneration/ fixed pay	<ul style="list-style-type: none"> Attract and retain talented employees by paying market competitive levels of base remuneration in line with the responsibilities of the role and individual competency requirements, These payments are fixed and do not vary with performance, This may include salary, fixed pay allowance, cash in lieu of superannuation/pension and other cash allowances in accordance with local market practices, At a minimum, all employees are provided a location specific basic living wage.
Benefits	<ul style="list-style-type: none"> Ensure market competitiveness and provide benefits in accordance with local market practice, These are regionally based, including but not limited to, the provision of superannuation/ pensions, medical & life insurance, flexible working arrangements, leave options, workplace culture, social committee/activities, volunteering opportunities, community engagement and events, and learning and development opportunities.
Short-term Incentive ("STI")	<ul style="list-style-type: none"> Employees participate in an STI Plan applicable to their role, seniority level and function (Investments, Distribution or Enablement), Intended to drive and reward employee performance based on annual financial and non- financial measures consistent with the Group strategic priorities, and adherence to Group values and risk management framework, Awards vary to reflect performance achievement with meaningful differentiation to recognise and reward strong contributors / performers, Awards are paid in cash with some deferral to support sound risk management and meet regulatory requirements, Awards granted to Code Staff / Material Risk Takers ("MRTs") are subject to malus and clawback.
Long-term Incentive ("LTI")	<ul style="list-style-type: none"> May be provided to Group senior leaders and key/critical talent, Focused on growth/value creation and sustained long-term performance using both pre and post grant performance measures, Awards are subject to a three-year deferral period to aid retention and adherence to sound risk management practices and Responsible Investment (RI) principles, Awards are subject to malus and clawback

Performance Risk Management

Performance is assessed not only on what is achieved over the relevant performance period but importantly, on how it is achieved, as we believe the latter contributes to the long-term sustainability of the business.

All employee performance is carefully managed within Group Risk Management Strategy ("RMS"), and variable remuneration awards to individual employees are reviewed and may be adjusted based on associated performance and risk outcomes, the performance of the business unit and the performance of the business.

Performance and risk management is built into our remuneration framework by ensuring that all employees are assessed against risk and behavioural standards, which are considered upon allocation of short-term and long-term incentives and again upon vesting of deferred incentives to confirm they have appropriately demonstrated our values. Further adjustments to variable remuneration awards may include (but are not limited to):

- Malus, such as reducing or forfeiting the incentive award, including any unvested deferred award prior to the award vesting; and/or
- Clawback which would require an employee to repay on demand an incentive award they have received.

For investment professionals, the implications of Sustainability (Environmental, Social and Governance related) Risk in the investment process have been incorporated into the performance framework.

Remuneration

(continued)

This assessment ensures that variable remuneration awards are based on both what was achieved (goals) and how it was achieved (values), with adjustments for risk outcomes applied where required. The values assessment includes adherence to the firm's Responsible Investment and Stewardship Policies and Principles.

Employees are also prohibited from hedging, or otherwise limiting, their economic exposure to market-based price risk in relation to unvested market- exposed remuneration (e.g., co-investment rights).

Assessment of Value

The ACD of the Company conducts an annual assessment of value. Details about the annual assessment together with any actions that have been taken or are planned to be taken, in order to continually improve value to investors, are available in the Assessment of Value Report, which can be found under the Performance and Documents section of the First Sentier Investor's website (<https://www.firstsentierinvestors.com>) and will be published on or before 30 November each year.

Statement of the Authorised Corporate Director's Responsibilities in Respect of the Financial Statements of the Company

The Authorised Corporate Director ("ACD") of First Sentier Investors ICVC is responsible for preparing the Annual Report and financial statements in accordance with the Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the Financial Conduct Services Authority's Collective Investment Schemes Sourcebook ("COLL") and the Company's Instrument of Incorporation.

The OEIC Regulations and COLL require the ACD to prepare financial statements for each annual accounting period which:

- are in accordance with United Kingdom Generally Accepted Accounting Practice ("United Kingdom Accounting Standards"), including FRS 102 "The Financial Reporting Standards Applicable in the UK and Republic of Ireland" and the Statement of Recommended Practice: "Financial Statements of Authorised Funds" issued by the Investment Association ("SORP") in May 2014 as amended in June 2017; and
- give a true and fair view of the financial position of the Company and each of its sub-funds as at the end of that period and the net revenue and the net capital gains or losses on the property of the Company and each of its sub-funds for that period.

In preparing the financial statements, the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards and the SORP have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the applicable SORP and United Kingdom Accounting Standards and applicable law. The ACD is also responsible for the system of internal controls, for safeguarding the assets of the Company and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In accordance with COLL 4.5.8BR, the Annual Report and the audited financial statements were approved by the board of directors of the ACD and authorised for issue on 18 November 2025.

Statement of Depositary's Responsibilities

for the year ended 31 July 2025

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228), as amended, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored, and that cash of the Company is booked into the cash accounts in accordance with the Regulations.
- the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with the Regulations.
- the value of shares of the Company are calculated in accordance with the Regulations.
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits.
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM"), are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that Company is managed in accordance with the Regulations and Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Depositary's Report

Having carried out such procedures as we consider necessary to discharge our responsibilities as depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Independent Auditors' Report to the Shareholders of First Sentier Investors ICVC

Report on the audit of the Financial Statements

Opinion

In our opinion the financial statements of First Sentier Investors ICVC (the 'company'):

- give a true and fair view of the financial position of the company and its sub-funds as at 31 July 2025 and of the net revenue/expense and net capital gains/losses on the property of the company and its sub-funds for the year ended 31 July 2025; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", the Statement of Recommended Practice "Financial Statements of UK Authorised Funds", the rules in the Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

We have audited the financial statements which comprise for each sub-fund:

- the statement of total return;
- the statement of change in net assets attributable to shareholders;
- the balance sheet;
- distribution tables; and
- notes applicable to the Financial Statements of all sub-funds and individual notes to sub-funds.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice), the Statement of Recommended Practice: "Financial Statements of UK Authorised Funds" issued by the Investment Association in May 2014 as amended in June 2017, the Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the authorised corporate director's (ACD's) use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of depositary and ACD

As explained more fully in the depositary's responsibilities statement and the ACD's responsibilities statement, the depositary is responsible for safeguarding the property of the company and the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the ACD is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management and the ACD about their own identification and assessment of the risks of irregularities, including those that are specific to the company's business sector.

We obtained an understanding of the legal and regulatory frameworks that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements. These included the Collective Investment Schemes Sourcebook and relevant tax legislation; and
- do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included Open-Ended Investment Companies Regulations 2001.

We discussed among the audit engagement team regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

As a result of performing the above, we identified the greatest potential for fraud in the valuation and existence of quoted non-derivative investments due to its significance to the net asset values of the sub-funds. In response we have: involved our financial instruments specialists to assess the applied valuation methodologies; agreed investment holdings to independent confirmations; and agreed investment valuations to reliable independent sources.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business.

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations; and

Independent Auditors' Report to the Shareholders of First Sentier Investors ICVC

(continued)

- reading minutes of meetings of those charged with governance and reviewing correspondence with HMRC and the FCA.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Collective Investment Schemes Sourcebook

In our opinion:

- proper accounting records for the company and its sub-funds have been kept and the financial statements are in agreement with those records;
- we have received all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit; and
- the information given in the ACD's report for the year ended 31 July 2025 is consistent with the financial statements.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Paragraph 4.5.12R of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Summary of Significant Accounting Policies Applicable to All Funds

as at 31 July 2025

1. Accounting and distribution policies

(a) Basis of accounting

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with FRS 102 'The Financial Reporting Standards Applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice ('SORP') for financial statements of UK Authorised Funds issued by the Investment Association in May 2014 (updated in June 2017), and United Kingdom Generally Accepted Accounting Practice.

As described in the Statement of the ACD's responsibilities in respect of the financial statements of the Company on page 13, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the Funds for at least 12 months from the date of approval of the financial statements, with the exception of: FSSA Asia All-Cap Fund and FSSA Japan Focus Fund, which both closed on 1 November 2024; First Sentier Responsible Listed Infrastructure Fund, which closed on 20 May 2025; and Stewart Investors European (ex UK) All Cap Fund, which closed on 30 September 2025. These Funds are due to terminate once the residual assets and liabilities are settled. In applying this basis of preparation, the assets and liabilities of the Funds continue to be stated at their fair values. No adjustments were necessary in the financial statements to reduce assets to their realisable values or provide for liabilities arising and to reclassify long-term liabilities as current liabilities.

The ACD confirms that no significant accounting judgements or estimates have been applied to the financial statements and therefore there is not a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

(b) Basis of valuation of investments

The value of the Funds as at 31 July 2025 was calculated using the bid market value of investments as at close of business on 31 July 2025. Investments for which published market values are not available are included at the ACD's valuation using the fair value hierarchy technique in accordance with the SORP and reviewed by the ACD's Fair Value Pricing committee.

Collective investment schemes are valued at quoted bid prices for dual-priced Funds and at quoted prices for single-priced Funds, on the last business day of the accounting period.

Open forward currency contracts are shown in the Portfolio Statement and are valued using quoted forward rate.

Over the Counter (OTC) derivatives (including cross-currency swaps) are held at fair value.

Gains and losses, including exchange differences in the valuation of investments held at the Balance Sheet date, including unrealised exchange differences, are treated as capital.

(c) Recognition, classification and derecognition of financial instruments

Financial assets and financial liabilities are recognised in the Funds' balance sheet when the Fund become a party to the contractual provision of the asset or liability. Financial assets and liabilities are initially measured at transaction price (including transaction costs), except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value (which is normally the transaction price excluding transaction costs). Financial assets are derecognised when the contractual rights to the cash flows from the asset expire or are settled, or substantially all of the risks and rewards of ownership of the financial asset are transferred to another party, or despite having retained some but not all significant risks and rewards of ownership, control of the asset has transferred to another party. Financial liabilities are derecognised when the liability is extinguished, when the contractual obligation is discharged, cancelled or expired.

(d) Exchange rates

Amounts in overseas currencies are translated at the exchange rates ruling at the close of business on 31 July 2025. Transactions denominated in foreign currencies are converted into sterling at the exchange rate ruling at the date of the transaction.

(e) Distribution policy

The whole of the Fund's revenue after expenses must be distributed at the end of its financial year. In the event that a share class has expenses that exceed revenue, no final distribution will be paid and the deficit will be transferred from the capital property of that share class to the revenue account. Interim distributions will usually be for the whole of the revenue, after charging expenses and tax determined at the end of the interim accounting period. The ACD may, however, distribute a lesser amount for the interim period.

Summary of Significant Accounting Policies Applicable to All Funds

(continued)

as at 31 July 2025

1. Accounting and distribution policies (continued)

(f) Recognition of revenue

Dividends on equities are recognised when the security is quoted ex-dividend. Other revenue is accounted for on an accruals basis.

Dividends from US real estate investment trusts ("REITs") are recognised as distributable revenue when the securities are quoted ex-dividend. On receipt of the capital/revenue split in the following calendar year, the allocation of the dividend is adjusted within the financial statements.

Dividends from UK real estate investment trusts ("UK REITs") are recognised as distributable revenue when the securities are quoted ex-dividend. Dividends are split into PID (Property Income Distributions) and Non-PID components for tax purposes. Revenue arising from a UK REIT's tax-exempt rental business is colloquially known as PID revenue and is taxable in the hands of each Fund. A UK REIT may also carry out activities that give rise to taxable profits and gains. It is from these that the REIT will make a Non-PID distribution. These are treated for tax purposes in the same way as dividends from UK companies.

Dividends received as shares (scrip/stock dividends), to the extent that the value of such dividends is equal to the cash dividends, are treated as revenue. This revenue forms part of any distribution. In the case of enhanced scrip dividends, the amount by which such dividends exceed the cash dividends is treated as capital and does not form part of the distribution.

Distributions from collective investment schemes are recognised when the schemes are quoted ex-distribution. Equalisation returned with the distribution is deducted from the cost of the investment and does not form part of the distributable revenue. Any reported revenue from an offshore Fund, in excess of any distribution received in the reporting period, is recognised as revenue no later than the date on which the reporting Fund makes this information available.

Distributions from Brazilian corporations may take the form of interest on capital as an alternative to making dividend distributions.

The treatment of special dividends and share buy backs is determined on a case-by-case basis, taking into account whether the event is income or capital by nature. The tax treatment will follow the treatment of the principal amounts.

Interest on deposits and fixed-interest securities are recognised as earned. Revenue from debt securities is accounted for on an effective yield basis. Applying effective yield to the revenue calculation may result in either higher or lower revenue, depending on whether Funds hold more bonds purchased at a discount or purchased at a premium. Where the Funds hold more bonds purchased at a discount than at a premium, income will be higher.

When a Fund is soft closed (meaning it remains open to investors but applies an initial charge to help limit inflows and protect the returns of existing investors) an initial charge may be applied on new investments. Once this charge is collected, the ACD will exercise discretion as to whether to donate some or all of this revenue to charity or to reimburse it back to the Funds for the benefit of the existing shareholders. The standard approach would be to reimburse the full initial charge back to the Funds for the benefit of the existing shareholders. Where the ACD has paid the initial charge into the relevant Fund, this is recognised on a cash basis for the individual share classes of the soft closed Funds. As at 1 August 2018, the ACD took the decision to waive all soft closure charges across the Company; however, this may be re-imposed on the Funds at a point in the future.

(g) Treatment of expenses

All expenses, other than those relating to transaction fees, are charged against the revenue property of the Funds. In the case of the First Sentier Global Property Securities Fund, First Sentier Global Listed Infrastructure Fund and the First Sentier Responsible Listed Infrastructure Fund, all expenses are borne by the capital property of the Funds for distribution purposes.

Expenses incurred by the Company are allocated to individual Funds where they are directly attributable. Where expenses relate to multiple Funds, they are apportioned by the ACD on a basis considered fair and equitable to shareholders, typically on an equal basis. Within each Fund, expenses are allocated between share classes in accordance with the terms of issue of the shares. Expenses specific to a share class are charged directly to that share class. All other expenses are apportioned between share classes by the ACD in a manner deemed fair to shareholders, generally in proportion to the net asset value of each share class.

Summary of Significant Accounting Policies Applicable to All Funds

(continued)

as at 31 July 2025

1. Accounting and distribution policies (continued)

(h) Taxation

Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Overseas dividends are disclosed gross of any foreign tax incurred, the tax element being separately disclosed in the taxation note.

Tax is calculated using the marginal basis, i.e. the tax effect of revenue and expenditure is allocated between capital and income on the same basis as the particular item to which it relates. Deferred taxation is provided for on all timing differences that have originated but not reversed at the Balance Sheet date. Deferred taxation is not recognised on permanent differences. Any liability to deferred tax is provided at the average rate of tax enacted, or substantively enacted. Deferred tax assets are only recognised where it is more likely than not that there will be suitable taxable profits against which the future reversal of underlying timing differences can be deducted. Deferred tax assets and liabilities are not discounted to reflect the time value of money. Withholding tax on accrued overseas dividends is netted off against accrued revenue in the debtor's note.

Capital gains tax (CGT) accruals for unrealised gains are in place for securities held in India and Bangladesh. The ACD continues to monitor changes in tax regimes across other jurisdictions but, as at the date of these financial statements, all other overseas capital gains tax is recognised when paid, and no provision is made for this.

(i) Equalisation

Equalisation applies only to shares purchased during the distribution period (group 2 shares). This is the average amount of revenue included in the purchase price of all group 2 shares and is refunded to holders of these shares as a return of capital. Being capital repayment, it is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

(j) Dilution adjustment

The Company operates a single price methodology for the Funds.

For example:

- (a) on a Fund experiencing net purchases (i.e. purchases less redemptions), as this could lead to trading that results in a dilutive effect;
- (b) on a Fund experiencing net redemptions (i.e. redemptions less purchases), as this could lead to trading that results in a dilutive effect;
- (c) where there may be a dilutive effect that, in the opinion of the ACD, requires the application of a dilution adjustment in the interests of existing/continuing shareholders and potential shareholders.

See the Prospectus for full details.

(k) Derivative financial instruments

Where appropriate, certain permitted derivative or forward currency transactions are used. Where these transactions are used to protect or enhance revenue, the revenue and expenses are included within net revenue in the Statement of Total Return.

Where the transactions are used to protect or enhance investments, the gains/losses are treated as capital and included within gains/losses on investments in the Statement of Total Return. Any open positions in these types of transactions at the year end are included in the Balance Sheet at their mark to market value.

(l) Foreign currency translation

Items included in the Company's financial statements are measured using the primary economic environment in which it operates (the "functional currency"). The functional and presentation currency of each Fund is GBP.

2. Risk

General

The main risk arising from the Funds' financial instruments is market risk. Market risk arises mainly from uncertainty about future prices of the financial instruments held. Investment risk in the portfolios is regularly reviewed and controlled through the adoption of parameters limiting exposures to various factors, such as industries, countries and company size.

The Funds have limited exposure to credit or cash-flow risk. Certain transactions in securities that the Funds enter into expose it to the risk that the counterparty will not deliver the investment (purchase) or cash (sale) after the Funds have fulfilled their responsibilities. The Funds only buy and sell investments through brokers that have been approved by

as at 31 July 2025

2. Risk (continued)

General (continued)

the ACD as an acceptable counterparty. This list is reviewed quarterly. The Funds' assets comprise mainly realisable securities that can be readily sold in normal market conditions.

The Funds' main liability is the redemption of any shares that investors wish to sell. In general, the ACD manages the cash to ensure that it can meet its liabilities. Assets from the Funds may need to be sold if insufficient cash is available to finance such redemptions. The Funds' holdings are reviewed on a regular basis, with particular emphasis on the market capitalisation of the issuer (securities issued by larger capitalised companies generally have greater liquidity) and the number of days it would take to trade out of a given securities position or percentage of the Funds as a whole (determined by reference to available market trading volumes). Funds that have a higher concentration of securities that are deemed to be less liquid are regularly monitored. Maturity analysis is not presented separately as all of liabilities are current liabilities falling due in one year.

As a proportion of the Funds' investment portfolio is invested in overseas securities, the Balance Sheet can be affected by fluctuations in foreign exchange rates. The Investment Manager may seek to manage exposure to currency fluctuations by using forward foreign exchange contracts or by hedging the sterling value of investments that are priced in other currencies. Income received in other currencies is converted into sterling on or near the date of receipt.

The market value of investments is taken to equal 'fair value' for the purposes of Financial Reporting Standard 102. Given all the activities of the Funds, none of the investments held fall within the definition of 'investments held for trading' asset out in Financial Reporting Standard 102.

Fair value of financial assets and financial liabilities

There is no material difference between the value of the financial assets and liabilities, as shown in the Balance Sheet and the fair value of the Funds.

3. Other matters

High Court Claim

The European Court of Justice has held that the UK tax regime in respect of income from portfolio investments contravened the EU right to free movement of capital. Until 2009, income from portfolio investments in the UK was exempt from corporation tax, whilst dividend income from foreign portfolio investments was taxable with limited relief for foreign tax paid. The Company has made claims against HMRC for repayment of tax paid on dividend income from foreign portfolio investments in these circumstances. The claims form part of the CFC and Dividend Group Litigation, in which there are various test cases, including the Prudential dividend test case, in which a Supreme Court judgement was delivered on 25 July 2018. Some Funds in the Company received partial recovery from HMRC under this litigation which was reflected in those Funds' financial statements as of 31 July 2020. The balance of the claims were continued against HMRC. However, on 23 June 2025, the UK Supreme Court refused an application to appeal against an adverse Court of Appeal ruling in relation to that balance. Legal counsel for the Company is working to conclude any continuing recovery options for the relevant Funds. Any value of these ongoing claims has not been recognised in the Financial Statements as the timing and amount of any benefit is uncertain.

4. Post Balance Sheet Events

On 30 September 2025, the Stewart Investors European (ex UK) All Cap Fund closed and as such the financial statements for this Fund have not been prepared on a going concern basis, please refer to Note 1(a). On 12 November 2025, First Sentier Group announced a strategic transition of Stewart Investors' investment management responsibilities to FSSA Investment Managers, excluding Worldwide strategies, as at close of business Friday 14 November 2025. There were no other significant events post year-end up to the date of approval of these financial statements.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 70% of its Net Asset Value in a portfolio of equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China that are listed, traded or dealt in on Regulated Markets worldwide.

The Fund has no set target for the number of companies it will invest in, but the Manager anticipates that typically the Fund will invest in around 40 - 60 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

← Lower Risk

 Potentially Lower Rewards Potentially Higher Rewards

Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class E Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- During the year, the rating of Share class B Accumulation (USD) changed from 6 to 7 to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund (except Share Class B Accumulation (USD) which has rating of 7) has a rating of 6 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 27.9% in sterling terms over 12 months and provided cumulative returns of -7.7% and -15.1% over three and five years, respectively, to the end of July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Tencent**. The company rapidly integrated the DeepSeek model into its "super-app", WeChat, as well as other parts of its business, suggesting it should be able to further strengthen its ecosystem and benefit from powerful network effects in the age of generative AI. **China Merchants Bank** also rose as investors looked for yield at a time of very low interest rates in China.

On the negative side, property project management company **Greentown Management*** saw lower project pricing due to increasing competition, and this proved to be a drag on its earnings growth. **Shenzhen Mindray Bio-Medical Electronics**, the largest Chinese medical equipment manufacturer, also fell, partly because of concerns the tariff dispute between the US and China will affect its export business.

* No longer owned in the portfolio.

Portfolio Changes

New purchases included **AIA**, one of the strongest life insurance franchises in Asia, with a high-quality agent network and a presence in 18 markets across the region. The company maintains a leading position in Hong Kong, Thailand and Singapore, while China offers ample long-term opportunities. The Fund also bought **Xinyi Glass**, a leading glass maker in China. The company's auto glass business continues to grow strongly, with good profit margins, while its float glass and solar glass businesses are approaching the bottom of the cycle.

Among other divestments, the Fund sold **Guangzhou Kingmed Diagnostics** and **Sino Biopharmaceutical** on expensive valuations.

Outlook

After a challenging few years, the Investment Manager sees healthy demand emerging in some domestically focused sectors in China, including sportswear retail and leisure travel. The government is providing more support for businesses and consumers. Chinese companies have also become more competitive globally. On the other hand, the US-led tariffs have made the outlook more uncertain.

The Investment Manager's focus is on selecting well-run companies with capable leaders, strong franchises, attractive earnings growth, and sound balance sheets. It believes the Fund's holdings in market-leading businesses will benefit from long-term structural growth trends and rising incomes in China and will therefore remain resilient.

IA Sector: China / Greater China.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	91	94
Total taxation (note 5b)	<u>91</u>	<u>94</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	862	1,798
Corporation tax of 20% (2024: 20%)	<u>172</u>	<u>360</u>
Effects of:		
Irrecoverable overseas tax	91	94
Movement in unrecognised tax losses	82	108
Overseas non-taxable revenue*	<u>(254)</u>	<u>(468)</u>
Total tax charge for the year (note 5a)	<u>91</u>	<u>94</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £492,958 (31/07/24: £411,472); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

10. Portfolio transaction costs (continued)**Average portfolio dealing spread**

The average portfolio dealing spread at the Balance Sheet date was 0.08% (31/07/24: 0.12%).

11. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

12. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £10,562,000 (31/07/24: £13,022,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 1.15% (31/07/24: 0.12%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	3	138
Overseas capital gains tax	17	360
Total taxation (note 5b)	<u>20</u>	<u>498</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	126	768
Corporation tax of 20% (2024: 20%)	<u>25</u>	<u>154</u>
Effects of:		
Irrecoverable overseas tax	3	138
Movement in unrecognised tax losses	3	142
Overseas capital gains tax	17	360
Overseas non-taxable revenue*	(28)	(285)
Overseas non-taxable stock dividends*	–	(11)
Total tax charge for the year (note 5a)	<u>20</u>	<u>498</u>

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £2,694,079 (31/07/24: £2,695,283); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £nil (31/07/24: £1,437,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, £120,000 (31/07/24: £336,000) of the Fund's assets were interest-bearing.

As at 31 July 2025, if interest rates increase or decrease by 2%, with all other variables remaining constant, the resulting change in the net assets attributable to shareholders of the Fund would be an increase or decrease of approximately £2,000 (31 July 2024: £7,000).

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

Notes to the Financial Statements

(continued)

as at 31 July 2025

13. Risk (continued)

(c) Analysis of the Fund's currency exposure (continued)

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets 31 July 2025		Net foreign currency assets 31 July 2024	
	Total	Total	Total	Total

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £1,000 (31/07/24: £355,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £nil (31/07/24: £5,406) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

There were no material shareholders at the year ending 31 July 2025 (31/07/24: Clearstream Banking S.A., Hargreaves Lansdown Nominees Limited, JTC Employer Solutions Nominees held 26.4%, 39.7%, 29.6%, respectively).

15. Share classes

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 80% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

	← Lower Risk				Higher Risk →		
	Potentially Lower Rewards				Potentially Higher Rewards		
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (EUR)	1	2	3	4	5	6	7
Share class B Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund (except for Share class B Accumulation (USD) which has a rating of 6), has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

Single country / specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 10.6% in sterling terms over 12 months and provided cumulative returns of 11.4% and 27.2% over three and five years respectively to the end of July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Tencent**, which rose after rapidly integrating the DeepSeek model into its "super-app", WeChat, as well as other parts of its business. This suggests it should be able to further strengthen its ecosystem and benefit from powerful network effects in the age of generative AI. **Taiwan Semiconductor Manufacturing (TSMC)** also rose. The company reported strong year-on-year growth in revenue and net income, citing robust AI-related demand for its cutting-edge chips.

On the negative side, **Tata Consultancy Services** declined after posting weak revenue growth. **Bank Central Asia** also fell, as industry data raised concerns around non-performing loans and decreased savings rates in Indonesia.

Portfolio Changes

New purchases included **Kotak Mahindra Bank (KMB)**, one of India's leading financial services companies. KMB has built a strong base of customer deposits and, as more people in India start to use formal ways to save and invest, KMB could benefit from that trend. The Fund also purchased **H World**, a multi-brand hotel group in China. The company has scale, strong brands and advanced IT systems, and controls costs well.

Among other divestments, the Fund sold **CSPC Pharmaceutical** and **Mphasis** on expensive valuations.

Outlook

Concerns about tariffs and trade wars continued to affect markets. Considering the uncertainty, the Investment Manager remains cautious on the outlook for Asian equities, particularly as China's economy is still fragile and the US economy is starting to slow. In such periods, the Fund's portfolio companies are expected to gain market share, as they have done in the past during similar periods of disruption.

These companies have strong competitive advantages – whether in brand strength, distribution, or their ability to keep costs down – and have shown they can preserve their profit margins and profitability across market cycles. With valuations looking attractive, the Investment Manager has been adding selectively to its holdings.

IA Sector: Asia Pacific Excluding Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £10,765,696 (31/07/24: £9,846,777); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

The average portfolio dealing spread at the Balance Sheet date was 0.18% (31/07/24: 0.14%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £86,343,000 (31/07/24: £133,724,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.31% (31/07/24: 0.62%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

US dollar	16,677	174
Vietnamese dong	6,372	16,843
Total	<u>432,762</u>	<u>660,865</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £21,638,000 (31/07/24: £33,043,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £311,506 (31/07/24: £490,603) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Hargreaves Lansdown Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 53.7% (31/07/24: Hargreaves Lansdown Nominees Limited and FundSettle EOC Nominees Ltd. held 36.0% and 22.4%, respectively).

Notes to the Financial Statements

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Greater China Growth Fund

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 70% of its Net Asset Value in equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China, Hong Kong and Taiwan which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

	← Lower Risk				Higher Risk →		
	Potentially Lower Rewards				Potentially Higher Rewards		
Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Accumulation (EUR)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- We cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating 1 does not mean a risk free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Authorised Fund Manager’s Report

(continued)

for the year ended 31 July 2025

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company’s Prospectus.

Performance

The Fund rose by 16.0% in sterling terms over 12 months and provided cumulative returns of 2.2% and 6.6% over three and five years respectively to the end of July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Tencent**. The company rapidly integrated the DeepSeek model into its “super app”, WeChat, as well as other parts of its business, suggesting it should be able to further strengthen its ecosystem and benefit from powerful network effects in the age of generative AI. **Taiwan Semiconductor Manufacturing (TSMC)** also rose. The company reported strong year-on-year growth in revenue and net income, citing robust AI-related demand for its cutting-edge chips.

On the negative side, **Meituan** fell due to concerns about the impact on its business of greater competition in Chinese food delivery. Taiwan-based cable-maker **Sinbon Electronics** also fell amid uncertainty as to how US tariffs would affect its export-focused business.

Portfolio Changes

New purchases included **Kanzhun**, the leader in China’s online recruitment industry. The company has innovated with a recommendation-based direct chat model, which has helped clients hire more effectively. The Fund also bought **Yadea**, a maker of two-wheel electric vehicles, including bicycles, scooters and motorcycles. The company is a leader in an industry that has seen rapid development over recent years and it enjoys strong economies of scale.

Among other divestments, the Fund sold **Jardine Matheson** and **CSPC Pharmaceutical** to raise funds for more attractive opportunities.

Outlook

After a challenging few years, the Investment Manager sees healthy demand emerging in some domestically focused sectors in China, including sportswear retail and leisure travel. The government is providing more support for businesses and consumers. Chinese companies have also become more competitive globally. On the other hand, the US-led tariffs have made the outlook more uncertain.

The Investment Manager’s focus is on selecting well-run companies with capable leaders, strong franchises, attractive earnings growth, and sound balance sheets. It believes the Fund’s holdings in market-leading businesses will benefit from long-term structural growth trends and rising incomes in China and will therefore remain resilient.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

5. Taxation

	31 July 2025	31 July 2024
	£'000	£'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	749	684
Total taxation (note 5b)	<u>749</u>	<u>684</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	7,199	8,611
Corporation tax of 20% (2024: 20%)	<u>1,440</u>	<u>1,722</u>
Effects of:		
Irrecoverable overseas tax	749	684
Movement in unrecognised tax losses	968	1,057
Overseas non-taxable revenue*	(2,388)	(2,754)
Overseas non-taxable stock dividends*	(20)	(25)
Total tax charge for the year (note 5a)	<u>749</u>	<u>684</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £21,392,928 (31/07/24: £20,424,717); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.16% (31/07/24: 0.17%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £84,142,000 (31/07/24: £82,869,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.13% (31/07/24: 0.31%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024	
	Total	Total	Total	Total

Total	421,677		416,651	

Notes to the Financial Statements

(continued)

as at 31 July 2025

13. Risk (continued)

(c) Analysis of the Fund's currency exposure (continued)

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £21,084,000 (31/07/24: £20,833,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £367,500 (31/07/24: £380,567) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Hargreaves Lansdown Nominees Limited and Clearstream Banking S.A. held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 28.6% and 13.0%, respectively (31/07/24: Hargreaves Lansdown Nominees Limited and Clearstream Banking S.A. held 29.3% and 10.8%, respectively).

15. Share classes

The Fund has three share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class A Accumulation (GBP)	1.50	1.50	1.50
Share class B Accumulation (GBP)	1.00	1.00	1.00
Share class A Accumulation (EUR)	1.50	1.50	1.50

The net asset value of each share class, the net asset value per share and the number of shares in each class are given in the Comparative Table on pages 74 to 76.

The distributions per share class are given in the Distribution Tables on pages 85 and 86.

All share classes have the same rights on winding up.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Indian Subcontinent All-Cap Fund

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities issued by companies that are established, operating or have their economic activity mainly in the Indian subcontinent, and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Indian subcontinent.

The Fund will invest across all market capitalisations.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

At times, the Fund's portfolio may be concentrated in a small number of holdings.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

Risks and reward profile

	← Lower Risk				Higher Risk →		
	Potentially Lower Rewards				Potentially Higher Rewards		
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class E Accumulation (GBP)	1	2	3	4	5	6	7
Share class E Accumulation (EUR)	1	2	3	4	5	6	7
Share class E Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- During the year, the rating of the Share class E Accumulation (EUR) and Share class E Accumulation (USD), respectively, changed from 6 to 5 to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 10.4% in sterling terms over 12 months and provided cumulative returns of 35.1% and 108.0% over three and five years respectively, to the end of July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **HDFC Bank**, which has made progress in resolving the issues that came with its 2023 merger with HDFC Corp. Its management is increasingly confident of delivering stronger growth and higher returns in the future. **Radico Khaitan** also rose, benefiting from strong demand for its premium whiskies and other high-end drinks.

On the negative side, **Colgate Palmolive (India)** fell. The company reported a decline in revenues, citing lower consumer demand and rising competition. However, the longer-term prospects for the business, which has a strong franchise, remain bright. **Tata Consultancy Services (TCS)** also declined. While the company is being affected by weak demand in its core US market, its customers cannot continue to postpone essential IT services spending, and when this spending resumes it should help to reduce the uncertainty around TCS's outlook.

Portfolio Changes

New purchases included **KEI Industries**, a leading cables and wires company. The company has delivered solid growth and high returns and is now expanding into high-voltage cables, which can be used in data centres and electric-vehicle charging stations. The Fund also purchased **Maruti Suzuki**, a leading maker of passenger vehicles in India. The company's export business is growing rapidly and it is the exclusive global manufacturer of Suzuki's upcoming eVitara model, a new SUV.

Among other divestments, the Fund sold **Hindustan Unilever**, due to concerns about the company's growth prospects, and **ICICI Prudential Life Insurance**, due to concerns the business is now more focused on savings products than protection (insurance) policies. This increases the risk the company's agents may push products that aren't the best fit for customers, as well as making its profits more likely to go up and down with market cycles.

Outlook

While news about US tariffs continues to have an impact on global markets, there are reasons to be optimistic about India. India's economy is mainly driven by domestically focused companies, so it should be relatively well-protected from the fallout from the tariff dispute.

The Fund targets market-leading Indian businesses which are expected to gain market share as their competitors struggle. Most of these holdings are businesses that focus on the domestic market, and so should be less affected by tariffs.

The long-term outlook for India remains attractive, and the recent market correction has created opportunities to invest in high-quality Indian businesses at reasonable valuations.

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	57	55
Overseas capital gains tax	(128)	1,354
Total taxation (note 5b)	<u>(71)</u>	<u>1,409</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	206	180
Corporation tax of 20% (2024: 20%)	<u>41</u>	<u>36</u>
Effects of:		
Irrecoverable overseas tax	57	55
Movement in unrecognised tax losses	55	33
Overseas capital gains tax	(128)	1,354
Overseas non-taxable revenue*	(96)	(69)
Total tax (credit)/charge for the year (note 5a)	<u>(71)</u>	<u>1,409</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £147,734 (31/07/24: £92,453); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Interest payable and similar charges

	31 July 2025 £'000	31 July 2024 £'000
Bank interest	1	–
Total interest payable and similar charges	<u>1</u>	<u>–</u>

7. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	31 July 2025 £'000	31 July 2024 £'000
Interim distribution	3	29
Final distribution	129	107
	<u>132</u>	<u>136</u>
Add: revenue deducted on cancellation of shares	20	8
Deduct: revenue received on creation of shares	(4)	(19)
Net distributions for the year	<u>148</u>	<u>125</u>

Details of the distributions per share are set out in the Distribution Tables on pages 103 and 104.

Notes to the Financial Statements

as at 31 July 2025

8. Movement between net revenue/(expense) and net distributions

	31 July 2025 £'000	31 July 2024 £'000
The distributable amount has been calculated as follows:

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £8,656,000 (31/07/24: £7,054,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 4.33% (31/07/24: 3.11%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024	
	Total	Total	Total	Total
	£'000	£'000	£'000	£'000
Bangladeshi taka	–	–	6	6
Euro	1	1	2	2
Indian rupee	43,186	43,186	33,890	33,890
US dollar	210	210	6	6
Total	43,397	43,397	33,904	33,904

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £2,170,000 (31/07/24: £1,695,000).

Notes to the Financial Statements

as at 31 July 2025

13. Risk (continued)

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £22,742 (31/07/24: £20,384) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

JTC Employer Solutions Nominees, Hargreaves Lansdown Nominees Limited and Minster Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 33.0%, 15.2% and 11.8%, respectively (31/07/24: Hargreaves Lansdown Nominees Limited, JTC Employer Solutions Nominees and Minster Nominees Limited held 29.7%, 27.8% and 10.0%, respectively).

15. Share classes

The Fund has four share classes in issue.

The annual management charge* on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class B Accumulation (GBP)	1.00	1.00	1.00

Share class E Accumulation (EUR)	0.55	0.69	0.69
Share class E Accumulation (USD)	0.55	0.69	0.69

*The annual management charges were reduced from May 2025, except for Share class B Accumulation (GBP).

The net asset value of each share class, the net asset value per share and the number of shares in each class are given in the Comparative Table on pages 91 to 94.

The distributions per share class are given in the Distribution Tables on pages 103 to 104.

All share classes have the same rights on winding up.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	30	171
Total taxation (note 5b)	<u>30</u>	<u>171</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	249	683
Corporation tax of 20% (2024: 20%)	<u>50</u>	<u>137</u>
Effects of:		
Irrecoverable overseas tax	30	171
Movement in unrecognised tax losses	18	205
Overseas non-taxable revenue*	<u>(68)</u>	<u>(342)</u>
Total tax charge for the year (note 5a)	<u>30</u>	<u>171</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £1,611,230 (31/07/24: £1,596,959); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was n/a (31/07/24: 0.38%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £nil (31/07/24: £9,612,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, £183,000 (31/07/24: £2,662,000) of the Fund's assets were interest-bearing.

As at 31 July 2025, if interest rates increase or decrease by 2%, with all other variables remaining constant, the resulting change in the net assets attributable to shareholders of the Fund would be an increase or decrease of approximately £4,000 (31 July 2024: £53,000).

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024	
	Total		Total	
	£'000		£'000	
Euro	(4)		5	
Japanese yen	35		48,258	
US dollar	–		6	
Total	<u>31</u>		<u>48,269</u>	

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £2,000 (31/07/24: £2,413,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

Notes to the Financial Statements

as at 31 July 2025

13. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £nil (31/07/24: £34,398) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

There were no material shareholders at the year ending 31 July 2025 (31/07/24: Hargreaves Lansdown Nominees Limited and Chase Nominees Limited held 31.4% and 18.9%, respectively).

14. Share classes

As the Fund closed on 1 November 2024, there are currently no share classes in issue.

Stewart Investors Asia Pacific and Japan All Cap Fund*

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (including Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

*Please see the Changes to the Prospectus on page 2 for details on the amendments made to the Fund name in the year.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 4.2% in sterling terms over the year and has provided cumulative returns of 5.7% and 31.2% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from performance included: **Tube Investments of India** (India: Consumer Discretionary), which reported weaker results in its engineering, metal-forming and bicycle divisions; **MANI** (Japan: Health Care), whose shares fell due to a recall of its dental products in China; and **Elgi Equipments** (India: Industrials), which fell amid a wider fall in the share prices of Indian industrial stocks.

Positive contributors to returns included: **Japan Elevator Service** (Japan: Industrials), which is winning new business in the elevator-service market at the expense of lift manufacturers; **SHIFT** (Japan: Information Technology), which is enjoying a better balance between supply and demand for its software-testing services; and **MonotaRO** (Japan: Industrials), which is expanding its product range, building new distribution centres and finding growth in new markets, including South Korea.

Portfolio Changes

Significant new purchases included: **DFI Retail** (Hong Kong: Consumer Staples), which owns pharmacies, food and convenience stores across Asia and emphasises selling quality food at affordable prices; **Dongguan Yiheda Automation** (China; Industrials), China's leading supplier of automation components; and **NAVER** (South Korea: Communication Services), which owns South Korea's leading internet search engine and a growing e-commerce platform.

The Fund sold its holdings in: **Unicharm** (Japan: Consumer Staples), due to the increased competition it faces from local brands across Asia; **Fisher & Paykel Healthcare** (New Zealand: Health Care), which may be vulnerable to the new tariffs imposed by the Trump administration; and **Syngene International** (India: Health Care), reflecting a view that there were better opportunities elsewhere.

Outlook

The Fund continues to invest in high-quality companies that are aligned with sustainable development. The focus is on finding companies whose stewards have proven to be competent, long-term decision makers, free from political agendas and who prioritise financial resilience over short-term growth.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	354	664
Overseas capital gains tax	(2,565)	6,736
Total taxation (note 5b)	<u>(2,211)</u>	<u>7,400</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	6,183	1,944
Corporation tax of 20% (2024: 20%)	<u>1,237</u>	<u>389</u>

Effects of:

Irrecoverable overseas tax	354	664
Movement in unrecognised tax losses	777	846
Non-allowable expenses	1	–
Overseas capital gains tax	(2,565)	6,736
Overseas non-taxable revenue*	(2,015)	(1,205)
Overseas non-taxable stock dividends*	–	(30)
Total tax (credit)/charge for the year (note 5a)	<u>(2,211)</u>	<u>7,400</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £25,426,158 (31/07/24: £24,649,049*); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

*An adjustment of £16,748,080 has been made to the prior year figure to correct a prior year calculation error. No other figures in the financial statements are impacted by this change and the correct figures have been filed within the tax return.

6. Interest payable and similar charges

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.28% (31/07/24: 0.34%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £75,911,000 (31/07/24: £88,362,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 1.99% (31/07/24: 0.28%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

Notes to the Financial Statements

US dollar	14,012	14
Total	<u>380,622</u>	<u>430,819</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £19,031,000 (31/07/24: £21,541,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £289,043 (31/07/24: £335,309) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Allfunds Nominees Limited and Smith & Williamson Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 19.8% and 14.7%, respectively (31/07/24: Evelyn Partners Investment Services Limited and Allfunds Nominees Limited held 15.5% and 11.4%, respectively).

Notes to the Financial Statements

Level 1: the unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: inputs are unobservable (i.e. market data is unavailable) for the asset or liability. Over the Counter (OTC) derivatives (including equity swaps) are held at fair value, which is determined by valuation techniques or single broker quotes.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Although the Fund's investment policy excludes Japan, it may hold companies that are listed on the Japanese Stock Market, where a majority of their economic activities are in the Asia Pacific region (excluding Japan).

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;

Risks and reward profile (continued)

- During the year, rating of the Share class B Accumulation (USD) changed from 6 to 5 to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 5.2% in sterling terms over the year and has provided cumulative returns of 5.0% and 28.5% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B GBP Accumulation share class).

Detractors from returns included: **Tata Consultancy Services** (India: Information Technology), whose results fell short of expectations; **Unicharm** (Japan: Consumer Staples), where the franchise is struggling to evolve in the face of greater competition in China and Indonesia; and **Samsung Electronics** (South Korea: Information Technology), which fell due to delays in getting its latest generation of memory chips certified by Nvidia.

Positive contributors to returns included: **HDFC Bank** (India: Financials), which performed well as investors responded to economic uncertainty by favouring higher-quality Indian banks; **Oversea-Chinese Banking (OCBC)** (Singapore: Financials), which continued to lend at an attractive rate with low levels of non-performing loans; and **Shenzen Inovance Technology** (China: Industrials), which is seeing faster growth in its 'new energy vehicles' and industrial-automation divisions.

Portfolio Changes

Significant new purchases included: **SF** (China: Industrials), which has grown to become one of China's leading logistics businesses; **Alibaba** (China: Consumer Discretionary), an online retailer using the cash it generates in e-commerce to expand into cloud computing and artificial intelligence; and **Trip.com** (China: Consumer Discretionary), an online travel agency that should benefit from the growing number of Chinese tourists.

The Fund sold its position in **Unicharm** (Japan: Consumer Staples), due to the increased competition it faces from local brands across Asia. It also sold **Tata Consumer Products** (India: Consumer Staples) and **Samsung C&T** (South Korea: Industrials) to finance new investments elsewhere.

Outlook

The Fund continues to invest in high-quality companies that are aligned with sustainable development. The focus is on finding companies whose stewards have proven to be competent, long-term decision makers, free from political agendas and who prioritise financial resilience over short-term growth.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	9,694	8,816
Overseas capital gains tax	(24,860)	119,827
Total taxation (note 5b)	<u>(15,166)</u>	<u>128,643</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	70,914	55,570
Corporation tax of 20% (2024: 20%)	<u>14,183</u>	<u>11,114</u>
Effects of:		
Irrecoverable overseas tax	9,694	8,816
Movement in unrecognised tax losses	10,108	10,865
Non-allowable expenses	1	–
Overseas capital gains tax	(24,860)	119,827
Overseas non-taxable revenue*	(24,292)	(21,287)
Overseas non-taxable stock dividends*	–	(692)
Total tax (credit)/charge for the year (note 5a)	<u>(15,166)</u>	<u>128,643</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £215,587,978 (31/07/24: £205,479,292); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Interest payable and similar charges

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.13% (31/07/24: 0.17%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/2024: £nil) and no commitments (31/07/2024: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £1,119,603,000 (31/07/24: £1,321,332,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 3.20% (31/07/24: 3.23%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

Notes to the Financial Statements

(continued)

as at 31 July 2025

13. Risk (continued)**(c) Analysis of the Fund's currency exposure (continued)**

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets	Net foreign currency assets
	31 July 2025	31 July 2024
	Total	Total

US dollar	139,842	54,988
Total	<u>5,635,839</u>	<u>6,488,905</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £281,792,000 (31/07/24: £324,445,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £3,994,675 (31/07/24: £4,674,352) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Clearsteam Banking S.A. held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 34.9% (31/07/2024: Clearsteam Banking S.A. held 43.2%).

Notes to the Financial Statements

(continued)

as at 31 July 2025

15. Share classes

The Fund has five share classes in issue.

The annual management charge on each share class is as follows:

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim - 100.00% of the dividend is received as franked investment income.

Interim - 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim - 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final - 100.00% of the dividend is received as franked investment income.

Final - 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Final - 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Although the Fund's investment policy excludes Japan, it may hold companies that are listed on the Japanese Stock Market, where a majority of their economic activities are in the Asia Pacific region (excluding Japan).

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 6.9% in sterling terms over the year and has provided cumulative returns of 6.2% and 33.3% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors over the year included the Fund's holdings in: **Tube Investments of India** (India: Consumer Discretionary), which reported weaker results in its engineering, metal-forming and bicycle divisions; **Tata Consultancy Services** (India: Information Technology), whose results fell short of the market's expectations; and **Voltronic Power Technology** (Taiwan: Industrials), which fell due to worries about the potential impact that new trade tariffs might have on its sales.

Positive contributors over the year included the Fund's holdings in: **DFI Retail** (Hong Kong: Consumer Staples), which is becoming more streamlined and efficient under the guidance of new management; **Chroma ATE** (Taiwan: Information Technology) which has seen strong sales growth and benefitted from its association with strong demand for advanced chips required by artificial intelligence (AI); and **Shenzhen Inovance Technology** (China: Industrials), which is seeing faster growth in its 'new energy vehicles' and industrial-automation divisions.

Portfolio Changes

Significant additions to the Fund over the year included: **Ayala** (Philippines: Industrials), which has interests across a range of industries that should benefit from the long-term growth of the Philippines; **DFI Retail** (Hong Kong: Consumer Staples), which owns pharmacies, food and convenience stores across Asia and emphasises selling quality food at affordable prices; and **Alibaba** (China: Consumer Discretionary), an online retailer using the cash it generates in e-commerce to expand into cloud computing and AI.

The Fund sold its positions in: **Unicharm** (Japan: Consumer Staples), due to the increased competition it faces from local brands across Asia; and **Dr Lal PathLabs** (India: Health Care), and **Syngene International** (India: Health Care), to fund stronger investment ideas elsewhere.

Outlook

The Fund continues to invest in high-quality companies that are aligned with sustainable development. The focus is on finding companies whose stewards have proven to be competent, long-term decision makers, free from political agendas and who prioritise financial resilience over short-term growth.

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	1,001	1,125
Overseas capital gains tax	(4,817)	14,191
Total taxation (note 5b)	<u>(3,816)</u>	<u>15,316</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	6,859	4,505
Corporation tax of 20% (2024: 20%)	<u>1,372</u>	<u>901</u>
Effects of:		
Irrecoverable overseas tax	1,001	1,125
Movement in unrecognised tax losses	1,164	1,262
Overseas capital gains tax	(4,817)	14,191
Overseas non-taxable revenue*	(2,536)	(2,115)
Overseas non-taxable stock dividends*	–	(48)
Total tax (credit)/charge for the year (note 5a)	<u>(3,816)</u>	<u>15,316</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £12,521,969 (31/07/24: £11,358,080); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.19% (31/07/24: 0.27%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £108,843,000 (31/07/24: £138,644,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.25% (31/07/24: 0.45%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

Total	<u>546,241</u>		<u>673,661</u>	

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £27,312,000 (31/07/24: £33,683,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £401,222 (31/07/24: £508,833) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Clearstream Banking S.A., Smith & Williamson Nominees Limited and Allfunds Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025, and at the year end, held 18.2%, 12.6% and 11.9%, respectively (31/07/24: Clearstream Banking S.A. and Evelyn Partners Investment Services Limited held 15.8% and 10.3%, respectively).

15. Share classes

The Fund has four share classes in issue.

The annual management charge on each share class is as follows:

Notes to the Financial Statements

(continued)

as at 31 July 2025

15. Share classes (continued)

The net asset value of each share class, the net asset value per share and the number of shares in each class are given in the Comparative Table on pages 166 to 169.

The distributions per share class are given in the Distribution Tables on pages 178 and 179.

All share classes have the same rights on winding up.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Final – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Indian subcontinent and which are listed, traded or dealt in on Regulated Markets worldwide.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Stewart Investors Indian Subcontinent All Cap Fund

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 14.7% in sterling terms over the year and has provided cumulative returns of 15.5% and 98.8% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from performance included: **Tube Investments of India** (Consumer Discretionary), which reported weaker results in its engineering, metal-forming and bicycle divisions; **Blue Dart Express** (Industrials), whose growth has slowed slightly and where there were fears slower economic growth would hurt demand for its logistics services; and **Carborundum Universal** (Materials), over concerns that its sales would be negatively affected by trade tariff uncertainty. This position has now been sold.

Positive contributors to returns included: **HDFC Bank** (Financials), which performed well as investors responded to economic uncertainty by favouring higher-quality Indian banks; **Cholamandalam Financial** (Financials), whose results showed significant growth; and **Narayana Hrudayalaya** (Health Care), which reported that its new hospital in the Cayman Islands is performing well and which signalled its intention to expand by building six new hospitals across Bangalore, Raipur and Kolkata by 2029.

Portfolio Changes

The Fund added new holdings in: **Bajaj Holdings & Investment** (Financials), whose underlying autos and financial-services businesses are among the leaders in their sectors; **ICICI Lombard General Insurance** (Financials), an insurer that should benefit from Prime Minister Modi's commitment to delivering 'insurance for all' by 2047; and **CarTrade Tech** (Consumer Discretionary), a platform that helps to match buyers and sellers of new and second-hand cars.

The Fund sold its holdings in: **Dr Lal PathLabs** (Health Care), to fund stronger investment ideas elsewhere; **Kotak Mahindra Bank** (Financials) which is experiencing increased competition for deposits; and **Cyient** (Information Technology), due to its potential vulnerability to changes in US trade policy.

Outlook

At a time of uncertainty about trade tariffs, India's domestic economy is growing and enjoys the advantage of being somewhat insulated from fluctuations in international trade. This Fund's focus is on identifying, and investing in, quality companies that are trading at reasonable valuations and which contribute to, and benefit from, sustainable development over the long term.

*The Fund was launched on 9 November 2012.

[^]Benchmark: MSCI India Index.

IA Sector: India.

There was a change from IA Sector: Specialist to IA Sector: India. The IA India Sector was split out of the IA Specialist Sector as of 13 September 2021 to create a new IA India Sector, the Fund joined the new IA India Sector at the same time.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	83	783
Overseas capital gains tax	(9,641)	29,033
Total taxation (note 5b)	<u>(9,558)</u>	<u>29,816</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net expense before taxation for the year	(1,607)	(726)
Corporation tax of 20% (2024: 20%)	(321)	(145)

Effects of:

Irrecoverable overseas tax	83	783
Movement in unrecognised tax losses	1,150	1,243
Overseas capital gains tax	(9,641)	29,033
Overseas non-taxable revenue*	(829)	(1,093)
Prior year adjustment to tax losses	–	(5)
Total tax (credit)/charge for the year (note 5a)	<u>(9,558)</u>	<u>29,816</u>

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £13,820,020 (31/07/24: £12,669,402); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Interest payable and similar charges

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £107,147,000 (31/07/24: £157,187,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.51% (31/07/24: 3.09%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025	31 July 2024	31 July 2025	31 July 2024

Notes to the Financial Statements

(continued)

as at 31 July 2025

13. Risk (continued)**(c) Analysis of the Fund's currency exposure (continued)**

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £27,188,000 (31/07/24: £36,725,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £407,242 (31/07/24: £565,107) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Hargreaves Lansdown Nominees Limited and FIL Nominee (Shareholdings) Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 29.9% and 12.7%, respectively (31/07/24: Hargreaves Lansdown Nominees Limited, FIL Nominee (Shareholdings) Limited and Clearstream Banking S.A. held 25.9%, 11.3% and 10.2%, respectively).

15. Share classes

The Fund has five share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class A Accumulation (GBP)	1.60	1.60	1.60

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Single country/specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 0.7% in sterling terms over the year and has provided cumulative returns of 2.2% over the three years to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from the Fund's performance included: **Tecan** (Switzerland: Health Care), which saw weaker sales in China; **Endava** (United States: Information Technology), which was hurt by worries about a slowdown in IT spending in the US; and **EPAM Systems** (United States: Information Technology), whose management signalled that 2025 could be tougher than was once hoped.

Positive contributors included: **Dino Polska** (Poland: Consumer Staples), which continued to expand into rural Poland; **Jerónimo Martins** (Portugal: Consumer Staples), which was a beneficiary of stronger-than-expected retail sales in Poland; and **bioMérieux** (France: Health Care), which continues to report strong sales of its 'Spotfire' diagnostic system.

Portfolio Changes

Significant new purchases included: **Axfood** (Sweden: Consumer Staples), which operates a diverse range of food retailers across Sweden; **L'Oréal** (France: Consumer Staples), which has a broad range of well-known beauty and skincare brands; and brake manufacturer **Knorr-Bremse** (Germany: Industrials).

The Fund sold its holdings in **Tecan** (Switzerland: Health Care), due to continued weak demand and lower sales in China; **Belimo** (Switzerland: Industrials), whose share price had risen more quickly than its underlying profits; and **SFS** (Switzerland: Industrials), reflecting worries that its sales could be hurt by any wider economic slowdown.

Outlook

On 16 June 2025 the ACD notified investors that, subject to approval from the Financial Conduct Authority, the Stewart Investors European (ex UK) All Cap Fund is due to close on 30 September 2025.

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	11	10
Total taxation (note 5b)	<u>11</u>	<u>10</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is higher (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	50	43
Corporation tax of 20% (2024: 20%)	<u>10</u>	<u>9</u>
Effects of:		
Irrecoverable overseas tax	11	10
Movement in unrecognised tax losses	3	2
Overseas non-taxable revenue*	(13)	(11)
Total tax charge for the year (note 5a)	<u>11</u>	<u>10</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £6,490 (31/07/24: £3,605); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	31 July 2025 £'000	31 July 2024 £'000

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.09% (31/07/24: 0.12%).

10. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

11. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £435,000 (31/07/24: £642,000).

Notes to the Financial Statements

(continued)

as at 31 July 2025

11. Risk (continued)**(b) Interest-rate risk**

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 9.13% (31/07/24: 3.08%) of the Fund's assets were interest-bearing.

As at 31 July 2025, if interest rates increase or decrease by 2.00%, with all other variables remaining constant, the resulting change in the net assets attributable to shareholders of the Fund would be an increase or decrease of approximately £4,000 (31/07/24: £2,000).

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024	
	Total	Total	Total	Total
	£'000	£'000	£'000	£'000

Polish zloty	96		142	
Swedish krona	583		583	
Swiss franc	237		777	
US dollar	80		149	
Total	<u>2,203</u>		<u>3,221</u>	

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £110,000 (31/07/24: £161,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

12. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £848 (31/07/24: £1,021) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

First Sentier Seed Trust No1 held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 84.4% (31/07/24: First Sentier Seed Trust No1 and Caceis UK Nominees held 62.0% and 26.5%, respectively).

Notes to the Financial Statements

as at 31 July 2025

13. Share classes

The Fund has two share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class B Accumulation (GBP)	0.55	0.55	0.55
Share class E Accumulation (GBP)	0.30	0.30	0.30

The net asset value of each share class, the net asset value per share and the number of shares in each class are given in the Comparative Table on pages 204 and 205.

The distributions per share class are given in the Distribution Tables on page 213.

All share classes have the same rights on winding up.

Reconciliation of the shares movement in the year:

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies in Emerging Markets, which are listed, traded or dealt in on Regulated Markets worldwide, and in those of companies listed on developed market exchanges a majority of whose economic activities take place in Emerging Markets.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 6 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

(continued)

for the year ended 31 July 2025

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 16.3% in sterling terms over 12 months and provided cumulative returns of 26.2% and 51.9% over three and five years respectively, to the end of July 2025 (net of fees and tax for the Share class B Accumulation (GBP)).

Key contributors included **Prosus**, an emerging-market consumer Internet investor. The firm has benefited from the strong performance of companies such as China's Tencent, in which it owns a significant stake, and Brazilian online food delivery platform iFood, which it wholly owns. **Taiwan Semiconductor Manufacturing** also rose. The company reported strong year-on-year growth in revenue and net income, citing robust AI-related demand for its cutting-edge chips.

On the negative side, **Alsea** declined, despite strong performance in its home market of Mexico. This was mostly due to weakness in Alsea's European business. Brazilian pharmacy chain **Raia Drogasil** also declined after reporting disappointing earnings.

Portfolio Changes

New purchases included **Trip.com**. The company runs China's largest online travel booking app and has benefited from strong travel demand in its domestic market. It is also seeing a growing contribution from its overseas businesses. Another new purchase, **Nu**, is a digital-only bank in Brazil with over 100 million customers. Founded in 2013, it has disrupted the industry through a model that keeps costs low while delivering good customer service.

Among other divestments, the Fund sold **Despegar.com** and **Yum China** to fund more attractive opportunities.

Outlook

While ongoing news about US tariffs continues to affect global markets, the Fund's holdings are likely to remain resilient through this period. The Fund invests in businesses that have proven management teams and competitive advantages that allow them to take advantage of positive long-term trends in emerging markets.

The Fund targets companies with stronger brands, closer relationships with customers, or lower prices than their rivals – or simply those that provide a service or product that customers cannot live without. The Investment Manager believes the correction in share prices across emerging markets in 2025 has presented an excellent opportunity for long-term investors to buy leading franchises at attractive prices.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	188	12
Overseas capital gains tax	122	610
Total taxation (note 5b)	310	622

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is higher (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	1,501	886
Corporation tax of 20% (2024: 20%)	300	177

Effects of:

Irrecoverable overseas tax	188	12
Movement in unrecognised tax losses	138	79
Overseas capital gains tax	122	610
Overseas non-taxable revenue*	(434)	(268)
Relief on overseas tax expensed	(2)	12
Taxation due to timing differences	(2)	–
Total tax charge for the year (note 5a)	310	622

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £676,561 (31/07/24: £526,725); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

The average portfolio dealing spread at the Balance Sheet date was 0.17% (31/07/24: 0.16%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £27,985,000 (31/07/24: £16,575,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 1.91% (31/07/24: 1.85%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024

Notes to the Financial Statements

(continued)

as at 31 July 2025

13. Risk (continued)

(c) Analysis of the Fund's currency exposure (continued)

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £7,010,000 (31/07/24: £4,118,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £71,025 (31/07/24: £41,668) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

FNZ (UK) Nominees Limited, National Trust for Scotland, RLAM Nominees Limited and Quilter Life & Pensions Limited, held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 13.6%, 12.2%, 10.1% and 10.1%, respectively (31/07/24: FNZ (UK) Nominees Limited, FIL Nominee (shareholdings) Limited and Quilter Life & Pensions Limited held 19.8%, 15.4% and 12.1%, respectively).

15. Share classes

The Fund has four share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class B Accumulation (GBP)	0.75	0.75	0.75

Stewart Investors Global Emerging Markets Leaders Fund

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in equity or equity-related securities of large and mid-capitalisation companies that are incorporated or listed in Emerging Markets, or those of companies listed on developed market exchanges where a majority of their activities take place in Emerging Market countries.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund has no set target for the number of companies it will invest in, but the Manager anticipates that typically the Fund will invest in around 35 - 50 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;

Authorised Fund Manager's Report

for the year ended 31 July 2025

- During the year, the rating of the SRR I for Share class B Accumulation (USD) changed from 6 to 5 to reflect sustained changes in the fund's market volatility profile to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRR I is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 1.3% in sterling terms over the year and has provided cumulative returns of 3.4% and 22.2% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from performance included: **Raia Drogasil** (Brazil: Consumer Staples), which faced concerns about growing competition from online platforms in the personal care and beauty markets; **Globant** (Argentina*: Information Technology), whose management indicated that the outlook for 2025 was weaker than expected; and **Tata Consultancy Services** (India: Information Technology), whose results fell short of expectations.

Positive contributors to returns included: **Taiwan Semiconductor Manufacturing** (Taiwan: Information Technology), which was a beneficiary of strong demand for its advanced semiconductors; **Delta Electronics** (Taiwan: Information Technology), where the construction of a new generation of data centres is driving demand for its 'power electronics'; and **Sunny Optical Technology** (China: Information Technology), which saw strong demand for its lenses for use in smartphones and driver-assistance systems.

Portfolio Changes

Significant new purchases included: **Tencent** (China: Communication Services), which operates WeChat, China's leading multi-purpose communication application; **Alibaba** (China: Consumer Discretionary), an online retailer using the cash it generates in e-commerce to expand into cloud computing and artificial intelligence; and **Bajaj Holdings & Investment** (India: Financials), whose autos and financial-services businesses are among the leaders in their sectors.

The Fund sold its positions in: **Unicharm** (Japan: Consumer Staples), due to the increased competition it faces from local brands across Asia; **Jerónimo Martins** (Portugal: Consumer Staples), whose shares had performed well and where it had become difficult to see sufficient growth to support further gains; and **Kotak Mahindra Bank** (India: Financials), which is finding it harder to attract deposits.

Outlook

The Fund's focus is on generating attractive returns over the long term rather than attempting to outperform through every short-term period. The companies it invests in continue to have multi-year opportunities for growth ahead of them. Any short-term uncertainty around trade or economic growth could represent an opportunity for those companies to use their financial strength to extend their advantage relative to their peers.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	688	298
Overseas capital gains tax	(817)	4,609
Total taxation (note 5b)	<u>(129)</u>	<u>4,907</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	3,674	3,915
Corporation tax of 20% (2024: 20%)	<u>735</u>	<u>783</u>

Effects of:

Irrecoverable overseas tax	688	297
Movement in unrecognised tax losses	569	520
Overseas capital gains tax	(817)	4,609
Overseas non-taxable revenue*	(1,257)	(1,262)
Relief on overseas tax expensed	(10)	(40)
Taxation due to timing differences	(37)	–
Total tax (credit)/charge for the year (note 5a)	<u>(129)</u>	<u>4,907</u>

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £62,975,612 (31/07/24: £62,406,708); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Interest payable and similar charges

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.15% (31/07/24: 0.14%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £68,414,000 (31/07/24: £89,375,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.05% (31/07/24: 0.28%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

Total	<u>343,182</u>		<u>448,976</u>	

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £17,159,000 (31/07/24: £22,449,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £202,238 (31/07/24: £257,512) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Hargreaves Lansdown Nominees Limited and Allfunds Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 14.7% and 10.2%, respectively (31/07/24: Fondation Lucie et Andre Chagnon held 24.1%).

Notes to the Financial Statements

(continued)

as at 31 July 2025

15. Share classes

The Fund has five share classes in issue.

The annual management charge on each share class is as follows:

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Global Emerging Markets All Cap Fund*

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long term (at least 5 years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in Emerging Markets and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

The Fund might also experience the following risks:

Emerging Market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 5.5% in sterling terms over the year and has provided cumulative returns of 3.1% and 9.1% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from returns included: **Raia Drogasil** (Brazil: Consumer Staples), which faced concerns about growing competition from online platforms in the personal care and beauty markets; **Tube Investments of India** (India: Consumer Discretionary), which reported weaker results in its engineering, metal-forming and bicycle divisions; and **Globant** (Argentina*: Information Technology), whose management indicated that the outlook for 2025 was weaker than expected.

Positive contributors to returns included: **Taiwan Semiconductor Manufacturing** (Taiwan: Information Technology), which was a beneficiary of strong demand for its advanced semiconductors; **HDFC Bank** (India: Financials), which performed well as investors responded to economic uncertainty by favouring higher-quality Indian banks; and **Jeronimo Martins** (Portugal: Consumer Staples), which was a beneficiary of stronger-than-expected retail sales in Poland, its largest market. The Fund's holding in **Jeronimo Martins** has now been sold.

Portfolio Changes

Significant new purchases included: **Alibaba** (China: Consumer Discretionary), an online retailer using the cash it generates in e-commerce to expand into cloud computing and artificial intelligence; **Walmart de Mexico** (Mexico: Consumer Staples), the largest retailer in Mexico; and **Trip.com** (China: Consumer Discretionary), an online travel agency that should benefit from the growing number of Chinese tourists.

The Fund sold its holdings in: **Unicharm** (Japan: Consumer Staples), due to the increased competition it faces from local brands across Asia; **Kotak Mahindra Bank** (India: Financials), which is experiencing increased competition for deposits; and **EPAM Systems** (United States: Information Technology), whose clients may postpone or cancel their IT investments due to economic uncertainty.

Outlook

The Fund's focus is on generating attractive returns over the long term rather than attempting to outperform through every short-term period. The companies it invests in continue to have multi-year opportunities for growth ahead of them. Any short-term uncertainty around trade or economic growth could represent an opportunity for those companies to use their financial strength to extend their advantage relative to their peers.

^Benchmark: MSCI Emerging Markets Index.

IA Sector: IA Global Emerging Markets Sector.

The Fund's IA Sector was amended in the period to provide a better comparison to funds with a similar investment strategy.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	1,137	1,008
Overseas capital gains tax	(2,532)	9,181
Total taxation (note 5b)	<u>(1,395)</u>	<u>10,189</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is lower (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	7,420	4,127
Corporation tax of 20% (2024: 20%)	<u>1,484</u>	<u>825</u>

Effects of:

Double taxation relief - current tax	(25)	–
Irrecoverable overseas tax	1,137	1,008
Movement in unrecognised tax losses	984	949
Non-allowable expenses	1	–
Overseas capital gains tax	(2,532)	9,181
Overseas non-taxable revenue*	(2,381)	(1,730)
Relief on overseas tax expensed	(63)	(44)
Total tax (credit)/charge for the year (note 5a)	<u>(1,395)</u>	<u>10,189</u>

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £9,830,566 (31/07/24: £8,846,607); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £116,531,000 (31/07/24: £132,135,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 2.38% (31/07/24: 0.67%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

US dollar	11,189	43,673
Total	<u>584,826</u>	<u>649,491</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £29,241,000 (31/07/24: £32,475,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £433,383 (31/07/24: £479,088) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Clearstream Banking S.A. and Bank Lombard Odier & Co. Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 36.4% and 19.6%, respectively. (31/07/24: Clearstream Banking S.A. and Bank Lombard Odier & Co. Limited held 35.0% and 18.8%, respectively).

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim - 100.00% of the dividend is received as franked investment income.

Interim - 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim - 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final - 100.00% of the dividend is received as franked investment income.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. This represents a minimum threshold; the Manager generally targets companies with a free float market capitalization of at least US\$5 billion at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund is not managed to a benchmark and may have exposure to developed or Emerging Markets whilst maintaining its geographical diversity.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

	← Lower Risk				Higher Risk →		
	Potentially Lower Rewards				Potentially Higher Rewards		
Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;

*Please see the Changes to the Prospectus on page 2 for details on the amendments made to the Fund name in the year.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 8.9% in sterling terms over the year and provided cumulative returns of 33.2% and 61.9% over the three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from performance over the year included: **WEG** (Brazil: Industrials), whose results for the final quarter of 2024 fell short of expectations; **Old Dominion Freight Line** (United States: Industrials), which pointed to challenging economic conditions to explain a fall in shipping volumes; and **Brown & Brown** (United States: Financials), which fell in response to downward pressure on insurance pricing and slower growth.

Positive contributors included: **Fortinet** (United States: Information Technology), a cybersecurity group which reported strong sales of its hardware; **Arista Networks** (United States: Information Technology), sales of whose networking equipment were boosted by a wave of investment in artificial intelligence (AI); and **bioMérieux** (France: Health Care), which continues to report strong sales of its 'Spotfire' diagnostic system.

Portfolio Changes

Significant new purchases included: **Alibaba** (China: Consumer Discretionary), an online retailer using the cash it generates in e-commerce to expand into cloud computing and AI; **Brown & Brown** (United States: Financials), an insurance broker helping its customers to manage a range of risks; and **Synopsys** (United States: Information Technology), a leader in providing solutions for designing and testing semiconductors.

The Fund sold its positions in: **Costco Wholesale** (United States: Consumer Staples), whose shares had performed well, leaving less room for further gains; **Beiersdorf** (Germany: Consumer Staples) which saw sales of its luxury La Prairie brand being impacted by lower consumer spending in China; and **Copart** (United States: Industrials), whose shares appeared less attractively valued than they once did.

Outlook

Rising trade tensions and new barriers to technology exports mean that many companies could face a different set of opportunities – and risks – in the coming decades. Amid this uncertainty, the Fund maintains a long-term investment horizon and focuses on investing in companies led by high-quality management teams whose products or services contribute to sustainable development.

Notes to the Financial Statements

(continued)

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	70	74
Overseas capital gains tax	48	358
Total taxation (note 5b)	<u>118</u>	<u>432</u>

(b) Factors affecting current tax charge for the year:

The tax assessed for the year is higher (2024 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

Net revenue before taxation for the year	298	334
Corporation tax of 20% (2024: 20%)	<u>60</u>	<u>67</u>

Effects of:

Irrecoverable overseas tax	70	73
Movement in unrecognised tax losses	58	57
Overseas capital gains tax	48	358
Overseas non-taxable revenue*	(110)	(123)
Taxation due to timing differences	(3)	–
UK dividends*	(5)	–
Total tax charge for the year (note 5a)	<u>118</u>	<u>432</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £1,362,606 (31/07/24: £1,304,014); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	31 July 2025 £'000	31 July 2024 £'000
Interim distribution	36	80
Final distribution	<u>201</u>	<u>177</u>

The average portfolio dealing spread at the Balance Sheet date was 0.09% (31/07/24: 0.11%).

11. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

12. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £9,085,000 (31/07/24: £9,294,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.18% (31/07/24: 0.61%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

Notes to the Financial Statements

Taiwan dollar	1,087		2,453	
US dollar	22,324		22,530	
Total	<u>45,989</u>		<u>43,725</u>	

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £2,299,000 (31/07/24: £2,186,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

13. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £21,578 (31/07/24: £22,775) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

FIL Nominees (Shareholdings) Limited and Hargreaves Lansdown Nominees Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 14.3% and 13.8%, respectively (31/07/24: FIL Nominees (Shareholdings) Limited and Hargreaves Lansdown Nominees Limited held 13.8% and 12.2%, respectively).

14. Share classes

The Fund has two share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class A Accumulation (GBP)	1.20	1.20	1.20
Share class B Accumulation (GBP)	0.45	0.45	0.45

The net asset value of each share class, the net asset value per share and the number of shares in each class are given in the Comparative Table on pages 276 and 277.

The distributions per share class are given in the Distribution Tables on page 286.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve an investment return from income and capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have a non-financial sustainability objective. Its objective is to achieve capital growth over the long-term by following its investment policy and strategy.

The Fund invests in a diversified portfolio of equity or equity-related securities which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The Fund is not managed to a benchmark and may have exposure to developed markets or Emerging Markets whilst maintaining its geographical diversity.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager's intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund's price) or materially alter the risk profile of the Fund. The Manager's intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;

*Please see the Changes to the Prospectus on page 2 for details on the amendments made to the Fund name in the year.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

- During the year, the rating of the Share class A Accumulation (GBP), Share class A Income (GBP), Share class B Accumulation (GBP), and Share class B Income (GBP) changed from 6 to 5 to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund (except for Share Class A Accumulation (EUR), Share Class B Accumulation (EUR), Share Class A Accumulation USD) and Share Class B Accumulation (USD) which have a rating of 6) has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 4.7% in sterling terms over the year and has provided cumulative returns of 11.7% and 25.3% over three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Detractors from performance included: **Brown & Brown** (United States: Financials), which fell in response to downward pressure on insurance pricing and slower growth; **Beiersdorf** (Germany: Consumer Staples), which saw sales of its luxury La Prairie brand hurt by lower consumer spending in China; and **Voltronic Power Technology** (Taiwan: Industrials), which fell due to worries about the potential impact of new trade tariffs.

Positive contributors included: **Fortinet** (United States: Information Technology), a cybersecurity group which reported strong sales; **Spectris** (United Kingdom: Information Technology), which received a number of takeover offers; and **Arista Networks** (United States: Information Technology), sales of whose networking equipment were boosted by a wave of investment in artificial intelligence (AI).

Portfolio Changes

Significant new purchases included: **Mahindra & Mahindra** (India: Consumer Discretionary), India's dominant tractor business and a leading manufacturer of electric vehicles; **Brown & Brown** (United States: Financials), an insurance broker helping its customers to manage a range of risks; and **Nexans** (France: Industrials), whose cables and cabling solutions are helping to build the power grids needed for the energy transition.

The Fund sold its positions in: **Roche** (Switzerland: Health Care), in recognition of the uncertainty caused by President Trump's proposals to radically overhaul drug pricing and to impose higher tariffs on imported drugs; **Zebra Technologies** (United States: Information Technology), due to concerns over its future growth; and **Texas Instruments** (United States: Information Technology), due to the potential for global trade tensions to hurt the semiconductor industry.

Outlook

Rising trade tensions and potential barriers to technology exports mean that many companies could face a different set of opportunities – and risks – in the coming decades. Amid this uncertainty, the Fund maintains a long-term investment horizon and focuses on investing in companies led by high-quality management teams whose products or services contribute to sustainable development.

Total tax charge for the year (note 5a)	614	596

*As an authorised OEIC, these items are not subject to corporation tax.

OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £7,876,688 (31/07/24: £7,418,739); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

The average portfolio dealing spread at the Balance Sheet date was 0.09% (31/07/24: 0.10%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk**General**

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £57,451,000 (31/07/24: £84,823,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.18% (31/07/24: 0.26%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

as at 31 July 2025

13. Risk (continued)**(c) Analysis of the Fund's currency exposure**

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets	Net foreign currency assets
	31 July 2025	31 July 2024
	Total	Total
	£'000	£'000

Taiwan dollar	8,494	15,187
US dollar	111,204	144,684
Total	<u>254,482</u>	<u>373,804</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £12,724,000 (31/07/24: £18,690,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £150,831 (31/07/24: £221,992) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

FNZ (UK) Nominees Limited and Clearstream Banking S.A. held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 12.4% and 10.9%, respectively (31/07/24: Electricity Pensions Trustee Limited and FNZ (UK) Nominees Limited held 13.3% and 10.6%, respectively).

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

First Sentier Global Listed Infrastructure Fund

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve an investment return from income and capital growth over the medium to long-term (at least three years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests in a diversified portfolio of equity securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes operating assets from the transport, utilities, energy and communications sectors.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- During the year, the rating of all share classes changed from 6 to 5 to reflect sustained changes in the fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

The Fund might also experience the following risks:

Single-sector risk: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws.

Emerging Market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Industry or sector risk: Where a Fund invests primarily in fast growing economies or limited or specialist sectors, it may be subject to greater risk and above average market volatility than an investment in a broader range of securities covering different economic sectors. Technology and technology-related industries may be subject to greater government regulation than many other industries. Accordingly, changes in governmental policies and the need for regulatory approvals may have an adverse effect on these industries. Additionally, companies in those industries will be subject to the inherent risks of developing technologies, competitive pressures and other factors particularly affecting the technology sector and are dependent upon consumer and business acceptance as new technologies evolve.

Where a Fund invests in specialist sectors such as the agricultural sector, it may also be subject to greater risk from changing supply and demand relationships, adverse weather, natural disasters, livestock diseases, governmental policies and trade regimes, as well as international economic and political developments. As a result, the value of such Fund may be subject to adverse and sudden changes.

Charges against capital risk: Fees and expenses are charged against the capital of certain Funds. Deducting expenses from capital reduces the potential for capital growth and on any redemption Shareholders may not receive back the full amount invested.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 9.3% in sterling terms over the 12 months and has provided cumulative returns of 9.9% and 41.9% over three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

The largest positive contributor to Fund performance was **Cheniere Energy** (US: Energy Midstream), which performed strongly on the view that the Trump administration would promote a pro-growth, pro-energy agenda. **American Electric Power** (US: Utilities / Renewables) gained after announcing better-than-expected June 2025 quarter earnings and raising its full year earnings guidance.

Holdings in **NextEra Energy** (US: Utilities / Renewables) and **AES** (US: Utilities / Renewables) underperformed on investor concerns that policy support for renewables in the US may weaken under the Trump administration.

Portfolio Changes

The Fund bought **Sempra** (US: Utilities / Renewables) on the view that its share price could benefit from potential catalysts, including planned asset sales. **CSX** (US: Railroads) was added to the portfolio after a challenging period, during which its rail network was affected by hurricanes and port strikes, saw the stock trade down to an appealing discount to peers. The Fund also added **ONEOK** (US: Energy Midstream) on the appeal of its improved geographical diversification and strong management team.

Positions in **Southern** (US: Utilities / Renewables) and **Exelon** (US: Utilities / Renewables) were sold after share price gains reduced mispricing. The Fund also divested a position in **Union Pacific** (US: Railroads), on concerns that the company's intermodal volumes may be vulnerable to tariffs.

Outlook

Financial markets quickly shrugged off the concerns sparked by Trump's "Liberation Day" tariff announcements in early April 2025. However, rising trade costs may still reduce global economic growth rates and push inflation higher. Listed infrastructure would be likely to hold up well in the face of these potential headwinds, owing to its essential service provision, regulated / contracted cash flows and relatively modest valuation multiples.

*The Fund was launched on 8 October 2007.

^Benchmark: FTSE Global Core Infrastructure 50/50 Index.

IA Sector: Infrastructure.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

as at 31 July 2025

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	4,973	5,250
Total taxation (note 5b)	<u>4,973</u>	<u>5,250</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	32,208	40,916
Corporation tax of 20% (2024: 20%)	<u>6,442</u>	<u>8,183</u>
Effects of:		
Double taxation relief - current tax	(48)	–
Irrecoverable overseas tax	4,973	5,250
Movement in unrecognised tax losses	1,819	779
Overseas non-taxable revenue*	(7,490)	(8,189)
Relief on overseas tax expensed	–	(142)
UK dividends*	(723)	(631)
Total tax charge for the year (note 5a)	<u>4,973</u>	<u>5,250</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £20,806,113 (31/07/24: £18,610,201); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Interest payable and similar charges

	31 July 2025 £'000	31 July 2024 £'000
Bank interest	5	2
Total interest payable and similar charges	<u>5</u>	<u>2</u>

7. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.09% (31/07/24: 0.11%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £238,887,000 (31/07/24: £264,648,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 1.63% (31/07/24: 0.46%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

Notes to the Financial Statements

as at 31 July 2025

13. Risk (continued)

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets	
	31 July 2025	31 July 2024
	Total	Total
	£'000	£'000
Australian dollar	76,078	116,052
Brazilian real	35,053	29,992
Canadian dollar	23,174	17,509
Danish krone	34	5
Euro	113,290	74,140
Hong Kong dollar	46,307	42,748
Japanese yen	28,986	35,475
Mexican peso	46,296	62,373
Swiss franc	32,461	33,143
US dollar	696,785	795,618
Total	1,098,464	1,207,055

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £54,923,000 (31/07/24: £60,353,000).

(d) Derivative risk

The Manager may enter into derivatives transactions for investment purposes and for efficient portfolio management purposes. A relatively small market movement may have a potentially larger impact on derivatives than on the underlying assets and the use of derivatives can therefore increase the volatility of the value of units in the Scheme. However, it is not anticipated that the use of derivatives will have a significant effect on the risk profile of the Scheme.

Exposure to the various markets may be balanced through tactical asset allocation of futures contracts. Tactical asset allocation is a technique that allows the ACD to undertake a switch in the Fund's exposure by the use of derivatives, rather than through the sale and purchase by the Fund of transferable securities.

Due to the use of derivatives, the percentage movements in the value of the Fund will be different from the percentage movements in the markets. At the period end, as the sensitivity analysis or value at risk is not significant, no additional disclosure has been shown.

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £791,504 (31/07/24: £851,551) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

Hargreaves Lansdown Nominees held a material shareholding in the Fund during the year to 31 July 2025 and, at the year end, held 15.3% of the Fund's shares in issue (31/07/24: Hargreaves Lansdown Nominees and FNZ (UK) Nominees Limited held 13.9% and 11.4%, respectively).

15. Share classes

The Fund has ten share classes in issue.

The annual management charge on each share class is as follows:

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 100.00% of the dividend is received as franked investment income.

Final – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

5. Taxation

	31 July 2025 £'000	31 July 2024 £'000
(a) Analysis of charge in year:		
Irrecoverable overseas tax	78	138
Total taxation (note 5b)	<u>78</u>	<u>138</u>
(b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower (2024 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:		
Net revenue before taxation for the year	452	1,036
Corporation tax of 20% (2024: 20%)	<u>90</u>	<u>207</u>
Effects of:		
Irrecoverable overseas tax	78	138
Movement in unrecognised tax losses	11	6
Overseas non-taxable revenue*	(93)	(177)
Relief on overseas tax expensed	(2)	(4)
UK dividends*	(6)	(32)
Total tax charge for the year (note 5a)	<u>78</u>	<u>138</u>

*As an authorised OEIC, these items are not subject to corporation tax. OEICs are exempt from tax on capital gains made in the UK. Therefore, any capital return is not included in the above reconciliation.

(c) Deferred taxation:

There is no provision required for deferred taxation at the Balance Sheet date in the current or previous year.

(d) Factors that may affect future tax charges:

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £46,543 (31/07/24: £32,689); this relates to tax losses. No deferred tax asset was recognised in the current or previous year, as it was considered unlikely the Fund would generate sufficient taxable profits in the future to utilise these amounts.

6. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on the cancellation of shares and comprise:

	31 July 2025 £'000	31 July 2024 £'000
Interim distribution	301	458

The average portfolio dealing spread at the Balance Sheet date was n/a (31/07/24: 0.13%).

11. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

12. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £nil (31/07/24: £6,378,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, £122,000 (31/07/24: £203,000) of the Fund's assets were interest-bearing.

As at 31 July 2025, if interest rates increase or decrease by 2%, with all other variables remaining constant, the resulting change in the net assets attributable to shareholders of the Fund would be an increase or decrease of approximately £2,000 (31 July 2024: £4,000).

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets		Net foreign currency assets	
	31 July 2025		31 July 2024	
	Total	Total	Total	Total
	£'000	£'000	£'000	£'000

US dollar	19	19	16,589	16,589
Total	<u>37</u>	<u>37</u>	<u>23,858</u>	<u>23,858</u>

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £2,000 (31/07/24: £1,193,000).

(d) Leverage

The Fund did not employ significant leverage during the current year or prior year.

13. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £nil (31/07/24: £12,112) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

There were no material shareholders at the year ending 31 July 2025 (31/07/24: FIL Nominee (Shareholdings) Limited, FNZ (UK) Nominees Limited, Pershing Nominees Limited and Digital Custody Nominees Limited held 19.7%, 16.0%, 14.6% and 10.4%, respectively).

14. Share classes

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim - 100.00% of the dividend is received as franked investment income.

Interim - 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim - 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Authorised Fund Manager's Report

for the year ended 31 July 2025

Investment Objective and Policy

The Fund aims to achieve an investment return from income and capital growth over the long-term (at least five years).

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label as it does not have an objective to improve or pursue specific positive environmental or social outcomes through the assets it invests in or its investment activities.

The Fund invests at least 70% of its Net Asset Value in a broad selection of equity or equity-related securities issued by real estate investment trusts or companies that own, develop or manage real property located worldwide and which are listed, traded or dealt in on Regulated Markets worldwide (the "Property Securities").

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities in Property Securities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management ("EPM") purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating 1 does not mean a risk free investment;
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Property securities risk: The Fund invests in the shares of companies that are involved in property (such as real estate investment trusts) rather than in property itself. The value of these investments may fluctuate more than the underlying property assets.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Authorised Fund Manager's Report

(continued)

for the year ended 31 July 2025

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Industry or sector risk: Where a fund invests primarily in fast growing economies or limited or specialist sectors, it may be subject to greater risk and above average market volatility than an investment in a broader range of securities covering different economic sectors. Technology and technology-related industries may be subject to greater government regulation than many other industries. Accordingly, changes in governmental policies and the need for regulatory approvals may have an adverse effect on these industries. Additionally, companies in those industries will be subject to the inherent risks of developing technologies, competitive pressures and other factors particularly affecting the technology sector and are dependent upon consumer and business acceptance as new technologies evolve.

Where a Fund invests in specialist sectors such as the agricultural sector, it may also be subject to greater risk from changing supply and demand relationships, adverse weather, natural disasters, livestock diseases, governmental policies and trade regimes, as well as international economic and political developments. As a result, the value of such Fund may be subject to adverse and sudden changes.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Performance

The Fund decreased by 1.9% in sterling terms over the 12 months and has provided cumulative returns of -11.1% and 10.6% over three and five years respectively to 31 July 2025 (net of fees and tax for the B Accumulation (GBP) share class).

Portfolio Changes

The Fund repositioned its US seniors housing exposure in the period by introducing **Welltower** which was partially funded via the sell down of **Ventas**. Conviction in senior housing exposure remains high notwithstanding the recent solid stock performance. The Fund also initiated positions in **LondonMetric Property**, the largest UK listed triple-net REIT, as well as in **Goodman Group**, Australia's largest industrial developer that is expanding rapidly into the global datacentre sector. The Fund increased its position in **Simon Property** during the period, a US based global class A shopping mall owner and operator.

The Fund exited its Southern California logistics **REIT Rexford Industrial Realty** position as markets became more concerned with muted leasing activity and lower absorption rates. The Fund repositioned its US self-storage REIT holdings by introducing the newly listed **Smartstop Self Storage** to the portfolio, funded by the exit of **Extra Space Storage**.

Outlook

In an environment where interest rates in many markets are falling, REITs are well-positioned to take advantage of an improved cost of capital to explore external growth opportunities by acquiring undervalued private and public assets.

Furthermore, strong structural trends such as demographics and aging populations, falling home ownership rates, the growth in data consumption and e-commerce adoption should continue to drive performance into the future.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Average portfolio dealing spread

The average portfolio dealing spread at the Balance Sheet date was 0.09% (31/07/24: 0.12%).

12. Contingent liabilities and commitments

As at 31 July 2025, the Fund had no contingent liabilities (31/07/24: £nil) and no commitments (31/07/24: £nil).

13. Risk

General

The general risks relating to the Fund are disclosed fully in note 2 of the Summary of Significant Accounting Policies Applicable to All Funds on pages 20 and 21.

In pursuing its investment objectives, the Fund holds equity shares.

(a) Market price risk

If market prices increase or decrease by 20%, then the impact on the portfolio will be an increase or decrease of approximately £20,100,000 (31/07/24: £32,832,000).

(b) Interest-rate risk

The Fund does not invest in either fixed or floating rate securities, and interest-rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions that will be affected by fluctuations in interest rates.

As at 31 July 2025, 0.53% (31/07/24: 0.21%) of the Fund's assets were interest-bearing.

As exposure to interest-rate risk is not significant, no additional numerical or sensitivity analysis is presented.

13. Risk (continued)

(c) Analysis of the Fund's currency exposure

The following summarises the sterling value of currencies of the Fund in which the investments, including cash, debtors and creditors, are denominated.

As at 31 July 2025, the Fund had the following net currency exposure (excluding sterling):

Currency	Net foreign currency assets	Net foreign currency assets
	31 July 2025	31 July 2024
	Total	Total
	£'000	£'000
Australian dollar	11,789	6,769
Canadian dollar	2	2
Euro	9,221	17,770
Hong Kong dollar	1,282	3,650
Japanese yen	7,763	13,446
Norwegian krone	3	3
Singapore dollar	7	7
Swedish krona	3	13
US dollar	62,132	107,601
Total	92,202	149,261

If Sterling to foreign exchange rates increase or decrease by 5%, then the impact on the NAV will be an increase or decrease of approximately £4,610,000 (31/07/24: £7,463,000).

(d) Derivative risk

The Manager may enter into derivatives transactions for investment purposes and for efficient portfolio management purposes. A relatively small market movement may have a potentially larger impact on derivatives than on the underlying assets and the use of derivatives can therefore increase the volatility of the value of units in the Scheme. However, it is not anticipated that the use of derivatives will have a significant effect on the risk profile of the Scheme.

Exposure to the various markets may be balanced through tactical asset allocation of futures contracts. Tactical asset allocation is a technique that allows the ACD to undertake a switch in the Fund's exposure by the use of derivatives, rather than through the sale and purchase by the Fund of transferable securities.

Due to the use of derivatives, the percentage movements in the value of the Fund will be different from the percentage movements in the markets. At the period end, as the sensitivity analysis or value at risk is not significant, no additional disclosure has been shown.

(e) Efficient portfolio management

14. Related parties

First Sentier Investors (UK) Funds Limited ("the ACD") is a related party to the Fund as defined by FRS 102 Section 33 'Related Party Disclosures'. By virtue of the regulations governing open-ended investment companies, the ACD is party to every transaction in respect of shares of the Fund, as summarised in the 'Statement of Change in Net Assets Attributable to Shareholders'. Amounts due at the year end in respect of creations and cancellations are included in the Balance Sheet.

Amounts paid to First Sentier Investors (UK) Funds Limited in respect of annual management charges are disclosed in note 4, with £68,681 (31/07/24: £108,607) due at the year end.

During the year, the Fund executed trades through Morgan Stanley, as a related party, for which they were paid a commission. The commission amounts paid were not considered material and therefore no numerical value is disclosed.

Material Shareholders

FIL Nominee (Shareholdings) Limited held material shareholdings in the Fund during the year to 31 July 2025 and, at the year end, held 14.4% (31/07/24: FNZ (UK) Nominees Limited, FIL Nominee (Shareholdings) and Transact Nominees Limited held 15.5%, 15.2% and 11.7%, respectively).

15. Share classes

The Fund has nine share classes in issue.

The annual management charge on each share class is as follows:

	31 July 2025	31 July 2024	31 July 2023
	%	%	%
Share class A Accumulation (GBP)	1.50	1.50	1.50

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 16.36% of the dividend is received as franked investment income.

Interim – 17.45% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 66.19% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Final – 35.06% of the dividend is received as franked investment income.

Final – 18.33% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Final – 46.61% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.
