*Collectively, these items, along with the investment reviews disclosed within the individual Fund reports, comprise the Authorised Corporate Director's Report for the purposes of the rules contained in the Financial Conduct Authority's Collective Investment Schemes Sourcebook.

Authorised Corporate Director's Report

We are pleased to present the Interim Report for First Sentier Investors ICVC (the "Company"), which provides information on each of the 19 sub-funds of the Company (each a "Fund") for the period ended 31 January 2026.

In this document we provide detailed information on each of the Funds. This information includes an investment report, performance summary, top 10 holdings, country breakdowns, and financial statements for each Fund.

First Sentier Investors (UK) Funds Limited (the "ACD") is part of First Sentier Group, a member of the global financial group Mitsubishi UFJ Financial Group ('MUFG').

Please note there have been the following developments occurring during the period:

- On 30 September 2025 the Stewart Investors European (ex UK) All Cap Fund closed.
- On 12 November 2025 the First Sentier Investor Group announced a strategic transition of Stewart Investors' investment management responsibilities to FSSA Investment Managers, excluding Worldwide strategies, as at close of business Friday 14 November 2025.

Please note the following developments occurring after the period end:

- On 26 March 2026 the ACD notified investors that, subject to approval from the Financial Conduct Authority, the Stewart Investors Worldwide Leaders Fund is due to close on 2 June 2026.
- On 26 March 2026 the ACD notified investors of a proposal to repurpose the strategy of the Stewart Investors Worldwide All Cap Fund. The EGM to enable investors to vote on the next steps for this Fund is due to be held on 29 April 2026.

We hope that you find this report informative and that it answers any questions you may have about your investment with the Company.

If you have any additional queries in relation to your investment, or one of the Funds, please contact our Client Services team on 0800 028 7059 (UK investors only) (+44 (0)1133 604 502 if calling from outside the UK).

Information about the Company

The Company is an Open-Ended Investment Company with variable capital. The Company is structured as an umbrella company currently authorised as a UK UCITS scheme and operates under Chapter 5 of the Collective Investment Schemes Sourcebook ("COLL").

Different Funds may be established from time to time by the ACD, with the approval of the Financial Conduct Authority ("FCA") and the agreement of the Company's Depositary, the Northern Trust Investor Services Limited. Each Fund may issue different classes of share and, within each class, there may be different types of share. On the introduction of any new Fund or class or type of share, a revised Prospectus will be prepared setting out the relevant details of each Fund or class.

Each Fund is invested as if it were individually authorised as the type of scheme known as a UK UCITS scheme, as specified in the Sourcebook. For investment purposes, the assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. The shareholders are not liable for the debts of the Company.

Changes to the Prospectus since 1 August 2025

Inclusions or amendments in the Company's Prospectus dated 26 November 2025:

- Annual update to Anti-Dilution Adjustment Data/figures for all relevant sub-funds;
- Annual update to Directors' biographies;
- Update to naming of First Sentier Investors to First Sentier Group throughout, following the rebrand announced on 31 July 2025;
- Update to the wording to provide flexibility for investor notices to be sent by email;
- Update to non-label SDR disclosures and references to ESG for the First Sentier Global Property Securities Fund;
- Update to the Positive Social Outcomes / "Human Development Pillars" for the Stewart Investors Funds;
- Update to the Stewart Investors European (ex UK) All Cap Fund to note it is in the process of termination;
- Amendment to the underlying Depositary fees for First Sentier Global Listed Infrastructure Fund;
- Addition of Class Z SGD to the First Sentier Global Listed Infrastructure Fund, AMC 0.00%.

The Investment Manager

As at the period end, First Sentier Investors (UK) IM Limited, the investment manager of the Company (the "Investment Manager"), has delegated the investment management of certain Funds as set-out in the following table:

	Delegated to First Sentier Investors (HK) Limited	Delegated to First Sentier Investors Singapore	Delegated to First Sentier Investors (Australia) IM Limited

Cross Holdings

There were no cross holdings between Funds as at 31 January 2026.

Task Force on Climate-related Financial Disclosures (TCFD)

In line with the requirements set out in chapter 2, 4 and 5 of the Environmental, Social and Governance sourcebook ("ESG Sourcebook") of the FCA Handbook, public Sustainability Product reports published by FSI (UK) Funds Limited can be found via the link below on the FSI website.

<https://www.firstsentierinvestors.com/uk/en/private/responsible-investing/regulatory-disclosures.html>

Statement of the Authorised Corporate Director's Responsibilities in Respect of the Financial Statements of the Company

The Authorised Corporate Director ("ACD") of First Sentier Investors ICVC is responsible for preparing the Interim Report and financial statements in accordance with the Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the Financial Conduct Services Authority's Collective Investment Schemes Sourcebook ("COLL") and the Company's Instrument of Incorporation.

The OEIC Regulations and COLL require the ACD to prepare financial statements for each interim accounting period which:

- are in accordance with United Kingdom Generally Accepted Accounting Practice ("United Kingdom Accounting Standards"), including FRS 102 "The Financial Reporting Standards Applicable in the UK and Republic of Ireland" and the Statement of Recommended Practice: "Financial Statements of Authorised Funds" issued by the Investment Association ("SORP") in May 2014 as amended in June 2017; and
- give a true and fair view of the financial position of the Company and each of its sub-funds as at the end of that period and the net revenue and the net capital gains or losses on the property of the Company and each of its sub-funds for that period.

In preparing the financial statements, the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards and the SORP have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the applicable SORP and United Kingdom Accounting Standards and applicable law. The ACD is also responsible for the system of internal controls, for safeguarding the assets of the Company and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In accordance with COLL 4.5.8BR, the Interim Report and the unaudited financial statements were approved by the board of directors of the ACD and authorised for issue on 24 March 2026.

Summary of Significant Accounting Policies Applicable to All Funds

as at 31 January 2026 (unaudited)

1. Accounting policies

Basis of accounting

The Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with FRS 102 'The Financial Reporting Standards Applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014 (updated in June 2017), and United Kingdom Generally Accepted Accounting Practice.

As described in the Statement of the ACD's responsibilities in respect of the Financial Statements of the Company on page 5, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the Funds for at least 12 months from the date of approval of the financial statements, with the exception of: FSSA Asia All-Cap Fund and FSSA Japan Focus Fund which both closed on 1 November 2024; First Sentier Responsible Listed Infrastructure Fund, which closed on 20 May 2025; Stewart Investors European (ex UK) All Cap Fund, which closed on 30 September 2025; and Stewart Investors Worldwide Leaders Fund, which has received ACD approval for closure. These Funds are due to terminate once the residual assets and liabilities are settled. In applying this basis of preparation, the assets and liabilities of the Funds continue to be stated at their fair values. No adjustments were necessary in the financial statements to reduce assets to their realisable values or provide for liabilities arising and to reclassify long-term liabilities as current liabilities.

The ACD confirms that no significant accounting judgements or estimates have been applied to the financial statements and therefore there is not a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

2. Other matters

High Court Claim

The European Court of Justice has held that the UK tax regime in respect of income from portfolio investments contravened the EU right to free movement of capital. Until 2009, income from portfolio investments in the UK was exempt from corporation tax, whilst dividend income from foreign portfolio investments was taxable with limited relief for foreign tax paid. The Company has made claims against HMRC for repayment of tax paid on dividend income from foreign portfolio investments in these circumstances. The claims form part of the CFC and Dividend Group Litigation, in which there are various test cases, including the Prudential dividend test case, in which a Supreme Court judgement was delivered on 25 July 2018. Some Funds in the Company received partial recovery from HMRC under this litigation which was reflected in those Funds' financial statements as of 31 July 2020. The balance of the claims were continued against HMRC. However, on 23 June 2025, the UK Supreme Court refused an application to appeal against an adverse Court of Appeal ruling in relation to that balance. Legal counsel for the Company is working to conclude any continuing recovery options for the relevant Funds. Any value of these ongoing claims has not been recognised in the Financial Statements as the timing and amount of any benefit is uncertain.

FSSA All China Fund

Authorised Fund Manager's Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a portfolio of equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China that are listed, traded or dealt in on Regulated Markets worldwide.

The Fund has no set target for the number of companies it will invest in, but the Manager anticipates that typically the Fund will invest in around 40 - 60 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

← **Lower Risk** **Higher Risk** →
 Potentially Lower Rewards Potentially Higher Rewards

Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class E Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- During the period, the rating of Share class B Accumulation (USD) changed from 7 to 6 to reflect sustained changes in the Fund's market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 6 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

FSSA All China Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 3.7% in sterling terms over the six months and has provided a cumulative return of -13.7% and -26.4% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **ACM Research**, which designs and manufactures high-specification wet-cleaning tools used in high-end chipmaking. It has seen strong domestic and overseas demand for its products amid surging artificial intelligence (AI) capital expenditure. **Luxshare Precision Industry** also rose after announcing robust earnings results, driven in part by better-than-expected iPhone demand. A leading electronics contract manufacturer, Luxshare counts Apple as its largest client.

On the negative side, **Meituan** fell after its earnings results disappointed. The company is facing intense competition in food delivery from Alibaba and JD.com, but retains key competitive advantages, with better unit economics than its peers. **Shenzhen Mindray Bio-Medical Electronics** also declined as the government's centralised procurement policies for medical equipment put pressure on its pricing.

Portfolio Changes

The Fund bought **Sany Heavy Industry**, a construction equipment manufacturer with dominant positions in excavators, concrete machinery and cranes. The Fund also bought **Foshan Haitian Flavouring & Food**, China's largest condiment producer, with a 20% share in soy sauce. The company's efforts to reorganise its business structures and incentive plans have helped it return to earnings growth after a period of poor performance.

The Fund sold **Sino Biopharmaceutical** on strength to raise cash for other ideas.

Outlook

After a challenging few years, pockets of healthy demand are emerging in certain domestically focused sectors in China. The government is continuing its efforts to support consumption. Chinese companies are becoming increasingly competitive on the global stage.

However, while recent US-China trade negotiations have been positive, geopolitical tensions persist. The enthusiasm for technology stocks is largely being driven by significant spending on data centres and other AI-related infrastructure; the Investment Manager is unsure about the sustainability of such spending.

The Fund is invested for the long term, and is aligned with the structural trends shaping China's economy: innovation, sustainability, and increasing shareholder returns. Its holdings in market-leading businesses should remain resilient in different scenarios.

FSSA All China Fund

Authorised Fund Manager's Report

Discrete performance as at 31 January 2026

Time period	12 mths to 31/01/26	12 mths to 31/01/25	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22
Fund return %	12.4	26.1	(39.1)	2.0	(16.3)
Benchmark^ return %	21.9	32.0	(30.6)	(2.3)	(20.6)

*The Fund was launched on 24 November 2017.

^Benchmark: MSCI China All Shares Net Index.

IA Sector: China / Greater China.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Asia Focus Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

← Lower Risk
Higher Risk →
 Potentially Lower Rewards Potentially Higher Rewards

Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (EUR)	1	2	3	4	5	6	7
Share class B Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund (except for Share class B Accumulation (USD) which has a rating of 6), has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund’s investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country / specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

FSSA Asia Focus Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 10.3% in sterling terms over the six months and has provided cumulative returns of 14.0% and 16.1% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing**, which continued to see solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure. **H World** also rose after reporting strong earnings results. Revenue per available room (RevPAR) has turned positive, supported by steady leisure travel demand in China. On the negative side, **Shenzhen Mindray Bio-Medical Electronics** fell. The company faces headwinds in its domestic market, including the government's centralised procurement policies for medical equipment, which have put pressure on its pricing. **CSL** also fell due to unexpectedly weak revenue growth from its Behring division, which focuses on plasma-derived therapies.

Portfolio Changes

New purchases over the period included **Full Truck Alliance (FTA)**, a leading digital freight platform in China with strong competitive advantages and potential for long-term growth. FTA should continue to strengthen with scale, as shippers move more of their business on to the platform, driven by cheaper prices, which then drives more truckers to the platform.

The Fund also bought **Hongfa Technology**, the largest relay maker in the world with 21% global market share and decent growth prospects. Its product portfolio covers traditional applications such as home appliances and power meters, as well as growth opportunities in new areas like electric vehicles (EVs), solar, wind and 5G communications.

Axis Bank and **Keyence** were sold to consolidate the portfolio into higher conviction ideas.

Outlook

The outlook for Asian equities looks reasonably bright. With a rising share of global growth, Asia should benefit from higher value services, digital transformation and the ongoing financialisation across the region. Valuations also look attractive in comparison to developed markets like the US, while low ownership of Asian equities in global portfolios provides a good backdrop for absolute returns. The Fund's holdings are characterised by strong competitive advantages, and they have historically managed to preserve margins and profitability through the cycles. This should translate into attractive returns in the long run, as the market broadens, over time, from its narrow focus on AI.

*The Fund was launched on 24 August 2015.

[^]Benchmark: MSCI AC Asia Pacific ex Japan Net Index.

IA Sector: Asia Pacific Excluding Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Greater China Growth Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in equity or equity-related securities issued by companies established or having a majority of their economic activities in the People’s Republic of China, Hong Kong and Taiwan which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

← **Lower Risk** → **Higher Risk** →
 Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Accumulation (EUR)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- We cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating 1 does not mean a risk free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund’s investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund’s capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company’s Prospectus.

FSSA Greater China Growth Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Performance

The Fund rose by 7.7% in sterling terms over the six months and has provided a cumulative return of -0.8% and -6.5% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing**, which continued to see solid revenue growth, with strong demand for its leading-edge chips amid surging Artificial Intelligence (AI) capital expenditure. **Tencent** also rose. The company has delivered impressive results across business segments, with particularly strong growth momentum in online games and advertising revenue, as it incorporates AI technology to improve return on investment.

On the negative side, **Shenzhen Mindray Bio Medical Electronics** fell. The company faces headwinds in its domestic market, including the government's centralised procurement policies for medical equipment, which have put pressure on its pricing. **Meituan** also declined after its earnings results disappointed. The company is facing intense competition in food delivery from Alibaba and JD.com.

Portfolio Changes

The Fund bought **Sany Heavy Industry**, a construction equipment manufacturer with dominant positions in excavators, concrete machinery and cranes. The Fund also bought **Kweichow Moutai**, China's leading baijiu company, which boasts an iconic brand and formidable pricing power. Its unique production methods constrain supply, which ensures its scarcity value and reinforces its status as a luxury good.

The Fund sold **JD.com** on concerns over the company's strategy, as it continues to aggressively undertake new initiatives that lack obvious synergies with its core business. The Fund also sold **Advantech** to consolidate the portfolio into higher conviction ideas.

Outlook

After a challenging few years, pockets of healthy demand are emerging in certain domestically focused sectors in China. The government is continuing its efforts to support consumption. Chinese companies are becoming increasingly competitive on the global stage.

However, while recent US-China trade negotiations have been positive, geopolitical tensions persist. The enthusiasm for technology stocks is largely being driven by significant spending on data centres and other AI-related infrastructure; the Investment Manager is unsure about the sustainability of such spending.

The Fund is invested for the long term and is aligned with the structural trends shaping China's economy: innovation, sustainability, and increasing shareholder returns. Its holdings in market-leading businesses should remain resilient in different scenarios.

Cumulative performance as at 31 January 2026

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Indian Subcontinent All-Cap Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities issued by companies that are established, operating or have their economic activity mainly in the Indian subcontinent, and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Indian subcontinent.

The Fund will invest across all market capitalisations.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

At times, the Fund’s portfolio may be concentrated in a small number of holdings.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 12.7% in sterling terms over the six months and has provided cumulative returns of 17.8% and 46.8% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Mahindra & Mahindra**, which rose as its automotive and farm-machinery businesses benefited from Goods & Services Tax (GST) cuts, which improved affordability and boosted demand for its sport utility vehicles (SUVs) and tractors. Auto maker **Maruti Suzuki India** also posted robust earnings results thanks to strong passenger-vehicle demand. On the negative side, **Whirlpool of India*** declined after its parent company announced a further stake sale to pare its own debt. **Rallis India** fell as flooding in multiple Indian states affected its crop protection business.

*No longer owned in the portfolio.

Portfolio Changes

New purchases in the period included **State Bank of India (SBI)**. SBI has further strengthened its leadership in the Indian banking system. For the quality of the franchise, as well as its conservatively managed balance sheet and improving growth outlook, the Investment Manager finds it to be attractively valued.

The Fund also bought **Meesho**, India's largest value-focused e-commerce company, at its recent initial public offering (IPO). The platform has become the clear leader in its category. The management team is focused on reaching their end-goal of expanding retail penetration while remaining flexible on the path to achieve it; and the platform has received strong customer acceptance with over 200 million annual transacting users.

The Fund sold **Godrej Consumer Products** on expensive valuations and divested **Crompton Greaves Consumer Electricals** to switch the proceeds into SBI.

Outlook

India, unlike other emerging markets that are heavily reliant on exports, is largely driven by domestic consumption and investment. This demand base provides a cushion against external shocks and trade disruptions, making India relatively resilient in times of global uncertainty. In addition, India's growth is being underpinned by growing levels of urbanisation, favourable demographics, rising middle-class consumption and a strong digital infrastructure push. While certain parts of the Indian equity market look expensively valued, there are still good opportunities for active managers to add value. The Fund has invested in companies at the forefront of this transformation, which should make it well positioned to benefit from these structural tailwinds for years to come.

*The Fund was launched on 8 June 2018.

^Benchmark: MSCI India Net Index.

IA Sector: India.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Asia Pacific and Japan All Cap Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (including Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

← **Lower Risk** **Higher Risk** →
 Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Income (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Income (GBP)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Stewart Investors Asia Pacific and Japan All Cap Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund fell by 2.1% in sterling terms over the six months and has provided cumulative returns of -2.1% and 7.0% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing**, which continued to see solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure. **Samsung Electronics** also rose, with signs of a turnaround in its foundry business. Its legacy memory business also remains strong. On the negative side, **Voltronic Power Technology** fell. As well as tariff uncertainty, which has affected its uninterruptible power supply (UPS) sales to the US, the company saw weak demand and rising competition in its inverter business. **Philippine Seven** also declined. Several challenges affected the company's earnings, including bad weather, the government's crackdown on Philippine offshore gaming operators (POGOs) and increasing competition from hard discounters in Metro Manila.

Portfolio Changes

New purchases over the period included **Kotak Mahindra Bank**, one of India's leading financial services companies, after valuations became more attractive. The bank has consistently improved the strength of its deposits business and maintained better asset quality than its peers across the business cycle.

The Fund also bought **Tencent**, the largest social media network and online gaming company in China, with growing businesses in online advertising, cloud services, e-payments/e-commerce and overseas gaming.

The Fund sold **Milkyway Intelligent Supply Chain Service** on concerns about leverage and poor cash generation, and **Motilal Oswal Financial Services** due to the Investment Manager's higher conviction in other Indian financial companies.

Outlook

The outlook for Asian equities looks reasonably bright. With a rising share of global growth, Asia should benefit from higher value services, digital transformation and the ongoing financialisation across the region. Valuations also look attractive in comparison to developed markets like the US, while low ownership of Asian equities in global portfolios provides a good backdrop for absolute returns. The Fund's holdings are characterised by strong competitive advantages, and they have historically managed to preserve margins and profitability through the cycles. This should translate into attractive returns in the long run, as the market broadens, over time, from its narrow focus on AI.

Cumulative performance as at 31 January 2026

Time period	12 mths to 31/01/26	12 mths to 31/01/25	12 mths to 31/01/24	12 mths to 31/01/23	12 mths to 31/01/22
Fund return %	(5.9)	7.9	(3.5)	6.5	2.6
Benchmark [^] return %	22.9	15.8	(1.8)	1.7	(5.4)

*The Fund was launched on 6 February 2001.

[^]Benchmark: MSCI AC Asia Pacific Net Index.

IA Sector: Asia Pacific Including Japan.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Group 1 Interim	(p) 0.3131	(p) –	(p) 0.3131	(p) 3.2864
Group 2 Interim	(p) –	(p) 0.3131	(p) 0.3131	(p) 3.2864

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Asia Pacific Leaders Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The word “Leaders” in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund’s first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager’s opinion, this presents an opportunity to add to the position.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Although the Fund’s investment policy excludes Japan, it may hold companies that are listed on the Japanese Stock Market, where a majority of their economic activities are in the Asia Pacific region (excluding Japan).

Risks and reward profile

← Lower Risk Higher Risk →
Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Income (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Income (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (USD)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Stewart Investors Asia Pacific Leaders Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Risks and reward profile (continued)

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 10.1% in sterling terms over the six months and has provided cumulative returns of 13.9% and 18.7% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing**, which continued to see solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure. **Samsung Electronics** also rose, with signs of a turnaround in its foundry business. Its legacy memory business also remains strong. On the negative side, **Sea** declined on concerns about margins, given its marketing tactics and promotional spending. **Shenzhen Mindray Bio-Medical Electronics** also fell. The company faces headwinds in its domestic market, including the government's centralised procurement policies for medical equipment, which have put pressure on its pricing.

Portfolio Changes

New purchases over the period included **Realtek Semiconductor**, an integrated circuits (IC) design company based in Taiwan which focuses on connectivity solutions such as WiFi, Ethernet and Bluetooth.

The Fund also bought **Tencent**, the largest social media network and online gaming company in China, with growing businesses in online advertising, cloud services, e-payments/e-commerce and overseas gaming.

The Fund sold **SF Holding** and **Tech Mahindra** to raise cash for better ideas elsewhere.

Outlook

The outlook for Asian equities looks reasonably bright. With a rising share of global growth, Asia should benefit from higher value services, digital transformation and the ongoing financialisation across the region. Valuations also look attractive in comparison to developed markets like the US, while low ownership of Asian equities in global portfolios provides a good backdrop for absolute returns. The Fund's holdings are characterised by strong competitive advantages, and they have historically managed to preserve margins and profitability through the cycles. This should translate into attractive returns in the long run, as the market broadens, over time, from its narrow focus on AI.

Cumulative performance as at 31 January 2026

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch*

Distribution Tables

(continued)

for the period ended 31 January 2026 (unaudited)

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Asia Pacific All Cap Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Although the Fund’s investment policy excludes Japan, it may hold companies that are listed on the Japanese Stock Market, where a majority of their economic activities are in the Asia Pacific region (excluding Japan).

Risks and reward profile

← Lower Risk
Higher Risk →
 Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Accumulation (EUR)	1	2	3	4	5	6	7
Share class B Accumulation (EUR)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Stewart Investors Asia Pacific All Cap Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 7.4% in sterling terms over the six months and has provided cumulative returns of 8.2% and 20.2% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Taiwan Semiconductor Manufacturing**, which continued to see solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure. **Samsung Electronics** also rose, with signs of a turnaround in its foundry business. Its legacy memory business also remains strong. On the negative side, **Tube Investments of India** fell after reporting sluggish business performance and rising competition in the electric vehicle (EV) space. **Sea** also declined on concerns about margins, given its marketing tactics and promotional spending.

Portfolio Changes

New purchases over the period included **Kotak Mahindra Bank**, one of India's leading financial services companies, after valuations became more attractive. The bank has consistently improved the strength of its deposits business and maintained better asset quality than its peers across the business cycle.

The Fund also bought **Tencent**, the largest social media network and online gaming company in China, with growing businesses in online advertising, cloud services, e-payments/e-commerce and overseas gaming.

The Fund sold **Samsung Biologics** on concerns about rich valuations and its large market capitalisation, and **Motilal Oswal Financial Services** due to the Investment Manager's higher conviction in other Indian financial companies.

Outlook

The outlook for Asian equities looks reasonably bright. With a rising share of global growth, Asia should benefit from higher value services, digital transformation and the ongoing financialisation across the region. Valuations also look attractive in comparison to developed markets like the US, while low ownership of Asian equities in global portfolios provides a good backdrop for absolute returns. The Fund's holdings are characterised by strong competitive advantages, and they have historically managed to preserve margins and profitability through the cycles. This should translate into attractive returns in the long run, as the market broadens, over time, from its narrow focus on AI.

*The Fund was launched on 19 December 2005.

^Benchmark: MSCI AC Asia Pacific ex Japan Net Index.

IA Sector: Specialist.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

for the period ended 31 January 2026 (unaudited)

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Indian Subcontinent All Cap Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Indian subcontinent and which are listed, traded or dealt in on Regulated Markets worldwide.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Stewart Investors Indian Subcontinent All Cap Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund declined by 15.4% in sterling terms over the six months and has provided cumulative returns of -1.4% and 32.9% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Mahindra & Mahindra**, which rose as its automotive and farm-machinery businesses benefited from Goods & Services Tax (GST) cuts, which improved affordability and boosted demand for its sport utility vehicles (SUVs) and tractors. **CarTrade Tech** also rose on solid earnings results, with strong consolidated revenue growth and margin improvement across segments. On the negative side, **Tube Investments of India** fell after reporting sluggish business performance and rising competition in the electric vehicle (EV) space. **Bajaj Holdings & Investment*** also declined due to concerns about its subsidiary business.

*No longer owned in the portfolio.

Portfolio Changes

New purchases over the period included **Kotak Mahindra Bank**, one of India's leading financial services companies, after valuations became more attractive. The bank has consistently improved the strength of its deposits business and maintained better asset quality than its peers across the business cycle.

The Fund also bought **KEI Industries**, a leading cables and wires company. The company started as an institutional / tender business and has evolved into a diversified retail enterprise. The track record of growth and returns on capital employed has been solid, and now it is focusing on the next stage of growth in high-voltage cables and exports.

The Fund sold **Motilal Oswal Financial Services** due to the Investment Manager's higher conviction in other Indian financial companies, and **KPIT Technologies** due to its expensive valuations.

Outlook

India, unlike other emerging markets that are heavily reliant on exports, is largely driven by domestic consumption and investment. This demand base provides a cushion against external shocks and trade disruptions, making India relatively resilient in times of global uncertainty. In addition, India's growth is being underpinned by growing levels of urbanisation, favourable demographics, rising middle-class consumption and a strong digital infrastructure push. While certain parts of the Indian equity market look expensively valued, there are still good opportunities for active managers to add value. The Fund has invested in companies at the forefront of this transformation, which should make it well positioned to benefit from these structural tailwinds for years to come.

Cumulative performance as at 31 January 2026

Benchmark [^] return %	(8.6)	7.3	23.3	(1.3)	30.5

*The Fund was launched on 9 November 2012.

[^]Benchmark: MSCI India Net Index.

IA Sector: India.

There was a change from IA Sector: Specialist to IA Sector: India. The IA India Sector was split out of the IA Specialist Sector as of 13 September 2021 to create a new IA India Sector, the Fund joined the new IA India Sector at the same time.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

FSSA Global Emerging Markets Focus Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies in Emerging Markets, which are listed, traded or dealt in on Regulated Markets worldwide, and in those of companies listed on developed market exchanges a majority of whose economic activities take place in Emerging Markets.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- During the period, the rating of Share class B Accumulation (GBP) and Share class E Accumulation (GBP) changed from 6 to 5 to reflect sustained changes in the Fund’s market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this Fund (except for Share class B Accumulation (EUR) and Share class Z Accumulation (USD) which have a rating of 6), has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

FSSA Global Emerging Markets Focus Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 10.3% in sterling terms over the six months and has provided a cumulative return of 26.1% and 37.1% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **SK Hynix**. The company posted record profits thanks to surging demand for its high-bandwidth memory chips (a type of ultra-fast chip used in artificial intelligence applications). **Taiwan Semiconductor Manufacturing** rose due to its solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure.

On the negative side, **Silergy** fell after posting disappointing results. The company has seen lacklustre demand for its integrated-circuit products amid US tariff-related uncertainty. **KE** also fell as weakness in China's property sector weighed on sentiment.

Portfolio Changes

The Fund bought **Sea**, the largest e-commerce, fintech and gaming platform in Southeast Asia, with growing businesses in Taiwan and Brazil. The Fund also purchased **Samsung Electronics**, a global leader in DRAM and NAND memory. The company should benefit from the continued strength of demand for these chips – this structural “memory super cycle” is both broader and set to last longer than any past upturn.

The Fund sold **Bank Rakyat Indonesia Persero** and **China Resources Beer** to consolidate the portfolio into higher conviction ideas.

Outlook

The global economy is increasingly being led by emerging markets, a trend expected to accelerate in the future. As concerns grow over the health of the US economy, investors are considering alternatives, as indicated by the strong demand for emerging-market equities in 2025.

Whether it is the development of Chinese cities as hubs for innovation in medical devices, the formalisation of the Indian economy or the continued financialisation of the South African population, there are plenty of investment opportunities in emerging markets. Yet these kinds of businesses are not widely included in major market benchmarks, which is why the Fund focuses on high-quality companies rather than following the crowd.

Benchmark^ return %	29.3	17.6	(6.2)	(4.2)	(5.0)

*The Fund was launched on 1 December 2017.

^Benchmark: MSCI Emerging Markets Net Index.

IA Sector: Global Emerging Markets.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Global Emerging Markets Leaders Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in equity or equity-related securities of large and mid-capitalisation companies that are incorporated or listed in Emerging Markets, or those of companies listed on developed market exchanges where a majority of their activities take place in Emerging Market countries.

The word “Leaders” in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund’s first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager’s opinion, this presents an opportunity to add to the position.

The Fund has no set target for the number of companies it will invest in, but the Manager anticipates that typically the Fund will invest in around 35 - 50 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

← **Lower Risk** **Higher Risk** →
 Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Income (GBP)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level. The SRRI is calculated, monitored, and updated in accordance with applicable regulatory requirements;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and

Stewart Investors Global Emerging Markets Leaders Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- The SRRI information presented in the table is applicable only to active share classes as at the period end.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 7.7% in sterling terms over the six months and has provided a cumulative return of 7.0% and 15.7% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Key contributors to performance included **Samsung Electronics**, the global leader in memory chips, as AI-related infrastructure investment drove a recovery in memory demand. **Taiwan Semiconductor Manufacturing** also rose due to its solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure.

On the negative side, **HDFC Bank** declined as lower benchmark interest rates in India put pressure on the bank's net interest margins. **Bajaj Holdings & Investment** weakened on concerns about its subsidiary business – Bajaj Finance had declined on concerns about rising credit costs and provisions, an early sign of potential stress in its loans book.

Portfolio Changes

The Fund bought **Prosus**, one of the largest technology investors in the world, which has a 25% ownership stake in Tencent, as well as stakes in leading food delivery, classifieds and payment platforms in places such as Brazil, Eastern Europe and India. The Fund also purchased **Credicorp**, a financial group in Peru with a leading position in loans, deposits, microfinance, insurance and wealth management. It holds a nearly 40% share of the current and savings account market.

The Fund sold **Godrej Consumer Products**, whose valuation looked expensive for the expected growth. **Motilal Oswal Financial Services** was sold due to the Investment Manager's higher conviction in other Indian financial companies.

Outlook

The global economy is increasingly being led by emerging markets, a trend expected to accelerate in the future. As concerns grow over the health of the US economy, investors are considering alternatives, as indicated by the strong demand for emerging-market equities in 2025.

Whether it is the development of Chinese cities as hubs for innovation in medical devices, the formalisation of the Indian economy or the continued financialisation of the South African population, there are plenty of investment opportunities in emerging markets. Yet these kinds of businesses are not widely included in major market benchmarks, which is why the Fund focuses on high-quality companies rather than following the crowd.

Distribution Tables

(continued)

for the period ended 31 January 2026 (unaudited)

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Global Emerging Markets All Cap Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long term (at least 5 years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in Emerging Markets and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

← **Lower Risk** → **Higher Risk** →
 Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Accumulation (EUR)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

Stewart Investors Global Emerging Markets All Cap Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

The Fund might also experience the following risks:

Emerging Market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 5.2% in sterling terms over the six months and has provided a cumulative return of 3.5% and -0.1% over three and five years respectively to 31 January 2026 (net of fees and tax for the B GBP Accumulation (GBP) share class).

Key contributors to performance included **Samsung Electronics**, the global leader in memory chips, as AI-related infrastructure investment drove a recovery in memory demand. **Taiwan Semiconductor Manufacturing** also rose due to its solid revenue growth, with strong demand for its leading-edge chips amid surging artificial intelligence (AI) capital expenditure.

On the negative side, **HDFC Bank** declined as lower benchmark interest rates in India put pressure on the bank's net interest margins. **Bajaj Holdings & Investment** weakened on concerns about its subsidiary business – Bajaj Finance had declined on concerns about rising credit costs and provisions, an early sign of potential stress in its loans book.

Portfolio Changes

The Fund bought **Tencent**, the largest social media network and online gaming company in China, with growing businesses in online advertising, cloud services, e-payments/e-commerce and overseas gaming. The Fund also bought **Sea**, the largest e-commerce, financial technology and gaming platform in Southeast Asia, with growing businesses in Taiwan and Brazil.

The Fund sold **Voltronic Power Technology**, on concerns about growth and Chinese competition. **Motilal Oswal Financial Services** was sold due to the Investment Manager's higher conviction in other Indian financial companies.

Outlook

The global economy is increasingly being led by emerging markets, a trend expected to accelerate in the future. As concerns grow over the health of the US economy, investors are considering alternatives, as indicated by the strong demand for emerging-market equities in 2025.

Whether it is the development of Chinese cities as hubs for innovation in medical devices, the formalisation of the Indian economy or the continued financialisation of the South African population, there are plenty of investment opportunities in emerging markets. Yet these kinds of businesses are not widely included in major market benchmarks, which is why the Fund focuses on high-quality companies rather than following the crowd.

*The Fund was launched on 8 April 2009.

^Benchmark: MSCI Emerging Markets Net Index.

IA Sector: IA Global Emerging Markets Sector.

The Fund's IA Sector was amended in the period to provide a better comparison to funds with a similar investment strategy.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Distribution Tables

for the period ended 31 January 2026 (unaudited)

Distribution in pence and cents per share

Group 1 Interim - Shares purchased prior to 1 August 2025

Group 2 Interim - Shares purchased between 1 August 2025 and 31 January 2026

Share class A Accumulation (GBP)

	Net revenue	Equalisation	Distributions payable 31/03/2026	Distributions paid 31/03/2025
Group 1 Interim	(p) –	(p) –	(p) –	(p) 0.5704
Group 2 Interim	(p) –	(p) –	(p) –	(p) 0.5704

This share class is in deficit and therefore not making a distribution.

Share class B Accumulation (GBP)

	Net revenue	Equalisation	Distributions payable 31/03/2026	Distributions paid 31/03/2025
Group 1 Interim	(p) 1.4565	(p) –	(p) 1.4565	(p) 2.2691
Group 2 Interim	(p) 0.8663	(p) 0.5902	(p) 1.4565	(p) 2.2691

Share class A Accumulation (EUR)

	Net revenue	Equalisation	Distributions payable 31/03/2026	Distributions paid 31/03/2025
Group 1 Interim	(c) –	(c) –	(c) –	(c) 0.6817
Group 2 Interim	(c) –	(c) –	(c) –	(c) 0.6817

This share class is in deficit and therefore not making a distribution.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

Stewart Investors Worldwide Leaders Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The word “Leaders” in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund’s first investment. This represents a minimum threshold; the Manager generally targets companies with a free float market capitalization of at least US\$5 billion at the time of the Fund’s first investment. The Manager will only establish an initial position in a company when it is above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager’s opinion, this presents an opportunity to add to the position.

The Fund is not managed to a benchmark and may have exposure to developed or Emerging Markets whilst maintaining its geographical diversity.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

While it is not generally the Manager’s intention to do so, in some circumstances the Manager may use derivatives (investments whose value is linked to another investment, performance of a stock market, interest rate or other factor) to reduce certain risks or costs and / or generate extra income or growth (often called EPM). It is not intended that any such use will increase the volatility (a measure of the short-term changes in the Fund’s price) or materially alter the risk profile of the Fund. The Manager’s intention is that the Fund will generally only hold derivatives such as options and warrants which result from certain corporate actions, new issues or placements from time-to-time. The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

The Manager aims to ensure that the Fund remains adequately diversified across companies, sectors and countries.

Risks and reward profile

← Lower Risk Higher Risk →
Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and

Stewart Investors Worldwide Leaders Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 4.3% in sterling terms over the six months and has provided cumulative returns of 38.6% and 52.8% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Towards the end of the year, the US dollar weakened and companies outside of the US and big-tech started to perform better in comparison. The Fund's positive performance was driven by companies involved in the semiconductor sector, including **Samsung Electronics** which continues to benefit from positive sentiment around sales and pricing of their memory semiconductors and **WEG**, the Brazilian electric motor, renewable energy and automation business, benefitted from strong revenue growth in electro-electronic equipment and transformers in the US, driven by artificial intelligence expansion.

On the negative side, performance was impacted by **Fortinet**, which suffered as shorter term service revenue growth slowed and full year guidance suggests further moderation, and **bioMerieux**, the maker of diagnostic test kits which suffered due to increased competition.

Portfolio Changes

Over the period, the Fund bought **Alcon**, a world leading provider of eye health technologies, **Cintas**, America's largest uniform rental company, and **WW Grainger**, a leading distributor of maintenance, repair and operating (MRO) supplies.

During this period, the Fund exited **ABB**, the Swiss industrial company focusing on electrification, automation and digitalisation; **Alibaba**, the Chinese information technology and e-commerce leader, and **Sysmex**, the Japanese listed medical diagnostics company.

Outlook

On 26 March 2026 the ACD notified investors that, subject to approval from the Financial Conduct Authority, the Stewart Investors Worldwide Leaders Fund is due to close on 2 June 2026.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund decreased by 0.0% in sterling terms over the six months and has provided cumulative returns of 12.1% and 10.3% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Towards the end of the year, the US dollar weakened and companies outside of the US and big-tech started to perform better in comparison. The Fund's positive performance was driven by companies involved in the semiconductor sector, including **Samsung Electronics** which continues to benefit from positive sentiment around sales and pricing of their memory semiconductors and **Raia Drogasil**, the Brazilian pharmacy chain which rebounded after fears of regulatory change and online competition subsided.

On the negative side, performance was impacted by **Fortinet**, which suffered as shorter term service revenue growth slowed and full year guidance suggests further moderation, and **Brown & Brown** the insurance brokerage business was hurt by the softer retail market.

Portfolio Changes

Over the period, the Fund bought **Spirax**, a UK maker of steam technologies, and **MANI**, the Japanese maker of precision medical instruments.

During this period, the Fund exited **Spectris**, the precision instrument and testing business after it was acquired by private equity group KKR. The Fund also exited **Infineon Technologies**, a leader in the field of power management semiconductors, and **HDFC Bank**, the largest mortgage provider in India – both for valuation reasons.

Outlook

On 26 March 2026, the ACD notified investors of a proposal to repurpose the strategy of the Stewart Investors Worldwide All Cap Fund. The EGM will enable investors to vote on the next steps for this Fund and is due to be held on 29 April 2026.

Benchmark^ return %	10.4	23.7	10.9	0.3	15.9

*The Fund was launched on 1 November 2012.

^Benchmark: MSCI AC World Net Index.

IA Sector: Global.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

First Sentier Global Listed Infrastructure Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve an investment return from income and capital growth over the medium to long-term (at least three years).

The Fund invests in a diversified portfolio of equity securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes operating assets from the transport, utilities, energy and communications sectors.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment, but describes how much the value of the Fund has gone up and down in the past;
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

First Sentier Global Listed Infrastructure Fund

Authorised Fund Manager's Report

for the period ended 31 January 2026 (unaudited)

The Fund might also experience the following risks:

Single-sector risk: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws.

Emerging Market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Industry or sector risk: Where a Fund invests primarily in fast growing economies or limited or specialist sectors, it may be subject to greater risk and above average market volatility than an investment in a broader range of securities covering different economic sectors. Technology and technology-related industries may be subject to greater government regulation than many other industries. Accordingly, changes in governmental policies and the need for regulatory approvals may have an adverse effect on these industries. Additionally, companies in those industries will be subject to the inherent risks of developing technologies, competitive pressures and other factors particularly affecting the technology sector and are dependent upon consumer and business acceptance as new technologies evolve.

Where a Fund invests in specialist sectors such as the agricultural sector, it may also be subject to greater risk from changing supply and demand relationships, adverse weather, natural disasters, livestock diseases, governmental policies and trade regimes, as well as international economic and political developments. As a result, the value of such Fund may be subject to adverse and sudden changes.

Charges against capital risk: Fees and expenses are charged against the capital of certain Funds. Deducting expenses from capital reduces the potential for capital growth and on any redemption Shareholders may not receive back the full amount invested.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

Performance

The Fund rose by 4.2% in sterling terms over the 6 months and has provided cumulative returns of 17.0% and 47.1% over three and five years respectively to 31 January 2026 (net of fees and tax for the B Accumulation (GBP) share class).

Motiva Infraestrutura de Mobilidade (Brazil: Toll Roads), gained after selling its portfolio of Latin American airport assets to a Mexican airport operator. **NextEra Energy** (United States: Utilities / Renewables) released better-than-expected September quarter earnings results, supported by higher electricity demand from customers of its Florida Power & Light utility business. **National Grid** (United Kingdom: Utilities / Renewables) increased on the view that it was well-positioned to grow its regulated asset base over coming years.

SBA Communication (United States: Towers / Data Centres) underperformed on concerns for tenant turnover rates. **Cheniere Energy** (United States: Energy Midstream) lagged on indications of rising competition within the US Liquefied Natural Gas export space. **Infrastrutture Wireless Italiane** (Italy: Towers / Data Centres) fell after reducing earnings guidance for the 2026 – 2030 period to the lower end of its range.

Portfolio Changes

Union Pacific (United States: Railroads) was added to the Fund on the view that its proposed merger with east coast peer Norfolk Southern would strengthen its strategic position. The Fund initiated a position in **AENA** (Spain: Airports) after a period of regulatory uncertainty presented an attractive entry point for the stock. **CLP Holdings** (Hong Kong: Utilities / Renewables) was also added to the Fund on the appeal of its stable, regulated cash flows and undemanding valuation multiples.

First Sentier Global Listed Infrastructure Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Norfolk Southern (United States: Railroads) was sold after a period of strong performance as investors welcomed proposed merger with west coast peer Union Pacific. **Crown Castle** (United States: Towers / Data Centres) was sold after a period of outperformance relative to peers moved the stock to a lower ranking within the investment process. **Severn Trent** (United Kingdom: Water / Waste) was divested on the view that other names within the British water sector currently display greater levels of mispricing.

Outlook

The outlook for global listed infrastructure remains positive, aided by a range of growth drivers including rising demand for electricity and a keen appetite for travel. Should the macroeconomic / geopolitical backdrop deteriorate, regulated / contracted earnings and essential service provision would likely prove supportive of the asset class.

Cumulative performance as at 31 January 2026

Time period	3 mths	6 mths	1 yr	3 yrs	5 yrs	10 yrs	Since launch*

*The Fund was launched on 8 October 2007.

^Benchmark: FTSE Global Core Infrastructure 50/50 Net Index.

IA Sector: Infrastructure.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

There is no prior year distribution as this share class was launched on 23 January 2026.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

First Sentier Global Property Securities Fund

Authorised Fund Manager’s Report

for the period ended 31 January 2026 (unaudited)

Investment Objective and Policy

The Fund aims to achieve an investment return from income and capital growth over the long-term (at least five years).

The Fund invests at least 70% of its Net Asset Value in a broad selection of equity or equity-related securities issued by real estate investment trusts or companies that own, develop or manage real property located worldwide and which are listed, traded or dealt in on Regulated Markets worldwide (the “Property Securities”).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities in Property Securities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for Efficient Portfolio Management (“EPM”) purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Risks and reward profile

← Lower Risk Higher Risk →
Potentially Lower Rewards Potentially Higher Rewards

Share class A Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Income (GBP)	1	2	3	4	5	6	7
Share class B Accumulation (GBP)	1	2	3	4	5	6	7
Share class B Income (GBP)	1	2	3	4	5	6	7
Share class B Hedged Accumulation (GBP)	1	2	3	4	5	6	7
Share class A Accumulation (EUR)	1	2	3	4	5	6	7
Share class A Income (EUR)	1	2	3	4	5	6	7
Share class B Accumulation (EUR)	1	2	3	4	5	6	7
Share class B Income (EUR)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the Fund has gone up and down in the past;
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating 1 does not mean a risk free investment;
- During the period, the rating of Share class A Accumulation (GBP), Share class A Income (GBP), Share class B Accumulation (GBP), and Share class B Income (GBP) changed from 6 to 5 to reflect sustained changes in the Fund’s market volatility profile. On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Property securities risk: The Fund invests in the shares of companies that are involved in property (such as real estate investment trusts) rather than in property itself. The value of these investments may fluctuate more than the underlying property assets.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund’s investments and could cause the Fund to defer or suspend redemptions of its shares.

First Sentier Global Property Securities Fund

Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2026 (unaudited)

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Industry or sector risk: Where a fund invests primarily in fast growing economies or limited or specialist sectors, it may be subject to greater risk and above average market volatility than an investment in a broader range of securities covering different economic sectors. Technology and technology-related industries may be subject to greater government regulation than many other industries. Accordingly, changes in governmental policies and the need for regulatory approvals may have an adverse effect on these industries. Additionally, companies in those industries will be subject to the inherent risks of developing technologies, competitive pressures and other factors particularly affecting the technology sector and are dependent upon consumer and business acceptance as new technologies evolve.

Where a Fund invests in specialist sectors such as the agricultural sector, it may also be subject to greater risk from changing supply and demand relationships, adverse weather, natural disasters, livestock diseases, governmental policies and trade regimes, as well as international economic and political developments. As a result, the value of such Fund may be subject to adverse and sudden changes.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Performance

The Fund returned 3.1% in sterling terms over the six months and has provided cumulative returns of 2.2% and 12.5% over three and five years respectively to 31 January 2026 (net of fees and tax for the B GBP Accumulation (GBP) share class).

Portfolio Changes

The Fund established a new position in **Tokyo Fudosan**, a Japanese diversified developer/REIT benefiting from solid operating momentum, and **British Land**, a UK diversified REIT trading at attractive valuations with an improving outlook for retail and commercial assets. The Fund exited the largest UK listed triple-net REIT, **LondonMetric Property** position as its growth prospects appeared limited with its increased logistics exposure in an economy facing budgetary constraints.

The Fund reduced its position in **Goodman Group**, redeploying capital into other investments with higher conviction. **Stockland**, a diversified property group, was also trimmed from the portfolios, driven by concerns in interest rate changes and stronger CPI data. The Fund increased its position in **Swire Properties** during the period, a property developer listed in Hong Kong, with its investment portfolio well positioned to benefit from a recovery of the retail sector.

Outlook

Easing monetary policy and slowing inflation across major markets provide a constructive backdrop for REIT valuations. Structural trends - including ageing populations, housing affordability pressures, rising e-commerce penetration, and accelerating digital transformation - remain powerful multi-year drivers.

The Fund retains a positive view on self-storage, senior housing and retail shopping centres. Overall, listed real estate remains well positioned with stable fundamentals and attractive valuations - storage, senior housing and retail shopping centres.

*The Fund was launched on 12 September 2006.

[^]Benchmark: FTSE EPRA Nareit Developed Net Index.

IA Sector: Property Other.

Performance is based on the published NAV of share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 16.96% of the dividend is received as franked investment income.

Interim – 18.31% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 64.73% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.
