***not available in Germany and not yet launched at 31 December 2024

**** Please see Note 17 for details on the sub fund name changes which occurred during the period.

The Company's registration number is 288284.

Directors, Report

The Directors submit their Annual Report for the financial year ended 31 December 2024.

Activities, Business Review and Future Prospects

The Directors have directed the affairs of the Company in accordance with the Companies Act, 2014. A detailed business review and future prospects are outlined in the Investment Managers' Reports.

Principal risks and uncertainties

The Company is an umbrella fund with segregated liability between sub funds. Details of the general and specific risks are contained in the Prospectus. The principal risks facing the Company relate primarily to the holding of financial instruments and markets in which it invests. The most significant types of financial risk to which the Company is exposed to are market risk, credit risk and liquidity risk. Market risk includes other price risk, currency risk and interest rate risk. Details of the risks associated with financial instruments are included in Note 8.

Results and Dividends

The results for the financial year are shown in the Statement of Comprehensive Income. Details of the dividends declared during the financial year in respect of certain Funds by the Directors are shown in the Distribution Statement and Distribution Per Share Appendix. The Directors did not declare or pay dividends on any of the Funds not mentioned in the Distribution Statement.

Directors

Mr Michael Morris, Ms Kerry-Leigh Baronet, Mr Noel Ford and Ms Laura Chambers were the Directors of the Company as at 31 December 2024. The Directors of the Company are detailed in the Directory.

Directors' Responsibility Statement

Company law requires the Directors to prepare Company financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union ("EU") and applicable law.

Irish company law requires the Directors to prepare financial statements for each financial year that give a true and fair view of the assets, liabilities and financial position of the Company and of the Statement of Comprehensive Income of the Company for that financial year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS as adopted by the EU and ensure that they contain additional information required by the Companies Act, 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

Directors, Report (continued)

Directors' Responsibility Statement (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Irish Companies Act, 2014 (the "Companies Act") and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the Depositary for safe-keeping. In carrying out this duty, the Directors have delegated custody of the Company's assets to HSBC Continental Europe.

The Directors are responsible for the maintenance and integrity of the financial statements which are included on the Company's website (firstsentierinvestors.com). Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The work carried out by the auditors does not involve consideration of the maintenance and integrity of the Company's financial information which has been included on the aforementioned website. Accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the aforementioned website.

Adequate Accounting Records

The Directors are responsible for keeping adequate accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and comply with the Irish Companies Act, 2014 and the Central Bank UCITS Regulations.

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. To this end the Directors have engaged HSBC Securities Services (Ireland) DAC as Administrator and Matsack Trust Limited as Secretary. The accounting records are kept at the administrator's office at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2 and the registered office at 70 Sir John Rogerson's Quay, Dublin 2, Ireland.

Corporate Governance Code

The Board of Directors adopted the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds (the "Code") in November 2012. The Board of Directors has assessed the corporate governance practices and procedures set out in the Code and has determined that the Company followed those practices and procedures during the financial year ended 31 December 2024.

Directors, **Report (continued)**

Directors' and Secretary's Interests in the Share Capital of the Company

The Secretary did not hold any interest, beneficial or otherwise, in the share capital of the Company during or at the end of the financial year.

Details of Directors Interests in the Share Capital of the Company are disclosed in Note 14 to these financial statements.

Connected persons

In accordance with the requirements of the Central Bank UCITS Regulations, all transactions carried out with the Company by the management company or depositary of a UCITS, and the delegate or sub-delegates of such a management company or depositary (excluding any non-group company sub-depositaries appointed by a depositary), and any associated or group companies of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements in place to ensure that the obligations set out in the Central Bank UCITS Regulations are applied to all transactions with connected persons and transactions with connected persons and SFC Code.

Article 11 SFDR Disclosures

Please see the Appendix for the Company's disclosures under Article 11 of the Sustainable Finance Disclosures Regulation ("SFDR"), including the extent to which the environmental or social characteristics of Article 8 and 9 Funds are met. Disclosures have been made in accordance with the applicable regulatory technical standards.

Significant events during the financial year

Details of significant events during the financial year are disclosed in Note 17 to these financial statements.

Subsequent Events

Details of significant events after the Statement of Financial Position date are disclosed in Note 18 of the financial statements.

Audit Committee

Section 167 of the Companies Act 2014 obliges the Board either to establish an audit committee or, if it decides not to do so, to disclose the reasons for that decision in the statutory directors' report. The Board has determined not to establish an audit committee for the following reasons:

- The nature, scale and complexity of the Company is not such as to render the establishment of an audit committee necessary or prudent and in particular the Board as a whole has the requisite skills, experience and capacity to enable it to review and approve the Company's audited financial statements and;
- Given the current size of the Board, it is likely that any audit committee would comprise all, or at least a significant majority, of the Board and it is therefore considered more efficient for audit matters to be discussed by the entire Board rather than by an audit committee.

First Sentier Investors Global Umbrella Fund plc

Directors, **Report (continued)**

Independent Auditors

The independent auditors, Deloitte Ireland LLP, have indicated their willingness to continue in office in accordance with section 383(2) of the Companies Act, 2014.

Directors' Compliance Statement

The Directors confirm, in accordance with Section 225 of the Companies Act, 2014 that the following has been completed:

- a compliance policy document has been drawn up that sets out policies that, in our opinion, are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
- appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
- during the year ended 31 December 2024, the arrangements or structures referred to above have been reviewed.

We acknowledge that we are responsible for securing the Company's compliance with its relevant obligations.

Audit Information Statement

As per Section 330 of the Companies Act, 2014

- so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- the Directors have taken all the steps that they ought to have taken as directors in order to make them aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

By order of the Board

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing ("TSMC"), which was buoyed by the positive sentiment on AI-related stocks. TSMC has maintained its cutting-edge technology leadership and continued to strengthen its competitive position. Colgate-Palmolive (India) benefited from recovering volume growth and margin expansion. On the negative side, China Mengniu Dairy declined on weak consumer demand. China Resources Beer Holdings fell, with volume growth expected to remain under pressure amid weak consumer spending. The company plans to continue rationalising its operations (by closing plants and reducing staff numbers) to improve margins over the next few years.

Portfolio Changes

The Fund bought Tencent Holdings, the largest social media network and online gaming company in China, with growing businesses in online advertising, cloud services and e-payments/e-commerce. The Fund expects decent growth for Tencent's advertising business, driven by the recent monetisation of Weixin's short video function and the recovery of advertising demand. Cloud and fintech could also become major growth engines in the mid-to-long term.

The Fund also purchased Unilever Indonesia, a leading fast-moving consumer goods business in Indonesia that is 85% owned by Unilever. After years of being complacent as the market leader, the company is making positive changes such as investing in its brands, focusing on market share and consolidating its distributors.

The Fund sold LG Household & Health Care and Singapore Telecommunications to consolidate into higher-conviction opportunities.

Investment Manager's Report (Unaudited) (continued)

Outlook

The uncertainty that was prevalent across Asian and global markets in 2024 looks set to continue into the new year. With Mr Trump's election win in the United States ("US"), the general consensus is that US policy will be negative for emerging markets – particularly as the president-elect has already raised the spectre of more protectionism and higher trade tariffs. But instead of trying to second-guess geopolitics or macro policy, the Fund is focused on finding high-quality companies to invest in and expects to deliver decent returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ## No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which reported steady loan growth and effective cost controls. Tencent also rose as it continued to develop new functions to improve monetisation and enhance the quality of the franchise. On the negative side, CSPC Pharmaceutical reported weaker-than-expected sales, as legacy drugs were impacted by volume-based procurement ("VBP") price cuts. Shenzhou International fell as data in the US and UK suggested soft retail demand, while Nike's cautious outlook hurt sentiment towards apparel makers.

Portfolio Changes

Significant new purchases included Meituan, the largest local services e-commerce platform in China. It is the leader in food delivery services and domestic hotel bookings, while in-store dining and travel services are major profit centres. The Fund also bought Fuyao Glass Industry, a leading auto-glass maker with a large export business and a strong track record.

The Fund sold China Resources Land and Tsingtao Brewery to consolidate into more attractive opportunities.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included DHL (Germany: Industrials); whose earnings came under pressure, mainly due to lower contribution from Chinese e-commerce; Samsung Electronics (South Korea: Information Technology), due to fears about geopolitical developments affecting the demand for semiconductor chips alongside delayed orders from large artificial intelligence ("AI") chip designers; and Beiersdorf (Germany: Consumer Staples), which saw a slowdown in sales of its La Prairie range due to ongoing economic weakness in China.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary), which continues to invest to build a more robust business franchise; Fortinet (United States: Information Technology) which experienced a significant rise thanks to recovering revenue growth and increased profits; and Arista Networks (United States: Information Technology), which generated strong revenue growth boosted by investment in AI infrastructure.

Portfolio Changes

The Fund bought Taiwan Semiconductor Manufacturing (Taiwan: Information Technology), the world's leading manufacturer of semiconductors; Sysmex (Japan: Health Care), a global leader in laboratory diagnostics, testing for blood-related diseases and other conditions; and Rentokil Initial (United Kingdom: Industrials), a global leader in pest control services which are essential for health and hygiene in homes, hospitals and businesses.

The Fund sold Infineon Technologies (Germany: Information Technology), due to growth concerns in their end customer markets such as electric vehicles and renewable energy; Unicharm (Japan: Consumer Staples), over concerns for future growth prospects; and Oversea-Chinese Banking (Singapore: Financials), due to increased competition facing Asian banks which is impacting their ability to grow.

Investment Manager's Report (Unaudited) (continued)

Outlook

Geopolitical tensions, persistent inflation, rising inequality and a decided shift to protectionism by various governments are creating uncertain times and reversing socio- economic conditions of the past 40 years. This poses significant challenges for governments, regulators, societies and companies. The Investment Manager believes that quality businesses solving developmental challenges and managed for the long term are best placed to survive and thrive in such choppy waters. Since 1988, the Investment Manager has focused on investing in high-quality companies at sensible prices and continues to find suitable investment opportunities for clients' savings, despite these uncertain times.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which reported decent results with steady loan growth and effective cost controls. Tencent also rose as it continued to develop new functions to improve monetisation and enhance the quality of the franchise. On the negative side, CSPC Pharmaceutical reported weaker-than-expected sales as legacy drugs were impacted by volume-based procurement ("VBP") price cuts. Shenzhou International fell as data in the US and UK suggested soft retail demand, while Nike's cautious outlook hurt sentiment towards apparel makers.

Portfolio Changes

New purchases included HSBC, a global bank with a major presence in Hong Kong, China and the rest of Asia. It is refocusing its business model towards Asia; and it is moving in the right direction in net zero and fossil fuel lending. The Fund also bought H World, a multi-brand hotel group in China. The company has scale, strong brands, advanced IT systems and good cost control.

The Fund divested China Resources Land and Sino Biopharmaceutical to consolidate the portfolio.

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

First Sentier Investors (Ireland) Limited January 2025

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors included Computer Age Management Services, which reported strong sales and earnings, driven by growth in mutual fund assets and other businesses such as payments. ICICI Bank continued to perform well with strong performance across its business, gaining market share whilst maintaining attractive returns on assets. On the negative side, RHI Magnesita India declined as the industry is going through a down-cycle with weak demand and increased competition from Chinese supply. Nestlé India fell after reporting disappointing revenue growth amid weak consumer demand, while margins were pressured by commodity price inflation.

Portfolio Changes

Significant new purchases included Tata Consultancy Services, the largest Indian IT services company with more than 600,000 employees. Its rich domain knowledge, built up over many years, fosters high entry barriers and customer loyalty. The Fund also bought Nestlé India, which produces food and beverage products such as baby food, noodles and chocolate. With over 100 years of history in India, it has built a strong franchise with the leading market share across most of its subcategories.

The Fund sold Castrol India and Tech Mahindra to consolidate into more attractive opportunities.

Investment Manager's Report (Unaudited) (continued)

Outlook

The decade before the COVID-19 pandemic saw a period of slow growth in India. During this time, market leading businesses took measures to consolidate their market positions. As the growth outlook has improved with the benefit of various reforms and healthy balance sheets of corporates as well as banks, these leading businesses are now well positioned to deliver strong earnings growth and returns on capital. They are expected to capture the lion's share of the growth in their respective industries' profit pools. While some pockets of the investment universe are expensively valued, there are still a number of attractive opportunities.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

The Fund underperformed its benchmark in 2024, mainly due to an overweight in US interest rates and Asia local currency exposures.

Portfolio Changes

The Fund's overweight in US interest rates detracted from returns as US rates stayed high on the back of delayed interest rate cuts due to a resilient US economy.

Local currency positions maintained throughout the year as diversifiers and to position the Fund for a potential weakening in the US dollar as the Fed cut interest rates yielded mixed outcomes. The Fund's position in Australian Government Bonds detracted from returns as Australian rates rose and the Australian dollar weakened, but a long position in Malaysian Government Bonds added value both from a yield and currency perspective. In European rates, the Fund's overweight in French rates detracted from positive returns due to the political uncertainty that caused a negative return in rates.

An underweight in Japanese Government Bonds was positive for performance as interest rates rose in Japan. Towards the end of June, the Fund also sold its yen position on possible near-term weaknesses, before reopening a long in the yen on the dollar's weakness as the Fed made its first rate cuts during the third quarter of 2024.

Outlook

Asian economies have been resilient thus far. Some have benefitted from the tech upcycle, but effects from China's slowdown are not negligible. The growth outlook in Asia is showing signs of weakness especially for exportoriented countries including Singapore, South Korea and Taiwan, not only due to China's slowdown, but also the lackluster demand from other regions. Within the Asian region, countries with a stronger domestic story, such as India, are likely to fare better. Against this weakening external backdrop, policy divergence is emerging among Asian central banks as some remain on pause while others begin to cut rates along with the Fed's easing cycle. The moderating inflationary backdrop and healthy fundamentals remain favorable for Asian economies and currencies. Asian local currency bonds have regained some footing on first signs of the Fed's pivot, and the changing tides in fund flows favoring Asian markets could further boost Asian local bond returns.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent also added to performance as it continued to develop new functions to improve monetisation and enhance the quality of the franchise. On the negative side, CSPC Pharmaceutical reported weaker-than-expected sales, as legacy drugs were impacted by volume-based procurement ("VBP") price cuts. Silergy fell amid a challenging demand environment and increased competition from its Chinese peers.

Portfolio Changes

Significant new purchases included H World, a multi-brand hotel group in China. The company has scale, strong brands, advanced IT systems and good cost control. Branded hotels are expected to gain market share and benefit from the growing spend on travel and leisure activities. The Fund also bought Fuyao Glass Industry, a leading auto-glass maker with a large export business. The Fund divested China Resources Land and Sino Biopharmaceutical to consolidate the portfolio.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

(Performance calculation is based on official dealing NAV per share)

*Inception date - 16 December 2021

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. The benchmark for class I changed on 9 December 2021. The above data includes a switch from MSCI Singapore and Malaysia Index to MSCI AC ASEAN Index.

##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included FPT, which was boosted by strong growth in global IT spending and digital transformation projects. DBS rose after reporting strong profit growth and a plan to buy back some of its shares. On the negative side, Kalbe Farma declined due to the fast growth in universal healthcare and the weakening Indonesian rupiah. Unilever Indonesia continued to be affected by the boycott against companies that support Israel, as called for by Indonesia's top Islamic body in support of Palestine.

Portfolio Changes

The Fund purchased Bank Rakyat Indonesia, a leading micro-finance lender in Indonesia with high returns on assets and a solid business franchise. Microloans and ultra-microloans (small business loans) are a large social contributor to the 37 million borrowers in Indonesia who can't otherwise access formal credit. The Fund also bought Metropolitan Bank & Trust on attractive risk/reward metrics. As the second largest bank in the Philippines, the valuation seemed attractive for a bank with good deposit franchise and low rates of bad loans.

The Fund sold Singapore Telecommunications and Great Eastern to consolidate the portfolio into higher-conviction ideas.

Outlook

Whilst there are long-term tailwinds for the ASEAN region, it is uncertain which way macroeconomics and overall investor sentiment will swing in the near term. As long-term investors, the Fund focuses on and draws comfort from the quality of the holdings and their largely inexpensive valuations. The companies owned in the strategy have long-term owners (or managers who act like long-term owners) as stewards of the business. This often correlates with good capital allocation and operating decisions, and decent shareholder returns by extension.

First Sentier Investors (Ireland) Limited January 2025

Performance Table as of 31 December 2024 (Unaudited)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent rose as it continued to develop new functions within WeChat (such as Video Accounts and Mini Shops) to slowly improve monetisation and enhance the quality of the franchise. On the negative side, China Resources Beer fell as weak demand led to a decrease in beer sales volumes. NAVER declined on concerns about Artificial Intelligence and competition from alternative e-commerce platforms like Coupang.

Portfolio Changes

The Fund purchased Café de Coral, a diversified Hong Kong restaurant group, on attractive risk-reward metrics. After a challenging few years through the COVID-19 pandemic, performance is recovering, and the restaurants are benefitting from customers opting for cheaper food selections. The Fund also bought President Chain Store, the largest convenience store company in Taiwan, as there are signs that growth is beginning to pick up again.

The Fund sold Haw Par and China Mengniu Dairy to consolidate the portfolio into higher-conviction ideas.

Outlook

The uncertainty that was prevalent across Asian and global markets in 2024 looks set to continue into the new year. With Mr Trump's election win in the United States ("US"), the general consensus is that US policy will be negative for emerging markets – particularly as the president-elect has already raised the spectre of more protectionism and higher trade tariffs. But instead of trying to second-guess geopolitics or macro policy, the Fund is focused on finding high-quality companies to invest in and expects to deliver decent returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent rose as it continued to develop new functions within WeChat (such as Video Accounts and Mini Shops) to slowly improve monetisation and enhance the quality of the franchise. On the negative side, Samsung Electronics declined after media reports suggested that the company would continue shutting its production lines as part of its efforts to reduce costs. China Resources Beer fell as weak demand led to a decrease in beer sales volumes.

Portfolio Changes

The Fund purchased Netease, the second-largest gaming company in China. The company has a portfolio of games with loyal users and a strong pipeline of new games that should support decent growth prospects. The Fund also bought Shenzhou International, a leading sportswear manufacturer which could gain market share as clothing brands become more conscious about their supply chain.

The Fund sold JD.com and China Resources Land to consolidate the portfolio into higher conviction ideas.

#The Fund is actively managed without reference to a benchmark.

##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

The Fund delivered positive total returns over 2024.

Portfolio Changes

The Fund benefitted from the attractive all-in yields of Asian Credits and the overall tightening of investment grade credit spreads over the year. High yield Asian Credits too outperformed as default rates levelled off with the Chinese property sector showing signs of stabilisation as distressed names made progress with restructuring efforts.

As credits got increasingly expensive, the Fund took profit on select names such as Indonesian quasi-sovereigns and longer dated credits to bring the Fund's credit exposure to neutral levels versus its benchmark. Given the risk-reward profile that favoured shorter tenured corporate bonds, the Fund reduced long-dated credits and held a bias for shorter dated names. Selective positioning in Chinese property bonds were positive for returns as distressed property developers who made constructive progress in bond restructuring efforts and/or asset disposal enjoyed some price appreciation in their bonds.

A modest long in interest rates produced mixed performance as US rates ended the year edging higher, overall returns still remained positive for the Fund. Local currency positions were maintained throughout the year as diversifiers as well as to position the Fund for investment returns opportunities outside of US dollar credits.

In currency positioning, the Fund remained a holder of the Japanese yen despite a persistent yen weakness as the currency would benefit from narrowing interest rate differentials between the US and Japan as the Bank of Japan hiked rates.

Investment Manager's Report (Unaudited) (continued)

Outlook

In Asia, fundamentals remain sound despite pockets of weakness. Bond supply in 2025 will remain modest, thereby supporting demand for Asian credits. Asian bonds have not been a beneficiary of investment inflows, particularly in 2022-2023, but there are signs that the positive turn in sentiments for the region towards the end of 2024 could spill over to 2025. Should interest rate differentials between the US and Asia narrow and/or China's story improve, Asia could also see the largest upside in returns.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

The Fund underperformed its benchmark in 2024.

Credit positions were positive for the Fund's performance as returns were positive for the sector, particularly in the telecommunication, real estate and quasi-sovereign sectors, while an overweight in US interest rates detracted from excess returns. The Fund's local currency allocation in Malaysian Government Securities added value, while being a holder of the Japanese yen and Australian government bonds detracted from returns.

Portfolio Changes

The Fund benefitted from the attractive all-in yields of Asian Credits and the overall tightening of high quality credit spreads over the year. As credits got increasingly expensive, the Fund took profit on select names such as Indonesian quasi-sovereigns and longer dated credits to bring the Fund's credit exposure to neutral levels versus its benchmark. Given the risk-reward profile that favoured shorter tenured corporate bonds, the Fund reduced long-dated credits and held a bias for shorter dated names.

The Chinese property sector showed signs of stabilisation on the back of policy stimulus from China, which added to the Fund's returns. An overweight in interest rates produced mixed performance as US rates ended the year edging higher. Local currency positions were maintained throughout the year as diversifiers as well as to position the Fund for investment returns outside of US dollar credits.

Investment Manager's Report (Unaudited) (continued)

Outlook

In Asia, fundamentals remain sound despite pockets of weakness. Bond supply in 2025 will remain modest, thereby supporting demand for Asian credits. Asian bonds have not been a beneficiary of investment inflows, particularly in 2022-2023, but there are signs that the positive turn in sentiments for the region towards the end of 2024 could spill over to 2025. Should interest rate differentials between the US and Asia narrow and/or China's story improve, Asia could also see the largest upside in returns.

(Performance calculation is based on official dealing Net asset value (NAV) per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Samsung Electronics (South Korea: Information Technology), which continues to suffer from fears about the semiconductor division and weaker demand from memory chip customers; Raia Drogasil (Brazil: Consumer Staples), which has suffered as Brazil's economic situation has faced growing concerns; and Unicharm (Japan: Consumer Staples), which has shifted focus from child diapers to adult incontinence diapers to meet demographic changes but this is taking longer than expected to translate into significant revenue growth.

Positive contributors included Taiwan Semiconductor Manufacturing (Taiwan: Information Technology), which continues to power ahead as the dominant global maker of semiconductor chips; Mahindra & Mahindra (India: Consumer Discretionary), which continues to deliver attractive levels of growth and returns as it solidifies its position in the automotive and farm segments and also turns around underperforming subsidiaries; and Delta Electronics (Taiwan: Information Technology), which experienced strong demand from data centres and power supply units throughout the year.

Portfolio Changes

The Fund bought Bidcorp (South Africa: Consumer Staples), a specialist logistics company focused on fresh and frozen foods and with operations in over 30 countries; NAVER (South Korea: Communication Services), the leading South Korean internet search engine with a very strong market share; and Regional (Mexico: Financials), a bank focused on lending to small and medium-sized business in Mexico.

The Fund sold Kotak Mahindra Bank (India: Financials), which saw some regulatory issues earlier in the year and is facing increased competition; Hoya (Japan: Health Care), due to valuations and to fund better opportunities elsewhere; and Tech Mahindra (India: Information Technology), due to high valuations.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager believes that valuations in emerging markets are at attractive levels alongside long-term growth opportunities that they can support for a long time. The Fund continues to focus on individual company analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development opportunities these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

In 2024, markets continued to be influenced by macroeconomic news, with the most significant factor affecting share price performance being the expectations for the speed and depth of interest rate cuts.

The largest positive contributor to the Fund's performance was its position in US multi-family REIT Apartment Income. The stock outperformed as a result of the announced privatisation deal. The Fund's holdings in US Data Centre REIT Equinix also benefitted performance in the period due to ongoing support from the Artificial Intelligence ("AI") thematic. The Fund's holdings in US Seniors housing REIT Ventas and US Retail REIT InvenTrust Properties also aided performance in the year.

The largest detractors from the Fund's performance were exposures to UK logistics company Tritax Big Box REIT and US industrial REIT Rexford Industrial Realty due to negative sentiment towards the industrial sector in the year. The Fund's holdings in Americold Realty Trust also underperformed in the period as the market remained concerned about slowing throughput volumes of its portfolio.

Portfolio Changes

The Fund initiated a position in Simon Property in April, a US based global class A shopping mall owner and operator. The Fund also initiated a position in LondonMetric Property, the largest UK listed triple-net REIT and BXP, a high-quality coastal US CBD office owner.

The Fund reduced its position in US detached housing REIT American Homes 4 Rent in the period as investors are expected to question the ultimate impact of the housing recovery on the detached housing sector. The Fund also reduced its exposure to US convenience retail REIT Brixmor Property and US logistics REIT Prologis during the year.

Investment Manager's Report (Unaudited) (continued)

Outlook

In an environment where interest rates in many markets are falling, REITs are well-positioned to take advantage of an improved cost of capital to explore external growth opportunities by acquiring undervalued private and public assets.

Furthermore, strong structural trends such as demographics and aging populations, falling home ownership rates, the growth in data consumption and e-commerce adoption should continue to drive performance into the future.

Performance

Key contributors to performance included China Merchants Bank, which reported steady loan growth and effective cost controls. Meituan also rose as the company reduced its losses in community group buying ("CGB") and conducted share buybacks. On the negative side, China Resources Beer fell as weak demand led to a decrease in beer sales volumes, although its execution has been decent amid a difficult environment. Guangzhou Kingmed Diagnostics reported lower sales and profits as the anti-corruption campaign in China's health care industry continued to drag on its business.

Portfolio Changes

New purchases included Yadea, the leader in China's electric two-wheeler industry. The industry has seen rapid development in recent years and has become a daily necessity for many. The Fund also bought China Resources Mixc Lifestyle Services, which operates shopping malls and manages offices and residential properties. This is an asset-light business with minimal capital needs and robust operating cash-flow.

The Fund sold China Resources Land and Autobio Diagnostics to consolidate the portfolio into higher conviction investment opportunities.

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

No performance return has been presented for the year as the share class has not been in existence for a full year.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment Manager's Report (Unaudited) (continued)

Performance

The largest positive contributor to Fund performance was NextEra Energy (United States: Utilities / Renewables) which gained on the view that it was well-positioned to benefit from rising demand for electricity in the US. Targa Resources (United States: Energy Midstream) and DT Midstream (United States: Energy Midstream) performed well on robust earnings, a healthy demand outlook and hopes that the incoming Trump administration may ease energy industry regulatory restrictions. However, CCR (Brazil: Toll Roads) declined as mounting concerns for government spending levels weighed on Brazil's stock market. Atlas Arteria (Australia: Toll Roads), whose main asset is a stake in French motorway network APRR, was affected by French political instability. AES (United States: Utilities / Renewables) underperformed after announcing weak September quarter earnings numbers, and on investor concerns about the execution risk related to the rollout of its renewables projects.

Portfolio Changes

American Electric Power (United States: Utilities / Renewables) was added to the portfolio owing to its undemanding valuation multiples and positive strategic direction. A position was initiated in National Grid (United Kingdom: Utilities / Renewables) after a substantial capital raising in May removed a key overhang from the stock. Public Service Enterprise (United States: Utilities / Renewables) was also added to the portfolio on the view that its power generation assets should benefit from increasing US electricity demand.

During the year Southern (United States: Utilities / Renewables), Entergy (United States: Utilities / Renewables) and FirstEnergy (United States: Utilities / Renewables) were sold in favour of positions in higher-conviction names within the utilities sector.

Outlook

The outlook for the global listed infrastructure asset class is positive. The Investment Manager expects asset class earnings to remain supported by long term structural drivers. Healthy balance sheets, steady demand for essential service provision and appealing dividend yields should provide valuation support in the event of a market downturn.

*Please see Note 17 for details on the sub fund name changes which occurred during the period.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent rose as it continued to develop new functions within WeChat (such as Video Accounts and Mini Shops) to slowly improve monetisation and enhance the quality of the franchise. On the negative side, Samsung Electronics declined after media reports suggested that the company would continue shutting its production lines as part of its efforts to reduce costs. China Resources Beer fell as weak demand led to a decrease in beer sales volumes.

Portfolio Changes

The Fund purchased HCL Technologies, a leading IT services company, which has improved its performance and has solid capabilities in high-potential areas like cloud and engineering services. The Fund also bought Techtronic Industries, one of the world's largest producers of branded power tools and floor-care products. The company occupies a leading position in North America with key brands such as Milwaukee, AEG and Ryobi.

The Fund sold Singapore Telecommunications on concerns about valuations. After a period of poor performance, there was a turnaround in the company and the risk-reward seemed less attractive. The Fund also sold TravelSky Technology after being shareholders for almost five years. Whilst the business model has inherent advantages, concerns on its capital allocation and the lack of alignment with the senior management have not been alleviated, despite several attempts to engage on these matters.

Outlook

The uncertainty that was prevalent across Asian and global markets in 2024 looks set to continue into the new year. With Mr Trump's election win in the United States ("US"), the general consensus is that US policy will be negative for emerging markets – particularly as the president-elect has already raised the spectre of more protectionism and higher trade tariffs. But instead of trying to second-guess geopolitics or macro policy, the Fund is focused on finding high-quality companies to invest in and expects to deliver decent returns in the long run.

(Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent rose as it continued to develop new functions within WeChat (such as Video Accounts and Mini Shops) to slowly improve monetisation and enhance the quality of the franchise. On the negative side, Samsung Electronics declined after media reports suggested that the company would continue shutting its production lines as part of its efforts to reduce costs. China Resources Beer fell as weak demand led to a decrease in beer sales volumes.

Portfolio Changes

The Fund purchased HCL Technologies, a leading IT services company, which has improved its performance and has solid capabilities in high-potential areas like cloud and engineering services. The Fund also bought Techtronic Industries, one of the world's largest producers of branded power tools and floor-care products. The company occupies a leading position in North America with key brands such as Milwaukee, AEG and Ryobi.

The Fund sold Singapore Telecommunications on concerns about valuations. After a period of poor performance, there was a turnaround in the company and the risk-reward seemed less attractive. The Fund also sold TravelSky Technology after being shareholders for almost five years. Whilst the business model has inherent advantages, concerns on its capital allocation and the lack of alignment with the senior management have not been alleviated, despite several attempts to engage on these matters.

Outlook

On 17 April 2025 investors were notified of the Directors' intention to close the FSSA Asia Pacific All Cap Fund on 22 May 2025.

***Benchmark changed to FTSE Developed Core Infrastructure ex-Pipelines Index on 30 November 2022

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ## No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

The largest positive contributor to Fund performance was NextEra Energy (United States: Utilities / Renewables) which increased on the view that it was well-positioned to benefit from rising demand for electricity in the US. Dominion Energy (United States: Utilities / Renewables) gained for similar reasons. GFL Environmental (Canada: Water / Waste) rose on reports of strong interest from potential buyers of its liquid waste-focused Environmental Services business.

Solaria Energia Y Medio Ambiente (Spain: Utilities / Renewables) lagged on rising interest rates and lower European power prices. EDP Renovaveis (Spain: Utilities / Renewables) underperformed on concerns about waning policy support for renewables development in the US. Rising bond yields weighed on American Tower (United States: Mobile Towers), reflecting its interest rate-sensitive nature.

Portfolio Changes

American Electric Power (United States: Utilities / Renewables) was added to the portfolio owing to its undemanding valuation multiples and positive strategic direction. A position was initiated in National Grid (United Kingdom: Utilities / Renewables) after a substantial capital raising in May removed a key overhang from the stock. PG&E (United States: Utilities / Renewables) was also added to the portfolio on the view that planned capital expenditure on network improvements had the potential to underpin healthy rate base and earnings growth.

Investment Manager's Report (Unaudited) (continued)

Portfolio Changes (continued)

Crown Castle (United States: Mobile Towers) was divested on concerns that its fibre and small cell businesses, which it is reportedly seeking to sell, may command a lower price than previously expected. Edison International (United States: Utilities / Renewables) was divested in favour of positions in higher conviction US utility names. A position in Pennon (United Kingdom: Water / Waste) was divested and the proceeds used to increase exposure to peer Severn Trent.

Outlook

On 5 March 2025 investors were notified of the Directors' intention to close the First Sentier Responsible Listed Infrastructure Fund on 4 April 2025.

*Inception date – 24 March 2023

^Closure date - 25 October 2024

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, as growth has remained strong at a time when demand is generally weak. Tencent rose as it continued to develop new functions within WeChat (such as Video Accounts and Mini Shops) to slowly improve monetisation and enhance the quality of the franchise. On the negative side, Regional declined after indicating that new loans growth over the year would be weak. Alsea declined on currency concerns and a weak environment in Europe. The depreciation of the Mexican peso has affected gross margins as a large proportion of its costs is in US dollars.

Portfolio Changes

The Fund purchased Bank Rakyat Indonesia, a leading micro-finance lender in Indonesia with high returns on assets and a solid business franchise. Microloans and ultra-microloans (small business loans) are a large social contributor to the 37 million borrowers in Indonesia who can't otherwise access formal credit. The Fund also purchased Dino Polska, a high-quality grocery retailer in Poland which operates over 2,000 small and medium-sized shops across rural areas and has significant room to expand over the next five years.

The Fund sold JD.com and Maruti Suzuki India to consolidate into higher-conviction ideas.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Fund continues to invest in businesses that have proven management teams and competitive advantages that allow them to capitalise on the long-term growth trends across emerging markets. Competitive advantages in the form of strong brands, distribution advantages, cost leadership or simply providing a service/product that customers cannot live without, are the main traits that characterise the portfolio's holdings. They continue to offer attractive long-term growth potential and valuations seem reasonable.

^Dividend adjustment return

*Inception date – 29 January 2021

**Please see Note 17 for details on the sub fund name changes which occurred during the period.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.

##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Spectris (United Kingdom: Information Technology), which has experienced pressure on earnings from lower market demand; Infineon Technologies (Germany: Information Technology) due to uncertainty affecting its key customer segment in electric vehicles and concerns over geopolitical risks affecting sales in China; and Samsung Electronics (South Korea: Information Technology), due to fears about geopolitical developments affecting the demand for semiconductor chips alongside delayed orders from large artificial intelligence ("AI") chip designers.

Positive contributors included Fortinet (United States: Information Technology), which experienced a significant rise thanks to recovering revenue growth and increased profits; Zebra Technologies (United States: Information Technology), has seen demand conditions stabilise as stocking issues comes to an end and customers look to replace devices; and MonotaRO (Japan: Industrials), which saw accelerating growth from increased sales to larger enterprises.

Portfolio Changes

The Fund bought Samsung Electronics (South Korea: Information Technology), which has a strong business franchise and impressive ability to generate income; Applied Industrial Technologies (United States: Industrials), one of the largest distributors of industrial motion and control technologies in the United States ("US"); and Ashtead (United Kingdom: Industrials), an industrial and construction equipment rental company that earns most of its revenues from the US.

The Fund sold Kotak Mahindra Bank (India: Financials), due to increased competition impacting its ability to grow; Tecan (Switzerland: Health Care), because of a slowdown in biotechnology research investment; and A. O. Smith (United States: Industrials), which is facing growth challenges in its key markets of the US and China.

Investment Manager's Report (Unaudited) (continued)

Outlook

Geopolitical tensions, persistent inflation, rising inequality and a decided shift to protectionism by various governments are creating uncertain times and reversing socio- economic conditions of the past 40 years. This poses significant challenges for governments, regulators, societies and companies. The Investment Manager believes that quality businesses solving developmental challenges and managed for the long term are best placed to survive and thrive in such choppy waters. Since 1988, the Investment Manager has focused on investing in high-quality companies at sensible prices and continues to find suitable investment opportunities for clients' savings, despite these uncertain times.

^Please see Note 17 for details on the sub fund name changes which occurred during the period.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ## No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Raia Drogasil (Brazil: Consumer Staples), which has suffered as Brazil's economic situation has faced growing concerns; Samsung Electronics (South Korea: Information Technology), which continues to suffer from fears about the semiconductor division and weaker demand from memory chip customers; and Unicharm (Japan: Consumer Staples), which has shifted focus from child diapers to adult incontinence diapers to meet demographic changes but is taking longer than expected to translate into significant revenue growth.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary), which continues to deliver attractive levels of growth and returns as it solidifies its position in the automotive and farm segments and also turns around underperforming subsidiaries; Taiwan Semiconductor Manufacturing (Taiwan: Information Technology), which continues to power ahead as the dominant global maker of semiconductor chips; and Advanced Energy Solution (Taiwan: Industrials), which posted positive results from increased demand from data centres. The company was sold during this period of strong performance.

Investment Manager's Report (Unaudited) (continued)

Portfolio Changes

The Fund bought Allegro (Poland*: Consumer Discretionary), the largest e-commerce platform in Poland; Tata Communications (India: Communication Services), which provides basic network and digital infrastructure and is evolving its business for the better; and MediaTek (Taiwan: Information Technology), who are leaders in integrated chip system solutions which power smartphones, home entertainment and internet connectivity.

The Fund sold Kotak Mahindra Bank (India: Financials), which saw some regulatory issues earlier in the year and is facing increased competition; Tech Mahindra (India: Information Technology), due to high valuations; and Infineon Technologies (Germany: Information Technology), to fund better ideas elsewhere.

Outlook

The Investment Manager believes that valuations in emerging markets are at attractive levels alongside long-term growth opportunities that they can support for a long time. The Fund continues to focus on individual company analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development opportunities these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

^Dividend adjustment return

*Inception date – 30 July 2021

**Inception date - 9 May 2024

***Please see Note 17 for details on the sub fund name changes which occurred during the period.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Samsung Electronics (South Korea: Information Technology), which has struggled in leading edge memory conductors versus its competitor SK Hynix; Unicharm (Japan: Consumer Staples), which continues to struggle outside of Japan; and WuXi Biologics (China: Health Care), which suffered after it was subject to regulatory action by United States congress. The Fund sold WuXi during the period.

Positive contributors to performance included Mahindra & Mahindra (India: Consumer Discretionary), due to improving demand and outlook for both the automotive and farm equipment businesses; Taiwan Semiconductor Manufacturing (Taiwan: Information Technology), which is benefitting from increasing enthusiasm for artificial intelligence ("AI") demand for logic chips; and Oversea-Chinese Banking (Singapore: Financials), which focuses on conservative lending and low levels of non-performing loans, making it well-placed to grow alongside the Singaporean banking system.

Portfolio Changes

The Fund bought MediaTek (Taiwan: Information Technology), who are leaders in integrated chip system solutions which power smartphones, home entertainment and internet connectivity; Techtronic Industries (Hong Kong: Industrials), who are dominant internationally in various cordless, hand, measuring and trade power tools for both home and commercial use; and NAVER (South Korea: Communication Services), South Korea's dominant internet search engine which has significantly improved its capital allocation in recent years.

Investment Manager's Report (Unaudited) (continued)

Portfolio Changes (continued)

The Fund sold Infineon Technologies (Germany: Information Technology), due to concerns over long-term competition; HDFC Life Insurance (India: Financials), to fund better ideas elsewhere; and Altium (Australia: Information Technology), after it received a takeover bid at a much higher premium than the published market price.

Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for leaders and stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Samsung Electronics (South Korea: Information Technology), which has struggled in leading edge memory conductors versus its competitor SK Hynix; Unicharm (Japan: Consumer Staples), which continues to struggle outside of Japan; and Koh Young Technology (South Korea: Information Technology), due to disappointing earnings and revenue numbers.

Positive contributors to performance included Mahindra & Mahindra (India: Consumer Discretionary), due to improving demand and outlook for both the automotive and farm equipment businesses; CG Power and Industrial Solutions (India: Industrials), which benefitted from continued progress in their business franchise and also saw a pick-up in capital spending by their customers; and Chroma ATE (Taiwan: Information Technology) who have seen strong sales growth and benefitted from their association with artificial intelligence chip demand.

Portfolio Changes

The Fund bought Info Edge (India: Communication Services), whose businesses, including their recruitment platform, are well placed to benefit from economic growth in India; MediaTek (Taiwan: Information Technology), who are leaders in integrated chip system solutions which power smartphones, home entertainment and internet connectivity; and Ayala (Philippines: Industrials), a holding company in the Philippines with a diverse range of underlying businesses.

The Fund sold Kotak Mahindra Bank (India: Financials), to fund better ideas elsewhere; Advanced Energy Solution (Taiwan: Industrials), due to lower confidence; and Vinda International (China: Consumer Staples), after it received a takeover bid at a much higher premium than the published market price.

Investment Manager's Report (Unaudited) (continued)

Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for leaders and stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

*Closure date – 4 June 2024

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which reported decent results with steady loan growth and effective cost controls. Ping An Insurance rose as the company's fundamentals are improving with the recovery of the insurance business. On the negative side, Guangzhou Kingmed Diagnostics reported lower sales and profits as the anti-corruption campaign in China's health care industry continued to drag on its business. Shanghai Liangxin Electrical was de-rated due to weak sales and exposure to the property market.

Portfolio Changes

Significant new positions included Contemporary Amperex Technology, a leading manufacturer of electric vehicle ("EV") batteries and energy storage systems. The company has continued to grow its global market share in recent years, mostly in Europe. The Fund also purchased Wanhua Chemical, a specialty chemicals manufacturer with high technical barriers to entry. Wanhua has a leading position in the global polyurethane industry and continues to gain market share as the cost leader.

The Fund sold China Resources Land and Gree Electric Appliances to raise cash for better ideas elsewhere.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

First Sentier Investors (Ireland) Limited January 2025

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

##No performance return has been presented for the year as the share class has not been in existence for a full year.

Performance

Detractors to performance included Alfen (Netherlands: Industrials), which was impacted by product recalls and slowing demand in their electric vehicle charging segment; Carl Zeiss Meditec (Germany: Health Care), which suffered from weaker Chinese consumers and competitive pressures in the US market; and Spectris (United Kingdom: Information Technology), which weakened over concerns on restructuring and weaker short-term trading.

Positive contributors included Nexans (France: Industrials), which continues to benefit from growth trends in grid upgrades and industrial electrification; Halma (United Kingdom: Information Technology), due to its strong execution when buying niche businesses across healthcare, environmental analysis, and safety; and Adyen (Netherlands: Financials), where growth in digitalised payments has remained strong as profitability stabilises.

Portfolio Changes

The Fund bought Wolters Kluwer (Netherlands: Industrials), a diversified professional software provider; Dino Polska (Poland: Consumer Staples), a low-cost grocery retailer; and Ashtead (United Kingdom: Industrials), which rents construction and industrial equipment to customers in the United States and further afield.

The Fund sold Teqnion (Sweden: Industrials), due to lower confidence in the quality of management and stewardship; Unilever (United Kingdom: Consumer Staples), due to the high valuation amidst an uncertain turnaround; and SFS (Switzerland: Industrials), in preference for other opportunities.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager believes that the Fund has a portfolio of great sustainability companies which are adaptable, high-quality, generate regular cash inflows and have strong competitive positions in different market segments. The leaders of these companies understand the value of staying close to their customers and steward their balance sheets carefully. They ensure their companies are as well placed to deal with emergent risks as they are to capitalise on long-term opportunities. The Fund will stay focused on the long-term, fundamental prospects of the companies held and those being watched closely. While the portfolio is in good shape, the Investment Manager will keep searching for companies that might improve overall portfolio risk-return characteristics.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Meituan as the company reduced its losses in community group buying ("CGB") and conducted share buybacks. Tencent also rose as it continued to develop new functions to improve monetisation and enhance the quality of the franchise. On the negative side, China Resources Beer ("CRB") fell as weak demand led to a decrease in beer sales volumes, although its execution has been decent amid a difficult environment. Shanghai Liangxin Electrical was de-rated due to weak sales and exposure to the property market.

Portfolio Changes

New purchases included Kangji Medical, a leading Chinese company in minimally invasive surgical instruments and accessories. The company leads in several product categories given its high product quality and long-term relationships with doctors. The Fund also bought Netease, the second-largest gaming company in China. The company has a portfolio of mid-sized games with proven long-term popularity. It also has a strong pipeline that should support decent growth prospects.

The Fund sold China Resources Land and China Taiping Insurance to consolidate into more attractive opportunities.

Outlook

The Chinese economy is undergoing difficulties. Overall corporate earnings growth has been under pressure while domestic demand is likely to remain weak. As bottom-up* investors, the Fund looks for companies which can grow earnings in a sluggish growth environment. Perhaps they are gaining market share, monetising existing businesses or simply have stronger pricing power in a more consolidated industry. Chinese companies are also becoming more proactive in returning cash to shareholders, through increased dividends and buybacks. Meanwhile, even though overall demand is weak, there are still certain secular growth trends in China, such as travel. By sticking to its investment philosophy, the Fund still expects to find pockets of growth and deliver decent returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Cyient (India: Information Technology), where growth has stalled due to a slowdown in demand; GMM Pfaudler (India: Industrials), also suffered from a period of slower demand; and Blue Dart Express (India: Industrials), which has faced short-term profit pressure due to underutilisation of its new freighters.

Contributors to performance included Mahindra & Mahindra (India: Consumer Discretionary), which continues to deliver attractive levels of growth and also improve the market position of its auto and farm segments; CG Power and Industrial Solutions (India: Industrials), which benefitted from continued progress in their business franchise and also saw a pick-up in capital spending by their customers; and Triveni Turbine (India: Industrials), which has seen strong growth over the year from positive momentum in both domestic Indian and overseas markets.

Portfolio Changes

The Fund bought SKF India (India: Industrials), India's largest maker of ball bearings which are important for the smooth functioning of manufacturing plants, automotive products and railways; ICICI Lombard General Insurance (India: Financials), one of India's largest private sector general insurance companies; and VST Tiller Tractors (India: Industrials), India's leading maker of small farm equipment.

The Fund sold Kotak Mahindra Bank (India: Financials), to fund better ideas elsewhere; Mahindra & Mahindra Financial Services (India: Financials) due to lower confidence in the path of growth for the business; and HDFC Life Insurance (India: Financials) due to complexities in their financial quality and higher competition in the sector.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager is often asked by clients if India is too expensive now. This is understandable given the large rise in the MSCI India Index over the last five years and past 12 months. Two answers to this are: firstly, that the Fund does not invest in the index but is instead aiming to find and own the highest-quality companies the Investment Manager can find; and secondly, that the Investment Manager monitors valuations and company position sizes to try and ensure investments in the Fund deliver good long-term returns while also protecting capital. To that end, the Investment Manager still see lots of reasons to be positive about the outlook for the Fund's Indian holdings.

##No performance return has been presented for the year as the share cass has not been in existence for a full year.

Performance

Detractors to performance included Samsung Electronics (South Korea: Information technology), which continues to suffer from fears about the semiconductor division and weaker demand from memory chip customers; Allegro (Poland*: Consumer Discretionary), provided weaker than expected forecasts to the market, especially in its international business; and Raia Drogasil (Brazil: Consumer Staples), which has suffered as Brazil's economic situation has faced growing concerns.

Positive contributors included EPAM Systems (United States: Information Technology), which is seeing increased demand from areas such as technology, media & telecoms and financial services, as clients look to do more with artificial intelligence; Mahindra & Mahindra (India: Consumer Discretionary), which continues to deliver attractive levels of growth and returns as it solidifies its position in the automotive and farm segments and also turns around underperforming subsidiaries; and Globant (Argentina**: Information Technology), which delivered good results and positive news from management on future demand.

Portfolio Changes

The Fund launched during the period. In addition, the Fund bought NAVER (South Korea: Communication Services), the leading South Korean internet search engine with a very strong market share. The founder and steward, Lee Hae-jin, has brought in a new management team which is aiming to return the company to a path of steady and profitable growth.

The Fund sold Kotak Mahindra Bank (India: Financials), which saw some regulatory issues earlier in the year and is also facing increased competition.

*Poland is where the company is head quartered.

^{**}Argentina is where the company's principal operating subsidiary is based.

Stewart Investors Global Emerging Markets (ex China) Leaders Fund

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager believes that valuations in emerging markets are at attractive levels alongside long-term growth opportunities that they can support for a long time. The Fund continues to focus on individual company analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development opportunities these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

(Performance calculation is based on official dealing NAV)

*Inception date – 13 August 2024

**Please see Note 17 for details on the sub fund name changes which occurred during the period.

##No performance return has been presented for the year as the share cass has not been in existence for a full year.

Performance

Detractors to performance included Samsung Electronics (South Korea: Information Technology), which has struggled in leading edge memory conductors versus its competitor SK Hynix; Tube Investments of India (India: Consumer Discretionary), which suffered from short-term declines in the share price following a strong period; and IndiaMART InterMESH (India: Industrials), who declined due to recent higher customer churn rates.

Positive contributors to performance included Vitasoy International (Hong Kong: Consumer Staples), which saw growth in all regions and higher profits from lower input costs; SHIFT (Japan: Information Technology), which did better after a tough period of excess capacity and saw an acceleration in demand; and Mahindra & Mahindra (India: Consumer Discretionary), due to improving demand and outlook for both the automotive and farm equipment businesses.

Portfolio Changes

The Fund launched during the period. In addition, the Fund bought Dongguan Yiheda Automation (China: Industrials), China's leading supplier of factory automation components; DFI Retail (Hong Kong: Consumer Staples), a pan-Asian retailer led and stewarded by the Jardine family; and NAVER (South Korea: Communication Services), South Korea's dominant internet search engine which has significantly improved how it allocates and spends its financial resources in recent years.

The Fund sold Kotak Mahindra Bank (India: Financials), to fund better ideas elsewhere; Advanced Energy Solution (Taiwan: Industrials), due to lower confidence from being unable to meet them; and Samsung C&T (South Korea: Industrials), due to lower confidence and to fund other opportunities.

Investment Manager's Report (Unaudited) (continued)

Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for leaders and stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

First Sentier Investors (Ireland) Limited January 2025

Performance Table as of 31 December 2024 (Unaudited)

Financial period	Total net asset value	Net asset value per share	The highest issue price	The lowest redemption price

*Stewart Investors GEM Leaders Sustainability Fund 2023 closed on 12 December 2022.

**Stewart Investors Indian Subcontinent Sustainability Fund launched on 17 January 2023.

1. Organisation

First Sentier Investors Global Umbrella Fund plc (the "Company") was incorporated on 18 June 1998 and registered as an open-ended umbrella investment company with variable capital in Ireland under the Companies Act, 2014. The authorised share capital of the Company is five hundred billion shares of no par value initially designated as unclassified shares.

The sole objective of the Company is the collective investment in transferable securities and/or in other liquid financial assets referred to in the Central Bank UCITS Regulations of capital raised from the public and which operates on the principle of risk spreading.

2. Principal accounting policies

(a) Basis of presentation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"), and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB.

The financial statements are prepared under a going concern basis.

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. If in the future such estimates and assumptions, which are based on management's best judgement at the date of the financial statements deviate from the actual outcome, the original estimates and assumptions will be modified as appropriate in the financial year which the circumstances change.

The financial statements have also been prepared in accordance with the Central Bank (Supervision and Enforcement Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations") and comply with the principles of the Hong Kong and Futures Commission ("SFC") Code on Unit Trust and Mutual Funds (the "Code").

In order to align with the requirements of IFRS 13 to measure fair value at the end of the reporting period, the financial statements have been prepared at closing bid prices on the final business day of the financial year. This differs to how the published NAV is prepared where mid prices at 11:00 a.m. (Irish time) are utilised in accordance with the prospectus. The financial statements also include investment transactions up to close of business on the final business day of the financial year.

2. Principal accounting policies (continued)

(a) Basis of presentation (continued)

All dealing in the Company's shares on the final business day of the financial year is incorporated in the financial statements.

All references to net assets in the financial statements refer to net assets attributable to redeemable participating shareholders unless otherwise stated.

The format and certain wordings of the financial statements have been adapted from those contained in IFRS as adopted by the European Union and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

New/Changes in accounting standards

There are no new standards, interpretations to standards or amendments to standards that have been issued and are not yet effective, which would have a material impact on the financial statements of the Company.

(b) Financial assets and liabilities designated at fair value through profit or loss

The Company has designated its investments as financial assets and liabilities designated at fair value through profit or loss. There are two categories of investments:

- Financial assets and liabilities held for trading these are acquired or incurred principally for the purpose of selling or repurchasing in the short term, and
- Financial assets and financial liabilities designated by management at fair value through profit or loss at inception these are financial instruments that are not classified as held for trading, but are managed and their performance are evaluated on a fair value basis in accordance with the Company's documented investment strategy.

All investments have been categorised as financial assets and liabilities designated at fair value through profit or loss at inception.

2. Principal accounting policies (continued)

(b) Financial assets and liabilities designated at fair value through profit or loss (continued)

Purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value and are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership. Subsequent to initial recognition, all financial assets and financial liabilities designated at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities designated at fair value of the Statement of Comprehensive Income ("SCI") in the financial year in which they arise with the realised gains and losses calculated using a First-in, First-out ("FIFO") method.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities of securities listed or dealt in on a regulated market shall be valued at the bid prices at the close of business on the final business day of the financial year 31 December 2024 for financial statement purposes. Where a security is listed or dealt in on more than one regulated market, the Directors may at their absolute discretion, select any one of these regulated markets for such purposes.

The Board of Directors has appointed a Fair Value Pricing Committee ("FVPC") to ascertain the value of relevant securities in the event that market prices are unavailable, that they do not represent probable realisation value or are not listed.

Futures contracts are recorded on the trade date and are valued at the applicable bid prices on the last business day of the period. Forward foreign exchange contracts are recorded on the trade date and are valued at the applicable foreign exchange rates on the last business day of the period. Interest rate swaps and credit default swaps are valued at estimated fair values as determined by the swap counterparties. Certificates of deposit investments are based on the underlying cash originally invested in the certificate which approximates fair value. Options are valued at the settlement price agreed in the option contract.

The difference between the original contract amount and the fair value of open positions is the unrealised appreciation or depreciation and is reflected in financial assets and liabilities designated at fair value through profit or loss on the Statement of Financial Position ("SFP") and as a net change in unrealised appreciation or depreciation in financial assets and liabilities designated at fair value through profit or loss in the Statement of Comprehensive Income ("SCI").

Realised gains or losses are recognised on the closing, maturity, expiry or trade date of the contract and are included in realised gain/(loss) on financial assets and liabilities designated at fair value through profit or loss in the SCI.

Further details on derivative contracts are included in Note 9.

2. Principal accounting policies (continued)

(c) Valuation of financial assets and liabilities

Holdings in other investment funds are valued at the last available net asset value per unit or share or other similar participation or the last available traded price. These investments are recorded on their trade date in financial assets and liabilities designated at fair value through profit or loss in the SFP. The change in fair value is recorded as an unrealised gain/(loss) within net changes in unrealised appreciation/ (depreciation) on financial assets and liabilities designated at fair value through profit or loss in the SCI. Upon derecognition of these holdings, the amount previously recognised in the SFP is recognised as a realised gain or loss in realised gain/(loss) on financial assets and liabilities designated at fair value through profit or loss in the SCI.

The Company may also value certain less liquid investments using a quote from a single broker as an estimate of fair value. Because of their inherent uncertainty, estimated fair values may differ significantly. These less liquid investments have a greater amount of risk and exposure to market volatility than many other investments. These investments trade in a limited market and may not be able to be immediately liquidated at these estimated fair values if needed. Furthermore, the estimated net realisable value of a Fund's investments may be affected by economic and political developments in a specific country or region and those effects could be material to the financial statements. Such investments will be classified as level 3 investments within the fair value hierarchy in Note 6.

(d) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the SFP when there is a legally enforceable right to set-off recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liability simultaneously.

(e) Foreign currency translation

(i) Functional and presentation currency

The Board of Directors considers the US Dollar the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The US Dollar is the currency in which the Company measures its performance and reports its results, as well as the currency in which it principally receives subscriptions and redemptions from its investors. The Company has adopted the US Dollar as its presentation currency except for the Stewart Investors European All Cap Fund*, for which the presentation currency is Euro.

(ii) Transactions and balances

Monetary assets and liabilities denominated in currencies other than the presentation currency are translated into the presentation currency at the closing rates of exchange at financial year-end. Transactions during the financial year, including purchases and sales of securities, income and expenses, are translated at the rate of exchange prevailing on the date of the transaction. In SFP, year-end exchange rate is used to translate Euro balances of the Stewart Investors European All Cap Fund* to US Dollar and include its amount in total and in SCI, average exchange rate for the period is used to translate its amounts and include in the total amount.

2. Principal accounting policies (continued)

(e) Foreign currency translation (continued)

(ii) Transactions and balances (continued)

Foreign exchange gains and losses arising from translation are included in the SCI. Foreign exchange gains/losses relating to cash and cash equivalents are presented in the SCI within "Net (Loss)/Gain on foreign exchange" and foreign exchange gains/losses relating to financial assets and liabilities carried at fair value through profit or loss are presented in the SCI within "Net Changes in Unrealised Appreciation/(depreciation) on financial assets and liabilities designated at fair value through profit or loss".

(f) Income

Interest income/expenses are recognised in the SCI for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Dividend income is credited to the SCI on the date on which the relevant securities are listed as "exdividend". Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the SCI, and net of any tax credits. Dividends from US real estate investment trusts ("REITs") are recognised as distributable revenue when the securities are quoted ex-dividend. On receipt of the capital/revenue split in the following calendar year, the allocation of the dividend is adjusted within the Financial Statements.

(g) Expenses

Expenses are accounted for on an accruals basis and are charged to the SCI when incurred.

Shareholders should note that 100% of the investment management fees and operational expenses of the FSSA Asian Equity Plus Fund, the First Sentier Global Listed Infrastructure Fund, the First Sentier Global Property Securities Fund, and the First Sentier Responsible Listed Infrastructure Fund will be charged to the capital of the relevant Fund. The reason for charging these expenses against capital is to seek to increase the amount of distributable income but this may be achieved by foregoing the potential for future capital growth. This will have the effect of lowering the capital value of a shareholder's investment. Thus on redemptions of holdings, shareholders may not receive back the full amount invested.

Any fees and expenses relating to monthly distributing share classes will be charged against capital to increase the amount of distributable income but this may be achieved by foregoing the potential for future capital growth. The monthly distributing share classes are included in First Sentier Asian Quality Bond Fund and First Sentier Asia Strategic Bond Fund.

2. Principal accounting policies (continued)

(h) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and bank. Cash and cash equivalents are measured at amortised cost with the relevant interest accrued and charged to the SCI when incurred.

(i) Due to and from brokers

Amounts due to/from brokers represent payables for investments purchased and receivables for securities sold that have been contracted for but not yet delivered or settled by the end of the financial year.

These amounts are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment for amounts due from brokers. As per IFRS 9 expected credit loss assessment, a provision for impairment of amounts due from brokers is established when there is objective evidence that the Company will not be able to collect all amounts due from the relevant broker. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and defaults in payments are considered indicators that the amount due from brokers is impaired. Once a financial asset or group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

(j) Distributions to holders of redeemable participating shares

Distributions to holders of redeemable participating shares are recognised in the SCI as finance costs when they are appropriately authorised and no longer at the discretion of the Company. The Directors do not intend to declare or pay any dividends, except in the case of the distributing share classes.

Dividends may be paid out of net revenue (including interest and dividends) plus realised and unrealised profits on the disposal/valuation of investments and other funds, less realised and unrealised losses (including fees and expenses).

Shareholders should note that in the case of some funds that 100% of the investment management fees and operational expenses are charged to capital to increase the amount of distributable income – refer to note (g) for a list of the relevant Funds.

The dividends which accrue monthly shall normally be paid at the end of each month. The dividends which accrue for the half year periods ending 30 June and 31 December shall normally be paid by the end of August and February respectively in each year. The dividends which accrue for the quarter year periods ending 31 March, 30 June, 30 September and 31 December shall normally be paid by the end of February, May, August and November respectively in each year.

In the case of monthly distributing share classes in First Sentier Asian Quality Bond Fund and First Sentier Asia Strategic Bond Fund, the monthly dividend rate per share is calculated by the Investment Manager based on the estimated income attributable to those share classes.

2. Principal accounting policies (continued)

(j) Distributions to holders of redeemable participating shares (continued)

In maintaining a regular monthly dividend payment, a Fund may at times pay dividends out of capital of the Fund instead of income which may have different tax implications from the payment of dividends out of income and may also result in an erosion of the capital invested. Whilst the monthly distributing share classes provide the benefit of a regular dividend payment, shareholders should be aware that in some cases an adjustment to the payment may be required, and this may result in a decrease or increase in dividend rate and payment. The Investment Manager will review the dividend rate for each such share class at least semi-annually, but may adjust the dividend rate more frequently if necessary to reflect changes in the expected income levels.

(k) Redeemable participating shares

The Company issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the SFP date if the holder exercises the right to put the share back to the Company.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Company's net asset value per share at the time of issue or redemption. The Company's NAV per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares with the total number of outstanding redeemable participating shares. In accordance with the provisions of the Company's Articles of Association, investment positions are valued based on the last traded price for the purpose of determining the net asset value per share for subscriptions and redemptions.

The Company has minimum initial investment, minimum subsequent investment amounts and minimum holdings in relation to each share class as detailed in the prospectus. In the interests of shareholder protection, the Directors may limit the number of participating shares of any Fund redeemed on any dealing day to 10% of the total number of participating shares of that Fund in issue. The limitation will apply pro rata to all shareholders wishing to redeem the participating shares on that dealing day. The participating shares not redeemed but which would otherwise have been redeemed will be carried forward for redemption on the next and successive dealing day until all of the shares to which the original request related have been redeemed. The relevant movements are shown on the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

Each Fund will maintain an equalisation account with a view to ensuring that the level of dividends payable on shares (or the reportable income arising in respect of any class approved as a reporting Fund) is not affected by the issue and redemption of such shares during an accounting period.

The subscription price of such shares will therefore be deemed to include an equalisation payment calculated by reference to the accrued income of the Fund and the equalisation payment will be refunded to the shareholders as part of their first distribution, but for tax purposes will be treated as a return of capital. The redemption price of each share will also include an equalisation payment in respect of the accrued income of the Fund up to the date of redemption.

2. Principal accounting policies (continued)

(l) Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and any deemed disposal of shares for Irish tax purposes arising as a result of the holding of shares for an eight-year period or more. No Irish tax will arise on the Company in respect of chargeable events in respect of:

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations and such authorisation has not been withdrawn; and

(b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Capital Gains Tax accruals for unrealised gains are in place for securities held in India and Bangladesh. The Investment Manager continues to monitor changes in tax regimes across other jurisdictions but, as at the date of these financial statements, all other overseas capital gains tax is recognised when paid, and no provision is made for this.

(m) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs for all financial assets carried at fair value through profit and loss are included in the SCI. These include fees and commissions paid to brokers and counterparties and have been classified within gains and losses. Transaction fees paid to the Depositary on trade settlement are expensed as incurred and included in the SCI. Transaction costs are detailed in Note 6.

(n) Collateral

Cash collateral provided by the Company is identified in the SFP as margin cash and is not included as a component of cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Fund classifies that asset in its SFP separately from other assets and identifies the asset as pledged collateral.

Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

As at 31 December 2024 and 31 December 2023, there was no collateral held by the Funds other than cash.

2. Principal accounting policies (continued)

(o) Preliminary expenses

In the published NAV preliminary expenses incurred in the formation of new sub-fund are amortised over five years. In the financial statements preliminary expenses are written off in full for financial reporting purpose.

The below table shows the unamortised preliminary expenses written off in full for financial statement purposes as at 31 december 2024 and 31 December 2023:

The Manager is also entitled to reimbursement of any expenses reasonably incurred to enable it to perform its duties in relation to the Company. The management charge for the financial year for each Fund is disclosed in the SCI. The total amount due to the Manager at 31 December 2024 was US\$17,243,991 (2023: US\$16,294,989).

3. Fees and expenses (continued)

Management fees (continued)

The Manager will delegate the investment management functions to the Investment Managers who in turn may sub-delegate the investment management functions to the Sub-Investment Managers. The Manager shall pay the fees and out of pocket expenses of the Investment Managers and Sub-Investment Managers out of its own fee. Each Investment Manager shall pay out of its own fee the relevant fees and out of pocket expenses of any Sub-Investment Manager appointed by such Investment Manager.

Waivers and Reimbursement

The Manager and the Company have agreed that the operating expenses of the Class II shares of the following Funds should be set at the following rates as measured by the percentage of net assets:

Funds Class II	2024	2023
FSSA Asian Growth Fund	2.30%	2.30%
FSSA China Growth Fund	2.25%	2.25%
FSSA Indian Subcontinent Fund	3.00%	3.00%

When the normal operating expenses of a Fund fall below the set expense rates, the Fund is not required to pay the difference to the Manager. When the normal operating expenses of a Fund exceed these expense rates, the Manager will waive all or some of its fees and absorb other expenses of the Fund to maintain the set expense rate.

Subscription charges

The Manager is entitled to a preliminary charge of up to 5% relating to subscriptions in the Company for all Classes for all Funds. For the financial year ended 31 December 2024 the income accruing to the Manager relating to subscriptions in the Company was immaterial (2023: immaterial).

Depositary and administration fees

HSBC Continental Europe (the "Depositary") is entitled to a fee of 0.01% per annum of the Net Asset Value of each Fund. The Depositary's fee is determined by reference to the calculation of the Net Asset Value of each Fund on each Dealing Day and is payable monthly in arrears. The Depositary is also entitled to a safe-keeping fee from the Company for all Classes of shares, of up to 0.45% per annum on the asset value of securities depending on the location of the assets held.

HSBC Securities Services (Ireland) DAC (the "Administrator") is entitled to a fee of up to 0.03% per annum of the Net Asset Value of each Fund. The Administrator's fee is determined by reference to the calculation of the Net Asset Value of each Fund on each Dealing Day and is payable monthly in arrears.

3. Fees and expenses (continued)

Directors' fees

The Directors of the Company who are not employed by or affiliated with the Manager are entitled to remuneration for their services as Directors.

The Directors are entitled to be reimbursed for any reasonable out of pocket expenses incurred in execution of their duties. The total Directors fees for the financial year ended 31 December 2024 were US\$163,992 (2023: US\$120,737).

Auditors' fees

Fees accrued to the statutory auditors, Deloitte Ireland LLP, in respect of the financial year ending 31 December 2024 and 31 December 2023 are as follows:

	2024 US\$*	2023 US\$*
Audit of financial statements	283,498	282,177
Total	283,498	282,177

*Invoices are issued in Euro and amounts are shown exclusive of VAT

Swedish Krona	11.45399	11.07573
Swiss Franc	0.94170	0.92675
United States Dollar	1.04130	1.10650

5. Soft commission

All research and advisory services are paid by the Investment Managers/Sub-Investment Managers and there are no soft commissions as part of trading.

6. Financial assets and liabilities designated at fair value through profit or loss

In determining an instrument's placement within the fair value hierarchy, the Directors separate the Company's investment portfolio into two categories: investments and derivative instruments. Each of these categories can further be divided between financial assets or financial liabilities.

Investments

Investments whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include active listed equities and bonds, certain U.S. government and sovereign obligations, and certain money market securities. The Directors do not adjust the quoted price for such instruments, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include certain U.S. government and sovereign obligations, most government agency securities, certain mortgage products, investment-grade corporate bonds, certain bank loans and bridge loans and less liquid listed equities, bonds state, municipal and provincial obligations and investments in other funds. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments include certain investments valued using an estimate of fair value. When observable prices are not available for these securities, the Directors use one or more valuation techniques (e.g., the market approach or the income approach) for which sufficient and reliable data is available. Within Level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors. The Level 3 investments are priced by the relevant competent party and the method is approved by the Directors.

Level 3 valuations are reviewed on a monthly basis by the FSI - Fair Value Pricing Committee ("FVPC"). The FVPC considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognised as standard within the industry.

There were no level 3 holdings held by the Company as at 31 December 2024 (31 December 2023: nil).

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

Derivative contracts

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as warrants and future contracts, and OTC derivatives, such as forward currency contracts, options, credit default swaps and interest rate swaps, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

The Company considers the transfers between different levels to occur when there is a change in significant observable and unobservable inputs for a particular investment.

The Company's assets and liabilities (by class) not measured at fair value but for which fair value is disclosed have the following levels: Level 1 - cash and cash equivalents, margin accounts, bank overdrafts, Level 2 - remaining classes of financial assets and liabilities on the Statement of Financial Position. These assets and liabilities are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

The following table presents the financial instruments carried on the Statement of Financial Position by caption and by level within the valuation hierarchy as at 31 December 2024 and 31 December 2023.

Sustainability

7. Incorporation and share capital

As of 31 December 2024, 3 fully paid subscriber shares of EUR 1.25 were in issue. The subscriber shares are not entitled to any dividends or to participate in the profits of the Company beyond the amount of capital paid up on issue, have not been included in the financial statements, and are held by First Sentier Investors (Hong Kong) Limited and First Sentier Investors Nominees (Hong Kong) Limited.

The Company may issue up to 500,000,000 participating shares of no par value.

Holders of participating shares of the Funds are entitled to one vote per participating share. Participating shares of the Funds are also entitled to share in any dividends and profits of those specific Funds, and are redeemable at the option of the shareholder.

An anti-dilution adjustment may be payable by the shareholders from time to time as determined by the Manager in respect of net subscriptions or net redemptions in a Fund. The amount of the anti-dilution levy is intended to cover dealing costs in order to protect continuing shareholders in that Fund.

8. Risk arising from financial instruments

The Company's investment objective is to seek capital growth and/or dividend income from a portfolio of securities in respect of the Funds. The holding of securities and investment activities undertaken pursuant to this objective involves certain inherent risks. Below is a description of the principal risks inherent in the Company's activities along with the actions it has taken to manage these risks.

The Company's assets and liabilities comprise financial instruments which include:

- investments including equity shares, fixed income securities, floating rate securities, investment funds, future contracts and forward currency contracts. These are held in accordance with a Fund's investment objective and policies; and
- cash, liquid resources and short-term debtors and creditors that arise directly from its investment activities.

8. Risk arising from financial instruments (continued)

As an investment fund, the Company buys, sells or holds financial assets and liabilities in order to take advantage of changes in market prices or rates.

The main risks arising from the Company's operations are market risk comprising equity price risk, foreign currency risk, interest rate risk, credit risk and liquidity risk. The Board of Directors review and agrees policies for managing each of these risks and they are summarised below. These policies have remained substantially unchanged since the beginning of the financial year to which these Financial Statements relate.

The Company is also exposed to custody risk. Custody risk is the risk of loss of securities held in custody occasioned by the insolvency or negligence of the depositary. Although an appropriate legal framework is in place that seeks to reduce the risk of loss of value of the securities held by the depositary, in the event of its failure, the ability of the Company to transfer securities might be temporarily impaired.

The Depositary is under a duty to take into custody and to hold the property of each Funds of the Company on behalf of its shareholders. The Central Bank of Ireland requires the Depositary to hold legally and separately the non-cash assets of each Funds and to maintain sufficient records to clearly identify the nature and amount of all assets that it holds, the ownership of each asset and where the documents of title to such assets are physically located. When the Depositary employs a Sub-Depositary, the Depositary retains responsibility for the assets of the Funds.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Funds. Therefore, in such jurisdictions, there is a risk that if a Sub-Depositary becomes bankrupt or insolvent, the Funds beneficial ownership of the assets held by such Sub-Depositary may not be recognised and consequently the creditors of the Sub-Depositary may seek to have recourse to the assets of the sub-funds. In those jurisdictions where the Funds beneficial ownership of its assets is ultimately recognised, the Funds may suffer delay and cost in recovering those assets. The Funds may invest in markets where custodial and/or settlement systems are not fully developed, where the assets of a Fund which are traded in such markets have been entrusted to sub-depositaries, in circumstances where the use of such sub-depositaries is necessary and may be exposed to risk in circumstances whereby the Depositary will have no liability.

(a) Price risk

Price risk is the risk that the fair values of equities or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk).

The investments of the Company are subject to market fluctuations and the risks inherent in investment in international securities markets and there can be no assurances that appreciation will occur. It is the policy of the Manager to maintain a diversified portfolio of investments for each Fund so as to minimise risk.

The Company strives to invest in strong businesses with quality management and at sensible prices. The Company's preferred strategy is to hold equity investments for the medium-to-long term. The Manager is therefore not concerned by short-term equity price volatility with respect to its investments provided that the underlying business, economic and management characteristics of its investments remains favourable.

8. Risk arising from financial instruments (continued)

(a) Price risk (continued)

The carrying values of investments subject to equity price risk are, in almost all instances, based on quoted market prices as of the Statement of Financial Position dates. Market prices are subject to fluctuation and, consequently, the amount realised in the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investment, the relative price of alternative investments and general market conditions. Furthermore, amounts realised in the sale of a particular security may be affected by the relative quantity of the security being sold.

The Manager manages the exposure to equity price risk by constructing a diversified portfolio from which it expects the underlying companies it invests in to perform differently in reaction to different risk influences. The Manager monitors the equity price risk in a Fund's portfolio through both the volatility of the underlying holdings and their combined volatility. The Manager expects portfolios to carry a certain level of equity price risk and uses such risk measurement to highlight unintended risks in the portfolio.

The investment concentrations within the portfolio for each Fund are disclosed in the schedule of investments by investment type. The following table summarises the effect on the net assets attributable to redeemable participating shareholders for equity funds, as at 31 December 2024 and 31 December 2023 of a reasonably possible change in the benchmark as applied to the respective beta.

The reasonably possible change in the benchmark has been determined by using the last five-year annualised benchmark returns. Where a Fund has a history of less than one year, since inception benchmark returns and beta will be used for calculation.

Also, as some of the funds have not been in existence for more than five years, the five-year annualised benchmark returns and beta are not available, therefore, three-year, one year and less than one-year data has been applied for calculation. For Stewart Investors European All Cap Fund*, the hypothetical change in the benchmark has been determined by using the 3-year benchmark return and beta for calculations. For the FSSA All China Fund and Stewart Investors Indian Subcontinent All Cap Fund, the hypothetical change in the benchmark has been determined by using the one-year benchmark return and the beta for calculations. For the Stewart Investors Global Emerging Markets (ex China) Leaders Fund* and Stewart Investors Asia Pacific and Japan All Cap Fund*, the hypothetical change in the benchmark has been determined by using the intervent of the benchmark has been determined by using the stewart (ex China) Leaders Fund* and Stewart Investors Asia Pacific and Japan All Cap Fund*, the hypothetical change in the benchmark has been determined by using the intervent of the benchmark has been determined by using the hypothetical change in the benchmark has been determined by using the hypothetical change in the benchmark has been determined by using the hypothetical change in the benchmark has been determined by using the hypothetical change in the benchmark has been determined by using the hypothetical change in the benchmark has been determined by using the less than one-year benchmark return and beta for calculations (note this uses a benchmark since inception and a beta of 1).

The performance of the equity Funds below does not necessarily follow the relevant benchmark and the holdings of the Funds might be different to the benchmark.

^{*}Please see Note 17 for details on the sub fund name changes which occurred during the period.

**Stewart Investors Global Emerging Markets (ex China) Leaders Sustainability Fund launched on 11 July 2024. Please see Note 17 for details on the sub fund name changes which occurred during the period.

***Stewart Investors Asia Pacific and Japan Sustainability Fund launched on 13 August 2024. Please see Note 17 for details on the sub fund name changes which occurred during the period.

An equal change in 5-year annualised benchmark in the opposite direction would have decreased or increased the net assets attributable to redeemable participating shareholders by an equal but opposite amount.

The Company may employ investment techniques and instruments including but not limited to futures, forward contracts, options, interest rate swaps, contracts for difference and credit default swaps for the efficient portfolio management purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Funds with an appropriate level of risk, taking into account the risk profile of the Funds. Only the First Sentier Global Credit Sustainable Climate Fund could invest in financial derivative instruments for investment purposes. First Sentier Global Credit Sustainable Climate Fund climate Fund closed on 9 May 2024.

Details of the Company's investment portfolio and derivatives at the SFP date are disclosed in the Schedules of Investments.

8. Risk arising from financial instruments (continued)

(a) Price risk (continued)

The Company used the absolute value at risk ("VaR") model to calculate the First Sentier Global Credit Sustainable Climate Fund's global exposure. The Fund's global exposure, using the absolute VaR approach, was calculated on the following basis:

- Calculation frequency: Daily
- Absolute VaR limit: 20%
- Confidence level: 99%
- Holding period: 1 month (20 Business Days)
- Historical observation period: More than 1 year (250 Business Days). A shorter observation period may be used if justified by a significant increase in price volatility (example in case of extreme market conditions)
- Quarterly data set updates, or more frequent when market prices are subject to material changes
- Model: Enhanced Historical VaR

First Sentier Global Credit Sustainable Climate Fund closed on 9 May 2024, hence, no table for VaR measures and leverage levels is disclosed for 2024.

The below table provides an analysis of the VaR measures and leverage levels for the Company for the financial year ended 31 December 2023 for First Sentier Global Credit Sustainable Climate Fund.

	31 December 2023
VaR as at the financial year end	4.49%
Lowest VaR limit utilised during the financial year	3.77%
Highest VaR limit utilised during the financial year	8.54%
Average VaR limit utilised during the financial year	5.03%
Leverage level employed during the financial year	150.4%

An inherent limitation of VaR is that it seeks to analyse historical experiences to assess risk. Risk events may occur that are significantly different to those historically encountered. It may lead to an underestimation of the loss estimate.

The Company uses the commitment approach to calculate the other Funds' global exposure to ensure that the use of financial derivative instruments is within limits specified by the Central Bank of Ireland. Please be advised that there were no breaches of 20% absolute VaR during the reporting period.

(b) Foreign currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Net Asset Value of each Fund is computed in the functional currency of that Fund, whereas the Fund's investments may be acquired in other currencies. The value in terms of the functional currency of the investments of a Fund may rise or fall due to exchange rate fluctuations of individual currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. It may not be possible or practicable to hedge against the consequent currency risk exposure in all circumstances.

8. Risk arising from financial instruments (continued)

(b) Foreign currency risk (continued)

The international nature of a Fund's investment activities gives rise to a currency risk which is inherent in the performance relative to its base currency of its non-US Dollar denominated investments. It is generally not a Fund's policy to hedge this risk on a continuing basis, but the Fund may do so from time to time. No foreign currency risk was calculated on Funds terminated during the year.

Monetary assets and liabilities are those fixed by contract or by their nature. They include monetary assets such as cash, debtors and debt securities, and exist as money or as claims to specified sums of money. Non-monetary items are assets and liabilities such as equity securities. The foreign exchange exposure relating to non-monetary assets and liabilities is considered to be a component of market price risk not foreign currency risk and is therefore not included in the sensitivity analysis below. Currency risk will only be significant on the fixed income funds which are heavily invested in monetary assets and liabilities.

The Funds acquire investments in a range of currencies other than the functional currency. The following tables set out the total exposure to foreign currency risk in all Funds with non-US Dollar exposure at 31 December 2024 with comparative figures as at 31 December 2023. These tables also show the effect of an estimated 5% change in the underlying exchange rates applied immediately and uniformly across all currencies. In considering this analysis however, it should be noted that the Investment Manager has not applied this 5% change to the Hong Kong Dollar as this currency is strongly linked to the US Dollar. Therefore, the Investment Manager would expect this currency to move in line with the US Dollar. The changes in value do not necessarily reflect the best or worst case scenarios and actual results may differ.

(c) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of markets interest rates on the fair value of financial assets and liabilities and future cash flow.

Any cash and cash equivalents, time deposits and bank overdrafts held by the Funds are held in the short term market rates and therefore are not exposed to significant amounts of interest rate risk. The majority of the assets of the Funds are equity shares which neither pay interest nor have a maturity date apart from the bond funds: First Sentier Global Bond Fund, First Sentier Asia Strategic Bond Fund and First Sentier Asian Quality Bond Fund.

The fair values of the Company's fixed income investments will fluctuate in response to changes in market interest rates. Increases and decreases in prevailing interest rates generally translate into decreases and increases in fair values of those instruments. Additionally, fair values of interest rate sensitive instruments may be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions. Fixed interest rate investments may be more sensitive to interest rate changes than variable rate investments.

The Company's strategy is to acquire fixed income securities that are attractively priced in relation to the perceived credit risk. The Investment Manager recognises and accepts that losses may occur.

The Investment Manager mitigates interest rate risk by constructing a diversified portfolio of fixed income securities with differing modified duration and term to maturity characteristics, which acts to reduce the Funds' overall exposure to interest rate risk.

8. Risk arising from financial instruments (continued)

(c) Interest rate risk (continued)

The Investment Manager constantly monitors its view of the Funds' exposure to interest rate risk and makes decisions accordingly about the composition of the Funds' portfolio of fixed income securities in order to ensure the interest rate risk in the portfolio is maintained at an appropriate level.

The First Sentier Global Bond Fund, First Sentier Asia Strategic Bond Fund and First Sentier Asian Quality Bond Fund hold a majority of their assets in bonds. The following tables set out the interest profile of these financial assets at 31 December 2024 with comparative figures as at 31 December 2023. An estimate is also given of the effects of a hypothetical 100 basis points increase and decrease in interest rates on assets that are subject to interest rate risk. The sensitivity analysis includes both fixed and floating rate debt securities.

The basis of the calculation is using the modified duration of the Fund as a whole (being a weighted average of the modified duration of each security). No specific assumptions have been made on the durations other than that all securities make coupon and capital payments in line with their contractual requirements. In using this method to show sensitivity to interest rate movements, it has been assumed that an interest rate movement on the scale shown is replicated for each security to the same amount.

This last assumption is the key limitation of using this methodology, since any general movement in interest rates may result in a different movement in the rate for different securities; however, it is believed to be the most appropriate method of illustrating the effect of a theoretical movement in rates and therefore the overall interest rate sensitivity of each Fund.

At 31 December 2024, should interest rates have lowered by 100 basis points with all other variables remaining constant, the increase in net assets attributable to holders of redeemable shares for the financial year would amount to approximately US\$2,393,585 arising substantially from the increase in market values of debt securities (31 December 2023: US\$1,831,429). An increase in interest rates of 100 basis points would have had an equal but opposite effect.

US Dollar	13.27%	21.16 years

The Company uses the absolute value at risk ("VaR") model to calculate the First Sentier Global Credit Sustainable Climate Fund's global exposure. Risk on the fund is driven by credit spreads with the team using the Total Return Swap, sometimes as an overlay and sometimes as a hedge, for beta management.

(c) Credit risk

The Company takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due.

The Company's investments in fixed income securities are subject to credit risk. Credit risk reflects the possibility that a borrower will not be able to meet its obligation to make payments of interest or principal when they fall due. The Investment Manager analyses the credit risk of the Company's fixed income investments prior to purchase and continues to monitor developments in credit quality subsequently.

The Company is also exposed to counterparty credit risk on trading derivative products. To reduce the Company's counterparty credit exposures, securities trading is primarily conducted on recognised exchanges and on a delivery-versus-payment basis. In addition, the Investment Manager seeks to enter into netting agreements with counterparties that would allow receivables and payables to that counterparty to be offset. The counterparty has no right to sell or re-pledge this collateral asset received.

To measure and manage the Company's credit exposures, the Investment Manager primarily uses credit limits. While the Company's investment activities expose it to many different industries and counterparties, the Company routinely executes a high volume of transactions with counterparties in the financial services industry, including brokers and dealers and commercial banks, resulting in significant relative credit concentration with respect to this industry. In the ordinary course of business, the Company may also be subject to a concentration of credit risk to a particular counterparty, borrower or issuer; however, the Investment Manager controls this exposure through the use of counterparty, credit and issuer limits. In general, the limits applied (expressed as a value of each Fund) are 10% to individual issuers, 20% to deposit taking financial institutions, 5% (or 10% if an approved bank) to OTC derivative counterparties, and 20% to combined issuers/counterparties. Lower limits may be applied to individual issuers or counterparties if the Investment Manager feels it prudent to do so.

The Company's assets are safeguarded and held by the Depositary. The Investment Manager analyses the credit risk of the Company's Depositary prior to appointment and continues to monitor developments in its credit quality subsequently. In addition, the Investment Manager makes use from time to time of money market or exchange-traded funds or the placing of monies on deposit both in order to maximise return and to diversify the exposure of such assets. The Depositary has a short-term credit rating of P-1 (2023: P-1) as per Moody's. Further details of the cash and cash equivalents are shown in Note 10.

8. Risk arising from financial instruments (continued)

(d) Credit risk (continued)

The central counterparty used, during the financial years, 2024 and 2023, is CME, a financial market company operating an options and futures exchange.

All transactions in listed securities are settled/paid for upon delivery using the Depositary or its Sub-Depositaries. The risk of default is considered minimal, as delivery of securities sold is only made once the Depositary has received payment. Payment is made on a purchase once the securities have been received by the Depositary. The trade will fail if either party fails to meet its obligation. Substantially all of the securities and cash of the Company are held by HSBC Continental Europe. Bankruptcy or insolvency of HSBC Continental Europe, may cause the Company's rights with respect to securities and cash held by HSBC Continental Europe, to be delayed or limited. The Company's securities and other positions are segregated from the assets of the Depositary. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's assets are segregated from those of the Depositary. The Company, will, however, be exposed to the credit risk of the Depositary or sub-Depositary. The Company's cash is segregated from that of the Depositary, however in the event of the insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

The below table shows the credit ratings for major counterparties of the Company as of 31 December 2024 and 31 December 2023 as provided by Standard & Poor's.

	2024	2023
Citi	\mathbf{A} +	A+
HSBC Bank	A+	A+
Standard Chartered	A+	A+
ANZ Banking Group Limited	AA-	AA-
JP Morgan	A+	A+
UBS	A+	A+

The carrying amounts of the financial assets best represent the maximum credit risk exposure at the SFP date. Details of the Company's financial assets exposed to credit risk are shown in the assets section of the current and prior financial year SFP.

The Investment Manager monitors the Fund's credit position on daily basis. There were no changes in the credit risk management policies and procedures during the financial year ended 31 December 2024.

The First Sentier Global Bond Fund, First Sentier Asia Strategic Bond Fund and the First Sentier Asian Quality Bond Fund hold a majority of their assets in debt securities. An analysis of these debt securities portfolios by credit rating as provided by Standard & Poor's is shown in the following tables. This analysis is performed on the basis of the respective published net asset value as calculated in accordance with the provisions of the Company's Articles of Association.

(e) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The capital of the Company is represented by the net assets attributable to holders of redeemable shares.

8. Risk arising from financial instruments (continued)

(e) Liquidity risk (continued)

The amount of net assets attributable to holders of redeemable shares can change significantly on a daily basis as the Company is subject to daily subscriptions and redemptions at the discretion of shareholders. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Company.

As the Company may be exposed to daily cash redemptions of redeemable shares, it therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a stock exchange. The Company's listed securities are considered readily realisable as they are listed on major stock exchanges. What is more, in the interests of shareholder protection, the Directors may limit the number of participating shares of any Fund redeemed on any dealing day to 10% of the total number of participating shares of that Fund in issue as discussed in Note 2 (k).

The number of shareholders in each Fund who held 20% or more shares in issue as at the financial year ended 31 December 2024 and 31 December 2023 are disclosed in Note 16.

The Company's policy with regard to liquidity is to ensure continuity of funding. Short term flexibility is achieved through overdraft facilities. The Company's assets comprise mainly of readily realisable securities which can be sold freely to meet funding commitments if necessary.

The following tools may be employed by the Investment Manager to manage liquidity risks:

- (i) the Directors may limit the number of Shares of any Fund redeemed on any Dealing Day to 10% of the total number of Shares of that Fund in issue;
- (ii) where a redemption request would result in more than 5% of the Net Asset Value of the Shares of any Fund being repurchased on any Dealing Day, the Company may satisfy the redemption request in whole or in part by a distribution of investments of the relevant Fund in specie;
- (iii) the Directors may suspend redemption under exceptional circumstances as set out under the heading entitled "Suspension of Calculation of Net Asset Value" in the section headed "VALUATION OF THE COMPANY" in the Prospectus; and
- (iv) an Anti-Dilution Adjustment may be payable by the Shareholders from time to time as determined by the Investment Manager (which Anti-Dilution Adjustment shall not exceed 2% of the subscription or redemption monies (as the case may be) obtained on the Dealing Day on which the subscription or redemption (as the case may be) is effected). The amount of the Anti-Dilution Adjustment is paid into the Funds for the protection of continuing Shareholders in the Funds. For further details, please refer to the sub-sections headed "Buying Shares" and "Redeeming Shares" under the section headed "BUYING, SELLING AND SWITCHING SHARES" in the Prospectus.

8. Risk arising from financial instruments (continued)

(e) Liquidity risk (continued)

The Investment Manager monitors the liquidity positions on a daily basis and takes action as necessary to maintain an adequate level of liquidity to meet all known funding requirements. As documented within the Investment Manager's Liquidity Risk Management Policy, the Investment Manager uses liquidity stress tests in accordance with ESMA Liquidity Stress Testing guidelines.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Derivatives settled gross include forward currency contracts. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant. The balances with no stated maturity are expected to be settled in less than 12 months. This analysis has been prepared on the basis of the Company as a whole rather than for each Fund as the majority of the financial liabilities for each respective Fund are due within one month and have common contractual maturity dates. The financial liabilities at fair value through profit or loss due within one month relate to forward contracts on First Sentier Global Listed Infrastructure Fund, FSSA Greater China Growth Fund, FSSA Asian Equity Plus Fund, First Sentier Asian Quality Bond Fund, First Sentier Asia Strategic Bond Fund and FSSA China Growth Fund.

9. Derivative contracts

Future contracts

Future contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily. Future contracts have little credit risk because the counterparties are futures exchanges. Future contracts result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates, indices, and securities' values underlying these instruments. In addition, because of the low margin deposits normally required in relation to notional contract sizes, a high degree of leverage may be typical of a futures account.

As a result, a relatively small price movement in an underlying of a futures contract may result in substantial losses to the Company.

Futures trading may also be illiquid. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

Notional amounts are the underlying reference amounts to stock exchange indices, equities and foreign currencies upon which the fair value of the futures traded by the Company are based. While notional amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the Company's futures, the underlying price changes in relation to the variables specified by the notional amounts affect the fair value of these derivative financial instruments. The fair value of future contracts entered into by the Company as at 31 December 2024 is disclosed in the Schedule of Investments. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI. The counterparty for all futures contracts is JP Morgan Securities LLC.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Funds may enter into forward foreign exchange contracts to manage the currency risk arising from the Funds' investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI. The counterparties for all the forward contracts are HSBC Bank, Westpac Banking Sydney, Commonwealth Bank, JP Morgan Chase, BNP Paribas Securities Services, Barclays London, Australia and New Zealand Banking and Citi London.

Interest rate swaps

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. Interest rate swaps relate to contracts taken out by the Company with major brokers in which the Company either receives or pays a floating rate of interest in return for paying or receiving a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

9. Derivative contracts (continued)

Interest rate swaps (continued)

The Company may obtain interest rate swaps for the purposes of efficient portfolio management and to hedge against interest rate risk. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI.

Credit Default Swaps

Credit default swaps represent a commitment with a counterparty to provide a level of credit protection in exchange for a commitment to pay interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI.

Warrants

Warrants give the holder the right to purchase securities from the issuer at a specific price within a certain time frame. Warrants are recorded as an asset or liability at their fair value on the SFP. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the SCI. Realised gains or losses on warrants are shown in the SCI. On the expiry of a warrant the amount previously recognised in the SFP is recognised in the SCI as a realised gain or loss.

Options

An option is a contractual arrangement under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option), at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. Realised and unrealised gains or losses on options are disclosed separately in the SCI.

10. Cash and cash equivalents/margin accounts

Bank balances were held with HSBC Bank plc, HSBC Institutional Trust Services (Asia) Limited (a wholly owned subsidiary of HSBC Holdings plc), The Hong Kong & Shanghai Banking Corporation (India, Indonesia, Japan, New Zealand, Philippines, Singapore, Seoul, South Korea, Taipei, Taiwan), HSBC Bank Australia Limited, HSBC Bank (China) Company Limited, HSBC Trinkaus & Burkhardt (Germany), HSBC Bank Malaysia Berhad (Malaysia), HSBC Mexico SA (Mexico), HSBC Bank Middle East Limited (Palestine), HSBC Bank AS (Turkey) and HSBC Securities Services (Ireland).

Margin cash represents margin deposits or payables held in respect of open exchange-traded futures contracts and swap positions. Margin accounts asset held with JP Morgan as at 31 December 2024 amounted to US\$4,419,614 (2023: US\$5,875,477) and liability held with JP Morgan as at 31 December 2024 amounted to US\$Nil (2023: US\$Nil). This includes collateral of US\$4,419,614 (2023: US\$5,875,477) for futures positions held in respect of First Sentier Global Bond Fund, First Sentier Asia Strategic Bond Fund and First Sentier Asian Quality Bond Fund.

Any temporary overdraft balances are secured by way of a charge on the cash and securities of the relevant Fund. The Company has no other borrowing other than the bank overdraft which is disclosed separately in the SFP.

11. Reconciliation of net assets attributable to holders of redeemable shares to the published net asset value

Investments are valued at close of business bid prices on the final business day of the year in the financial statements. These prices are different from the prices obtained at 11:00 a.m. (Irish time) as utilised in the published NAV in accordance with the prospectus. In addition, the impact of dealing in the Company's shares on the final business day of the year is incorporated in the financial statements. Preliminary expenses are also written off in full in the financial statements. The following table reconciles the published NAV to the NAV shown in the SFP for the year ending 31 December 2024.

	FSSA Asian Growth Fund US\$	FSSA China Growth Fund US\$	Stewart Investors Worldwide Leaders Fund* US\$

14. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. Under IAS 24 "Related Party Transactions", any transactions carried out with the Company by the Promoter, Manager, Investment Managers and/or associated or group companies are considered to be related party transactions. All such transactions were entered into in the ordinary course of business and on normal commercial terms.

Kerry Baronet is Head of Product, First Sentier Investors.

Laura Chambers is Group Head of Financial Planning and Analysis at First Sentier Investors, and is also a Director of the following companies: CFSIM Limited, First Sentier Investors (Malta) Limited, First Sentier Investors (Malta) Holdings Limited, and SI Holdings Limited. CFSIM Limited and SI Holdings Limited were placed into members voluntary liquidation in Q4 2024.

14. Related parties (continued)

The Directors and the Secretary (including family interests) had no shareholdings in the Company at any time during the financial period from 1 January 2024 to 31 December 2024.

Matsack Trust Limited does not (including family interests) hold any participating shares in First Sentier Global Umbrella Fund as at 31 December 2024.

Mitsubishi UFJ Securities International plc ("MITSU") is a connected party to the Company, through its ultimate parent company Mitsubishi UFJ Financial Group.

There were no investments related to the Mitsubishi UFJ Trust and Banking Corporation (2023: US\$ Nil) and there were no purchase and sales during the financial period of these investments and derivatives (2023: Purchases: US\$Nil, Sales: US\$500,000).

There were no transactions of the Funds affected through MITSU, in the ordinary course of their investment sales and purchase activities (whether as principal/agent) for each of the Funds or the brokerage commission paid to MITSU for the financial year ended 31 December 2024 (2023: Nil).

Morgan Stanley & Co International plc. is an associated company of Mitsubishi UFJ Trust and Banking Corporation ("MUTB"). The market value of the investments related to the Morgan Stanley is US\$Nil (2023: US\$Nil) and the purchase and sales during the financial year of these investments and derivatives amounted to US\$Nil and US\$Nil (2023: Purchases: US\$Nil, Sales: US\$Nil).

The table below summarises the value of transactions of the Funds affected through Morgan Stanley & Co International plc., in the ordinary course of their investment sales and purchase activities (whether as principal/agent) for each of the Funds, the brokerage commission paid to Morgan Stanley & Co International plc and average rate of commission effected through Morgan Stanley & Co International plc for the financial years ended 31 December 2024 and 31 December 2023.

On 10 January 2025, the corporate secretary was changed to First Sentier Investors (Ireland) Limited, 21 Charlemont Place, Saint Kevin's, Dublin 2, D02 WV10, Ireland.

Notes forming part of the financial statements for the year ended 31 December 2024 (continued)

18. Subsequent events (continued)

On 5 March 2025 investors were notified of the Directors' intention to close the First Sentier Responsible Listed Infrastructure Fund on 4 April 2025.

On 8 April 2025 the RQI Global All Country Value Fund was launched. RQI Global All Country Value Fund is not available in Germany.

On 17 April 2025 investors were notified of the Directors' intention to close the FSSA Asia Pacific All Cap Fund on 22 May 2025.

19. Approval of the financial statements

The financial statements were approved by the Board of Directors on 22 April 2025.

Annual Depositary Report to the Shareholders

We, HSBC Continental Europe, Ireland, appointed Depositary to First Sentier Investors Global Umbrella Fund Plc (the "Company") provide this report solely in favour of the Shareholders of the Company for the year ended 31 December 2024 (the "Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Company for the Accounting Period and we hereby report thereon to the Shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

For and on behalf of HSBC Continental Europe

22 April 2025

HSBC Continental Europe

1 Grand Canal Square, Grand Canal Harbour, Dublin 2, D02 P820, Ireland Tel: +353-1-635-6000 Website: <u>www.hsbc.ie</u>

HSBC Continental Europe has a registered branch in Ireland (registration number 908966) having its registered office at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, D02 P820 and is regulated and supervised by the Central Bank of Ireland as a depositary for Irish authorised investment funds and otherwise regulated by the Central Bank of Ireland for conduct of business rules. HSBC Continental Europe is a company incorporated under the laws of France as a société anonyme (registered number 775 670 284 RCS Paris), having its registered office at 38 Avenue Kléber, 75116 Paris, France. HSBC Continental Europe is supervised by the European Central Bank, as part of the Single Supervisory Mechanism, the French Prudential Supervisory and Resolution Authority (l'Autorité de Contrôle Prudentiel et de Résolution) as the French National Competent Authority and the French Financial Markets Authority (l'Autorité des Marchés Financiers) for the activities carried out over financial instruments or in financial markets.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

Report on the audit of the financial statements

Opinion on the financial statements of First Sentier Investors Global Umbrella Fund plc ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Schedule of Investments;
- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders;
- the Statement of Cash Flows; and
- the related notes 1 to 19, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibility Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements.
- In our opinion, those parts of the directors' report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

* Closure date – 4 June 2024

**Please see Note 17 for details on the sub fund name changes which occurred during the period.

Ongoing charge (continued)

The ongoing charges for each share class of each sub-fund for the year ended 31 December 2024 and 31 December 2023 is as follows (continued):

	31 December 2024	31 December 2023
Stewart Investors Global Emerging Markets (ex China) Lea	ders Fund*	
Class E (USD)	0.75%	-
Class E (EUR)	0.75%	-
Class VI (USD)	0.80%	-
Class VI (EUR)	0.80%	-
Class I (EUR)	1.45%	-
Stewart Investors Asia Pacific and Japan All Cap Fund**		
Class E (USD)	0.88%	-
Class E (EUR)	0.88%	-
Class VI (USD)	1.05%	-
Class VI (EUR)	1.05%	-

The above ratios are based on the Net Asset Value calculation as stated in the Prospectus. This calculation includes the amortisation of expenses incurred in the formation of new-sub funds over five years. As at 31 December 2024 unamortised preliminary expenses amounted to: \$266.58, \$292.6, \$197.72, \$197.70, \$197.68, \$197.68, \$2,230.23 and \$8,370.98 in relation to the Responsible Listed Infrastructure Fund, Global Emerging Markets Focus Fund, Worldwide All Cap Fund, Global Emerging Markets All Cap Fund, Asia Pacific All Cap Fund, China A Shares Fund and Stewart Investors Indian Subcontinent All Cap Fund.

*Stewart Investors Global Emerging Markets (ex China) Leaders Sustainability Fund launched on 11 July 2024. Please see Note 17 for details on the sub fund name changes which occurred during the period.

**Stewart Investors Asia Pacific and Japan Sustainability Fund launched on 13 August 2024. Please see Note 17 for details on the sub fund name changes which occurred during the period.

Publications

The Articles of Association of the Company, the Prospectus, the Supplements and Key Information Documents for each sub fund and the annual and semi-annual reports of the Company can be obtained, free of charge from the Swiss Representative and Paying Agent, the Distributor and the Administrator.

Remuneration Disclosures

The table below provides an overview of the following:

- Total remuneration paid by First Sentier Investors (Ireland) Limited (the "Manager") as the management company of the Company to staff all of whom are fully or partly involved in the activities of the Company;
- Total remuneration of those staff of the Manager and its delegates who are fully or partly involved in the activities of the Company; and
- Aggregate amount of remuneration paid to UCITS Identified staff of the Manager broken down by senior management and members of staff who have a material impact on the risk profile of the Manager or the Company.

	Headcount	Total Remuneration (US\$)
The Manager's Staff	38	3,925,598
of which		
Fixed remuneration		3,151,452
Variable remuneration		774,146
The Manager's Staff and its delegates	63	13,539,722
of which		
Fixed remuneration		3,876,794
Variable remuneration		9,662,928
UCITS V Aggregate Identified Staff	10	1,322,343
of which		
Senior Management	4	469,858
Fixed remuneration		331,036
Variable remuneration		138,822
Other Code Staff	6	852,485
Fixed remuneration		707,097
Variable remuneration		145,388

Note: Remuneration included in the above table is only in respect of the provision of services to the Company rather than total remuneration of staff for the year. For portfolio management staff, remuneration is apportioned on the basis of assets under management. For management and control staff, remuneration is apportioned on the basis of the number of contracts over which they have influence.

All companies within First Sentier Investors are subject to First Sentier Investors Holdings Pty Limited's Remuneration Policy (the "FSI Group Remuneration Policy"). In addition, the Manager has adopted a remuneration policy (the "Manager Remuneration Policy") which complies with the UCITS Directive and related ESMA Guidelines ("Remuneration Requirements"). These policies apply to all employees of the Manager and are reviewed at least annually.

The Remuneration Requirements apply to the categories of staff whose professional activities have a material impact on the risk profile of the Manager or the Company. The implementation of the FSI Group Remuneration Policy and the Manager Remuneration Policy is reviewed annually and no irregularities were identified.

The remuneration policies adopted by the Manager are appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Remuneration Disclosures (continued)

The Remuneration Requirements require that the Manager must ensure that, where investment management functions are delegated, the delegates are subject to regulatory requirements on remuneration that are equally effective as those that apply under the Remuneration Requirements or that appropriate contractual arrangements are in place with those entities to ensure there is no circumvention of the Remuneration Requirements. The Manager has ensured with respect to each relevant delegate that this is the case.

The Board of the Manager is responsible for decision-making in relation to remuneration practices, processes and risk-adjustments as required by the Remuneration Requirements for the Manager's Identified staff. Due to the size and internal organisation of the Manager and the nature, scope and complexity of its activities, it has not established a remuneration committee.

Base remuneration is set at market competitive levels, while variable remuneration outcomes are differentiated in line with performance. First Sentier Investors provides various forms of variable remuneration, depending on the role and seniority level of staff. Variable remuneration arrangements are governed by the respective plan rules. Individual remuneration awards for all staff are reviewed and approved under the control of the Chief Executive Officer of First Sentier Investors. The Board of the Manager also oversee the remuneration of senior officers performing control functions.

Individual variable remuneration may be adjusted to reflect risk outcomes and First Sentier Investors has the ability to make performance adjustments to variable remuneration of Identified staff, including malus and/or clawback. For investment professionals, the implications of Sustainability (Environmental, Social and Governance related) Risk in the investment process have been incorporated into the performance framework. Staff are prohibited from hedging, or otherwise limiting, their economic exposure to market-based price risk in relation to unvested market-exposed remuneration (e.g. co-investment rights).

Cybersecurity Risk

Regardless of size, sector or location, all organisations are subject to a level of risk from cyber-attacks. The consequences of a cyber-attack, or other type of security incident, could adversely impact the Company and the Shareholders and lead to financial loss, reputational damage, theft/disclosure of sensitive company/client information, breach of legal/regulatory requirements or disruption of business operations (e.g. the loss of the ability to process transactions, calculate the Net Asset Value of a Fund or allow Shareholders to transact business). Depending on the nature and severity of the incident, financial impact could include Funds losing value, regulatory penalties, legal costs and additional costs associated with response, recovery and implementing corrective and preventive measures, to that end FSI have a continuous programme that looks at strengthening security posture, being proactive in the identification and cyber defence as well as building resilience.

The Securities Financing Transaction Regulation Disclosure

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the Securities Financing Transaction Regulation ("SFTR") as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2024, the Company did not hold any type of SFT.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

549300XJFRTRHUTLLR97

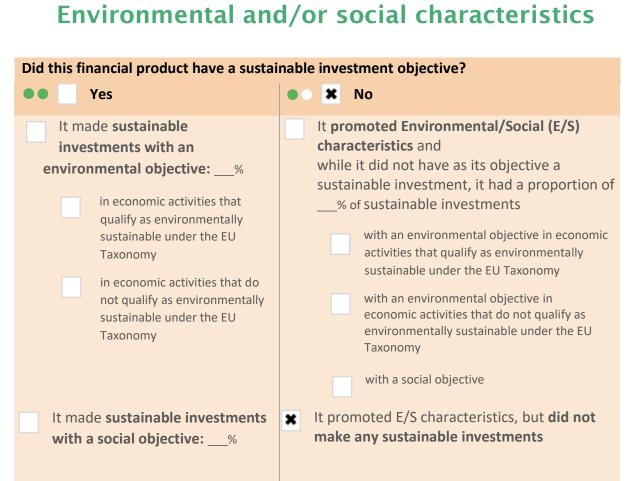

Sustainable

Product name:

FSSA Asian Growth Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted

by this financial product met? The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

Environmental Indicators					
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average. 				
Social In	dicators				
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year. 				
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 				
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 				

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, we verified coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI AC Asia ex Japan Index) for the reported year.

On social characteristics:

The fund is indirectly exposed to revenues from gambling via Advantech Co., Ltd. which offers gaming solutions for the gambling industry. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold.

The product does not have any exposure to companies with tobacco revenues, pornography and controversial weapons as outlined above.

- ...and compared to previous periods? The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
 - How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibriberv matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee

companies today. - capital

expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil** gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

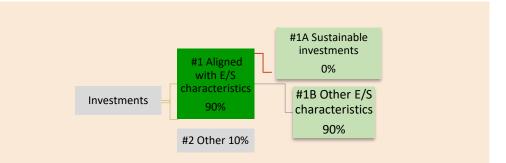

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments? Not applicable.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	9.8
Consumer Discretionary	8.4
Consumer Staples	17.2
Financials	25.1
Health Care	1.5
Industrials	9.2
Information Technology	22.2
Materials	2.8
Real Estate	1.0
Cash and cash equivalents	2.8

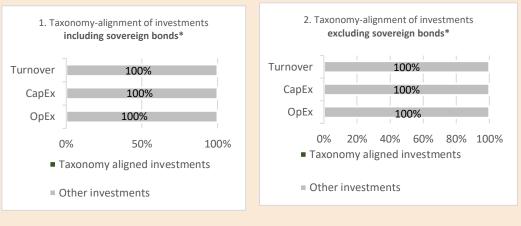

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes □ In fossil gas □ In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

sustainable

environmental

investments with an

objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What actions have been taken to meet the environmental and/or social characteristics during the reference period? FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting activity:	
Total proposals voted on	400
Number of meetings voted at	51
Number of votes for management proposals	386
Number of votes against management proposals	13
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	1
Number of shareholder proposals abstained from voting	0

How did this financial product perform compared to the reference benchmark? Not applicable

- How does the reference benchmark differ from a broad market index? Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable
- How did this financial product perform compared with the reference benchmark? Not applicable
- How did this financial product perform compared with the broad market index? Not applicable

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

5493004Q3YHN6B7BLH98

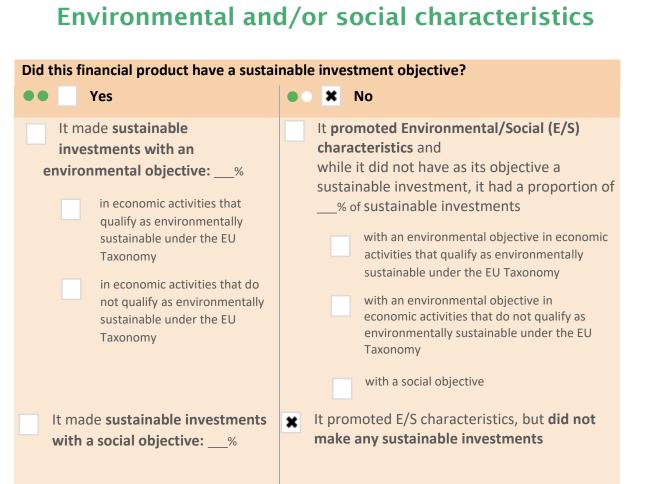

Sustainable

Product name:

FSSA China Growth Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details on the performance of identified indicators.

The fund promotes the following environmental and social characteristics and are defined as follows:

Environment	al Indicators
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.
Social In	dicators
Human health	• Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year.
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year.

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability

How did the sustainability indicators perform?

On environmental characteristics:

The fund is not exposed to thermal coal revenues from mining or processing, verified by 0% revenues from the last three years.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI China Index) for the reported year.

On social characteristics:

The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- ...and compared to previous periods The fund was exposed to revenues from gambling for the previous reporting year via Advantech Co., Ltd. which offers gaming solutions for the gambling industry. Advantech was sold during the period. The remaining indicators have performed similarly to the previous period.
 - What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

 How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability

factors? The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective Did this financial product have a sustainable investment objective? × Yes No It made sustainable It promoted Environmental/Social (E/S) × characteristics and investments with an while it did not have as its objective a environmental objective: 83% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do × with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable

investments with a social objective: 100%

Product name:

Fund

Stewart Investors Worldwide Leaders

It promoted E/S characteristics, but did not make any sustainable investments

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

x

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

Legal entity identifier: 5493003C0PDCQZH4VL30

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **36** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **87 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **36** companies. **30** companies (83%) were contributing to climate change solutions. These companies were contributing to **35** different solutions and, in total, were making **91** contributions to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

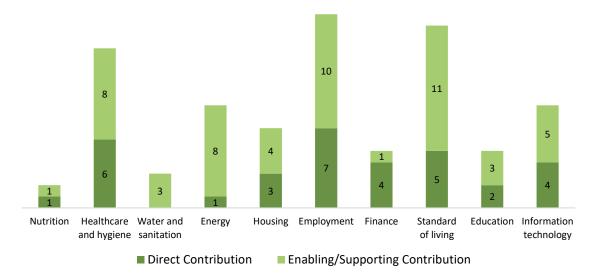

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

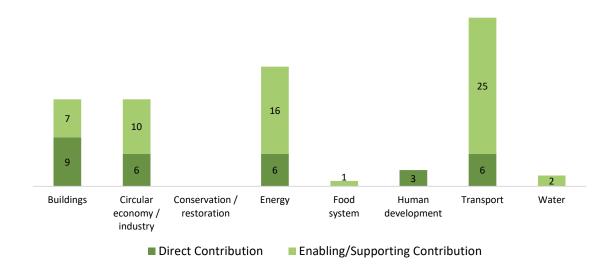

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

...and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

Human development pillars	Contribution	31-Dec- 2023	31-Dec- 2022	31-Dec- 2021

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

WEG

Activity exposure >5% revenue: Supporting Oil & Gas and Supporting Thermal Coal

Reason for exception/holding: The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. WEG also manufacture and sell energy efficient electric motors, which help their customers reduce their energy requirements and greenhouse gas emissions.

Revenues derived from oil and gas supporting products and services, and thermal coal supporting products and services accounted for an estimated 2.5% per activity (5% in total) of the company's overall revenue in FY2022, according to the external research provider.

Thermal coal exposure for supporting products and services was added by the external research provider in early 2023 and the Investment Manager contacted the company directly to check the 2.5% revenue estimates provided. Given that coal is not a strategic market segment for their products or customers, the company estimate that <1% revenues to be a more accurate reflection of their exposure.

Updated research provided during 2024: WEG flagged against the policy for the first half of 2024 and the wording above relates to this. In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The Investment Manager removed WEG from their material exposure disclosures.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024	2023	2022
Exposure	(EUR m)	78	66	49
	Scope 1 (tCO2eq)	619	578	331

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for WEG, Samsung C&T and Westinghouse Air Brake Tech (Wabtec). WEG manufactures and sells efficient electrical motors, which help customers across a variety of industrial sectors reduce their energy requirements. The third-party data provider estimates WEG as having 1% of their total revenue derived from products supporting thermal coal. Samsung C&T, which was held for part of the reporting period, is a holding company with direct operating businesses in construction and trade, plus high-value holdings in health and electronics. The third-party data provider estimates that the company derives 1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production. Wabtec is a leading supplier of locomotives, brakes and other rail equipment. The third-party data provider estimates that the company derives 1% of revenue from products used by customers operating thermal coal mines.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

What were the top investments of this financial product?

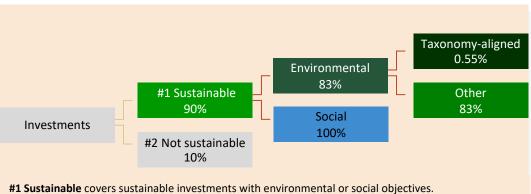

Largest investments	Sector	% assets	Country
Mahindra & Mahindra	Consumer Discretionary	7.7	India
Watsco	Industrials	6.9	United States
Fortinet	Information Technology	6.2	United States
bioMérieux	Health Care	5.4	France
HDFC Bank	Financials	4.9	India
TSMC	Information Technology	4.6	Taiwan
Costco	Consumer Staples	3.7	United States
DHL Group	Industrials	3.7	Germany
Arista Networks	Information Technology	3.4	United States
Copart	Industrials	2.9	United States
Markel	Financials	2.8	United States
Texas Instruments	Information Technology	2.7	United States
Beiersdorf	Consumer Staples	2.7	Germany
Roper Technologies	Information Technology	2.6	United States
Old Dominion Freight Line	Industrials	2.6	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100. The 0.55% Taxonomy-aligned figure is weighted contribution based on reported turnover reflecting the share of revenue from green activities of investee companies. Separately, the 83% 'Other' figure is based on those companies contributing towards the Investment Manager's climate solutions assessment detailed above.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	-
Consumer Discretionary	8.4
Consumer Staples	6.4
Energy	-
Financials	7.9
Health Care	9.7
Industrials	34.4
Information Technology	30.1
Materials	2.2
Real Estate	-
Utilities	-
Cash and cash equivalents	0.9

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

During the period the Fund held **WEG** which derives revenues from oil and gas supporting products and services, and thermal coal supporting products and services estimated as 2.5% per activity (5% in total). In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from c.2.5% to c.1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. (Full details are in the 'do no harm' section above).

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

□ In fossil gas □ In nuclear energy

🛛 No

Taxonomy-aligned activities are expressed as a share of:

turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies

 capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU

Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 Taxonomy-alignment of investments including sovereign bonds* 				xonomy-alignmo excluding sove	ent of investment: reign bonds*	5

	 Taxonomy-aligr Other Investme 				Taxonomy-aliOther Investr	gned investments nents	

% figures represent taxonomy-aligned investments *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Based on reported turnover, the share of investments that the Fund made in transitional activities was **0.00%** and enabling activities was **0.39%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Based on reported turnover, the percentage of investments aligned with the EU Taxonomy for the previous reference period was **0.7%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **36** companies. Based on reported turnover data, **34** of the **36** companies had **no alignment** with the EU Taxonomy.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporate	Engagement	Engagement Proxy voting	
engagement policy	booklet		Annual review

During the reporting period, the Investment Manager met with **70%** of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- Diversity, equity and inclusion diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure.

During the period the Investment Manager engaged with **62%** of Fund companies on the following topics -

- Environment: 12%
- Social: 21%
- Governance: 67%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 1 January 2024 to 31 December 2024

39
45
556
25

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

549300YMO8UBPRDX6227

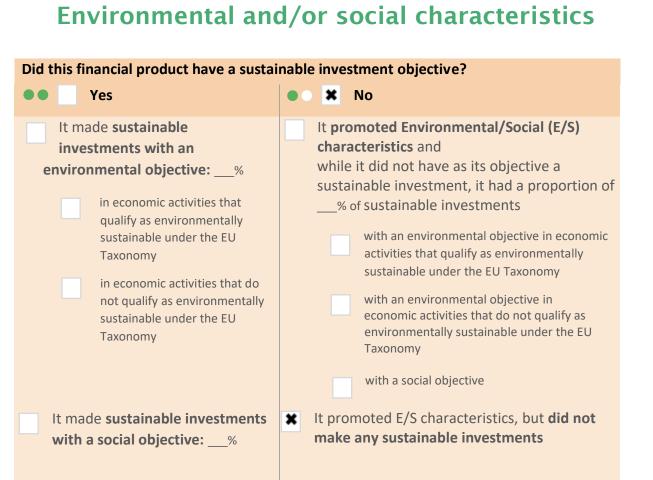

Sustainable

Product name:

FSSA Hong Kong Growth Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

ows:	
Environment	al Indicators
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.
Social Ind	dicators
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year.
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year.

The fund promotes the following environmental and social characteristics and are defined as follows:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, the Investment Manager verified that coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2

greenhouse gas emissions for performance below the respective benchmark (MSCI Hong Kong Index) for the reported year.

On social characteristics:

The fund is indirectly exposed to revenues from gambling via CK Asset Holdings Ltd., a property developer. It's wholly-owned subsidiary, Greene King plc, the company operates pubs, restaurants, and hotels, providing access to gaming machines in several of its establishments. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold.

The product does not have any exposure to companies with tobacco revenues, pornography and controversial weapons as outlined above.

- *...and compared to previous periods?* The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	2.55	Hong Kong China

What was the proportion of sustainability-related investments? Not applicable.

What was the asset allocation?

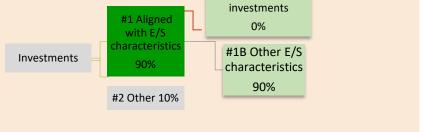

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil** gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1A Sustainable

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	13.5
Consumer Discretionary	25.7
Consumer Staples	10.8
Financials	18.7
Health Care	4.0
Industrials	16.6
Information Technology	3.5
Real Estate	4.4
Utilities	2.0
Cash and cash equivalents	0.8

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational
 expenditure
 (OpEx) reflects the
 green operational
 activities of
 investee
 companies.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

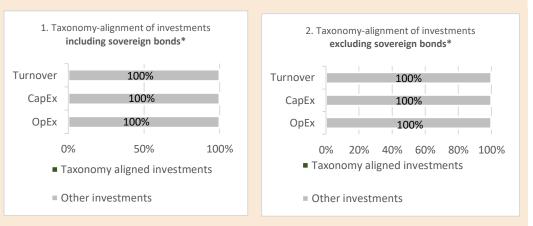

Did the financial product investment in fossil gas and/or nuclear energy related activities

🗆 Yes

□ In fossil gas □ In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities? Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

(AND A	þ	2	
		Ċ	2	

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Total proposals voted on	549
Number of meetings voted at	54
Number of votes for management proposals	498
Number of votes against management proposals	50
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	1
Number of shareholder proposals abstained from voting	0

How did this financial product perform compared to the reference benchmark? Not applicable

How does the reference benchmark differ from a broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable
- How did this financial product perform compared with the reference benchmark?

- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

Principal adverse impacts are the most significant

How did this financial product consider principal adverse impacts on sustainability factors? The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

rules.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational
 expenditure
 (OpEx) reflects the
 green operational
 activities of
 investee
 companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy

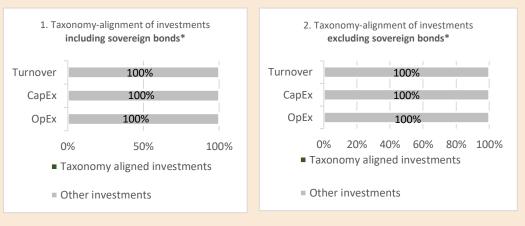

Did the financial product investment in fossil gas and/or nuclear energy related activities

🗆 Yes

□ In fossil gas □ In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting activity:

Total proposals voted on	568
Number of meetings voted at	60
Number of votes for management proposals	541
Number of votes against management proposals	27
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

How did this financial product perform compared to the reference benchmark? Not applicable

- How does the reference benchmark differ from a broad market index? Not applicable
 - How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index? Not applicable

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

Sustainable

Product name:

FSSA ASEAN All Cap Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

ows:	
Envir	ronmental Indicators
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.
	Social Indicators
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year.
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year.

The fund promotes the following environmental and social characteristics and are defined as follows:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, we verified coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2

greenhouse gas emissions for performance below the respective benchmark (MSCI AC ASEAN Index) for the reported year.

On social characteristics:

The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- *...and compared to previous periods?* The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted

by this financial product met? The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

Environmental Indicators			
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average. 		
Social In	dicators		
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year. 		
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 		
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, we verified coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI AC Asia Pacific ex Japan Index) for the reported year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. On social characteristics:

The fund is indirectly exposed to revenues from gambling via HCL Technologies Ltd., which provides IT solutions/software services used by casino operators. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold. There was also indirect exposure via Advantech Co., Ltd. which offers gaming solutions for the gambling industry. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold.

The product does not have any exposure to companies with tobacco revenues, pornography and controversial weapons as outlined above.

- ...and compared to previous periods? The fund was indirectly exposed to revenues from gambling as outlined. Otherwise the indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.
 - How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

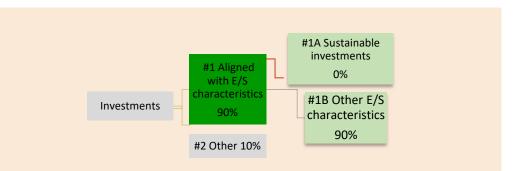

What were the top investments of this financial product?

	Largest Investments	Sector	% Assets	Country
	HDFC Bank INR1	Financials	8.87	India
The list includes the investments	Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	8.50	Taiwan
constituting the greatest proportion	Tencent Holdings Ltd.	Communication Services	7.15	Hong Kong China

Real Estate	0.4
Utilities	1.1
Cash and cash equivalents	0.6

To comply with the EU Taxonomy, the criteria for **fossil** gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Asset allocation describes the share of investments in specific assets. Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

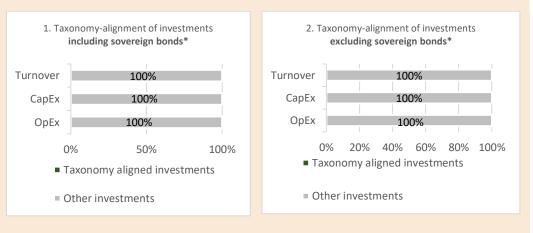

Did the financial product investment in fossil gas and/or nuclear energy related activities

🗆 Yes

□ In fossil gas □ In nuclear energy

🖾 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

FA

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards? On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Total proposals voted on	558
Number of meetings voted at	66
Number of votes for management proposals	538
Number of votes against management proposals	20
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

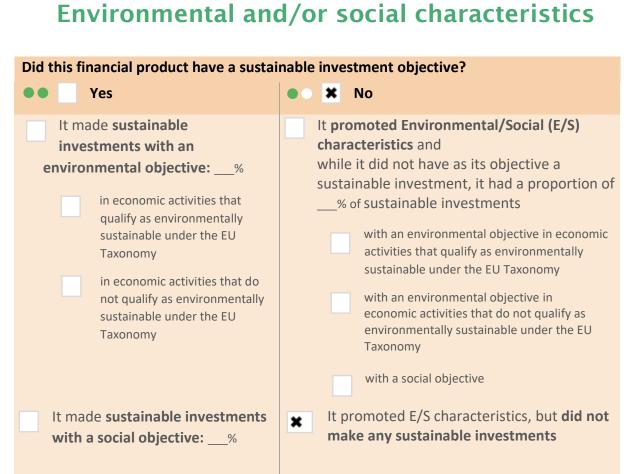

5493008WVEXTGNWJDZ34

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. Product name:

First Sentier Asian Quality Bond Fund

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass the Investment Managers exclusions policy

Given that many companies in Asia are still not disclosing emissions, the Fund promotes an environmental characteristic by encouraging better disclosure of greenhouse gas emissions. The Fund seeks to promote disclosure of in-scope companies' greenhouse gas emissions through monitoring disclosure and engaging with companies for further disclosures where found to be lacking.

	Environmental Indicators
Greenhouse gas emissions	Number of companies in the fund lacking any GHG emissions disclosure
	Social Indicators
Diversity	 Board Gender Diversity (Percentage of female board members) of corporate companies Number of companies in the fund lacking any female board member
Workplace Safety	Number of companies in the fund lacking workplace accident prevention policy or similar policies
Exclusion	 Number of companies/issuers that derive any revenue directly from the manufacture of controversial weapons or tobacco products; or that own more than a 50% interest in entities that derive any revenue directly from the manufacture of controversial weapons or tobacco product

The fund promotes the following environmental and social characteristics and are defined as follows:

How did the sustainability indicators perform?

As of 31 December 2024, all in-scope names i.e corporate credits held by the Fund have met the sustainability indicators that the Fund sought to promote:

- All in-scope names disclosed at least Scope 1 & 2 Disclosures GHG emissions
- All in-scope names had at least 1 female board member, with the lowest percentage of female representation being 5% of board
- All in-scope names had at least a health and safety policy, human rights policy, or both
- The Fund has not invested in companies that derive any revenue directly from the manufacture of controversial weapons or tobacco products; or that own more than a 50% interest in entities that derive any revenue directly from the manufacture of controversial weapons or tobacco product

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ...and compared to previous periods? N/A. 2024 is the first year of reporting
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
 - How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- —— How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors through the Investment Manager's assessment of each company through its investment process and its consideration of those principal adverse impact indicators set out in the SFDR Regulatory Technical Standards that it believes to be relevant to the company.

The Investment Manager uses external data, where available, and may rely on information directly from the company or its own research and knowledge of the relevant industry to assess those principal adverse impacts. Where material adverse sustainability impacts are identified, the Investment Manager will seek to engage with the company in accordance with the commitments made under its group Responsible Investment and Stewardship Policy and Principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Stewart Investors Global Emerging Markets Leaders Fund

Sustainable investment objective

Legal entity identifier:

549300YYD8Q6QBFGS653

Did this financial product have a sustainable investment objective? × Yes No It made **sustainable** It promoted Environmental/Social (E/S) × investments with an characteristics and while it did not have as its objective a environmental objective: 62% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do × with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but **did not** × make any sustainable investments investments with a social objective: 100%

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **39** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **110 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **39** companies. **24 companies (62%)** were contributing to **climate change solutions**. These companies were contributing to **29** different solutions and, in total, were making **76 contributions** to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – <u>www.stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions</u>

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

• How did the sustainability indicators perform?

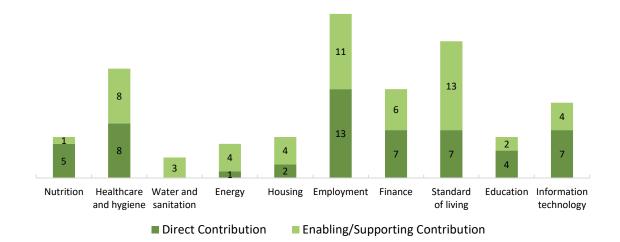

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

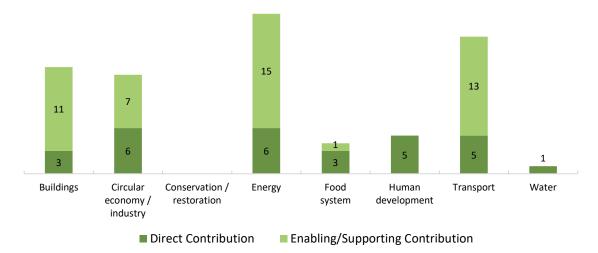

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

...and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund for previous periods are provided in the tables below. The Fund transitioned to have a sustainable investment approach from 30 November 2022.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

— How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy. During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

WEG

Activity exposure >5% revenue: Supporting Oil & Gas and Supporting Thermal Coal

Reason for exception/holding: The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. WEG also manufacture and sell energy efficient electric motors, which help their customers reduce their energy requirements and greenhouse gas emissions.

Revenues derived from oil and gas supporting products and services, and thermal coal supporting products and services accounted for an estimated 2.5% per activity (5% in total) of the company's overall revenue in FY2022, according to the external research provider.

Thermal coal exposure for supporting products and services was added by the external research provider in early 2023 and the Investment Manager contacted the company directly to check the 2.5% revenue estimates provided. Given that coal is not a strategic market segment for their products or customers, the company estimate that <1% revenues to be a more accurate reflection of their exposure.

Updated research provided during 2024: WEG flagged against the policy for the first half of 2024 and the wording above relates to this. In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The Investment Manager removed WEG from their material exposure disclosures.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024	2023	2022
Exposure	(EUR m)	41	47	44

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for **WEG**. WEG manufactures and sells efficient electrical motors, which help customers across a variety of industrial sectors reduce their energy requirements. The third-party data provider estimates WEG as having 1% of their total revenue derived from products supporting thermal coal.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

Asset allocation describes the share of investments in specific assets.

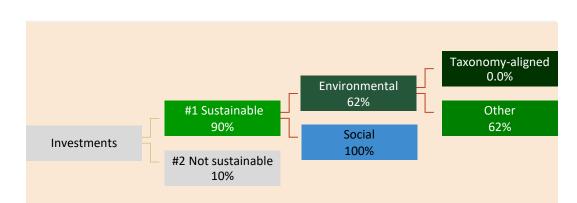

What were the top investments of this financial product?

Largest investments	Sector	% assets	Country
TSMC	Information Technology	7.9	Taiwan
HDFC Bank	Financials	5.7	India
Mahindra & Mahindra	Consumer Discretionary	5.3	India
Samsung Electronics	Information Technology	4.6	South Korea
Tata Consultancy Services	Information Technology	4.4	India
Unicharm	Consumer Staples	4.2	Japan
Jerónimo Martins	Consumer Staples	3.5	Portugal
Infosys	Information Technology	3.4	India
Delta Electronics	Information Technology	3.2	Taiwan
EPAM Systems	Information Technology	3.2	United States
WEG	Industrials	2.9	Brazil
RaiaDrogasil	Consumer Staples	2.8	Brazil
Globant	Information Technology	2.7	Argentina
Techtronic Industries	Industrials	2.5	Hong Kong
Inovance	Industrials	2.4	China

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#1 Sustainable covers sustainable investments with environmental or social objectives. **#2 Not sustainable** includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

Sector % assets **Communication Services** 0.3 **Consumer Discretionary** 12.4 **Consumer Staples** 20.9 Energy -**Financials** 12.8 Health Care 1.6 Industrials 11.8 Information Technology 39.1 Materials **Real Estate** Utilities Cash and cash equivalents 1.1

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

During the period the Fund held **WEG** which derives revenues from oil and gas supporting products and services, and thermal coal supporting products and services estimated as 2.5% per activity (5% in total). In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. (Full details are in the 'do no harm' section above).

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which

low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. operational

expenditure

(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

🗆 In fossil gas 🛛 In nuclear energy

🗵 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy for the previous reference period was **0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **39** companies. Based on reported turnover data, **38** of the **39** companies had **no alignment** with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporateEngagementProxy votingAnnual reviewengagement policybooklet

During the reporting period, the Investment Manager met with 83% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- **Diversity, equity and inclusion** diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- **Governance** corporate strategy and legal structure.

During the period the Investment Manager engaged with ${\bf 54\%}$ of Fund companies on the following topics -

- Environment: 26%
- Social: 20%
- Governance: 54%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below.

Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	47
Number of meetings to vote at	76
Total proposals to vote on	721
Number of votes against management proposals	22
Number of votes abstained from voting	4
Number of shareholder proposals to vote on	1
Number of shareholder proposals voted against	1
Number of shareholder proposals abstained from voting	0

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: First Sentier Global Property Securities Fund

Legal entity identifier: 54930043SPJBFOE6GJ62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes × No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It promoted E/S characteristics, but **did not** It made sustainable investments × make any sustainable investments with a social objective: ___%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the following environmental and social characteristics:

Environmental: The Fund seeks to promote net zero operational carbon by 2050 or earlier at both company and portfolio level through a proprietary carbon forecasting model applied by the Investment Manager.

Social: The Fund seeks to promote the protection of labour rights and the provision of safe and secure working environments for all workers through compliance with UN Global Compact Principles by investee companies.

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The Fund's sustainability indicators are:

	Environmental Indicators
Operational Carbon reduction	• Forecast operational carbon net zero by 2050
	Social Indicators
UN Global Compact Principles	 Systemic breaches of UN Global Compact Principles

The primary environmental indicator for demonstrating the portfolio's progress, 'Portfolio Forecast Net Zero Year', declined by one year from 2040 to 2041.

No UN Global Compact breaches have been identified in the period.

Additional supplementary indicators related to the Investment Strategy:

Secondary environmental indicators saw an overall improvement year-on-year, with lower water intensity and lower portfolio share of carbon emission. Conversely, GHG scope 1 and 2 intensity temporarily worsen due to increase in investment in datacentre in the second half of the financial year. The portfolio held a reasonable exposure to housing sectors in the USA for its strong property fundamentals and positive social contribution, however, the sector's high energy intensity nature detriments to the portfolio performance on GHG intensity indicator. The investment manager continue to engage with investee companies and to monitor the medium term progression of these indicators.

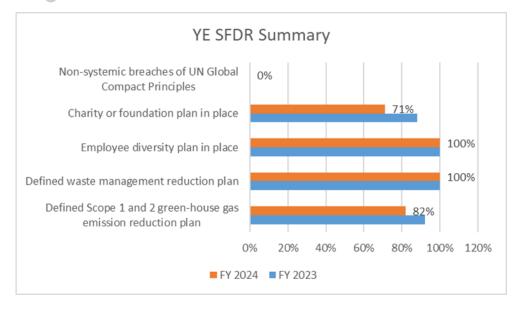

Social and Governance indicators continued to perform well, and are largely stable relative to the previous year.

Indicator		Year-on-Year performance(YoY)
GHG Scope 1&2 Tonnes CO2/m2	0.106	Increase 172% yoy
Portfolio Forecast Net Zero Year	2041	1 year later
Total Operational Co2 Tonnes p.a	63	decrease 46% yoy
Total Embodied Co2 Tonnes p.a	401	decrease 49% yoy
Water Intensity L/m2	837	decrease 6% yoy
Board Diversity-Female %	31.6%	increase 8% yoy
Board Independence %	78.1%	Increase 7%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Workforce Diversity-Female %	45.9%	Decrease 5%
Training hour per employee per year	23.7	Decrease 5%
UN Global Compact breach incident	0	Same

...and compared to previous periods? as outlined in table above

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities. Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account? Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment manager periodically reviews and considers Principal Adverse Impacts on sustainability factors across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data. Where adverse sustainability impacts are identified, the Investment Manager engages with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles.

The Investment Manager is aware that climate change can impact the value of investments; the nature of property assets is inherently long term, making climate change a material issue for long term property asset valuation. The Investment Manager focusses on assessing each company considered for investment including how each company prioritises the potential impacts of climate change.

In considering the social characteristics, the Investment Manager assesses and selects companies with policies in place to align with The Ten Principles of the UN Global Compact; and to demonstrate diversity of gender, age and ethnicity across their organisation; and have a commitment to a long-term contribution to the wider community. Corporate governance characteristics such as Board independence and diverse skills and experience are assessed and rated.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31st of December 2024

What were the top investments of this financial product?

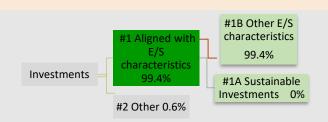

Largest Investments	Sector	%Assets	Country

BXP Inc	Real Estate	3.2	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made in the Real Estate Sector

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product investment in fossil gas and/or nuclear energy related activities

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

□ Yes

□ In fossil gas □ In nuclear energy

Taxonomy-aligned		
activities are		
expressed as a share		
of:		

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies,

- What was the share of investments made in transitional and enabling activities? zero
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? There was no investments with alignment with the EU Taxonomy in the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

investee companies.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. Investment was included under "other" was "cash or cash equivalent, dividend receivables"

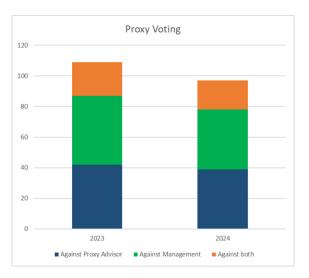

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The ongoing monitoring and evaluation of the environment and social characteristics and the sustainability indicators are embedded into the investment process and the proprietary scores are taken into account in the selection, retention and realisation of investments in the Fund. The promoted environmental and social characteristics and the sustainability indicators can be monitored by a set of measureable metrics. Factual data are collected from investee companies' reports and the team's periodic engagements. Our engagements can be in the format of site visit, in person meeting, call or email. Our database are updated in real time and live feed to our ESG reports.

The environmental characteristics considered as part of an ESG characteristic assessment include reduction of carbon emissions, water usage and waste management. In analysing the companies, the Investment Manager considers the measures the companies are taking to achieve and implement carbon reductions through e.g. carbon offset schemes, onsite energy reduction, renewable energy procurement as well as modernisation efforts involved in improving the ongoing operational carbon reductions and reducing embodied carbon emissions through use of green materials and end of life recycling. Equally, the nature of property assets are inherently long term, making climate change a material issue for long term property asset valuation. The Investment Manager focusses on assessing each company considered for investment including how each company prioritises the potential impacts of climate change, and how sustainability goals are implemented and measured over the short to long term.

In considering the social characteristics such as gender diversity, equal opportunity and community initiatives, the Investment Manager expects companies to demonstrate its diversity policy. Our process thoroughly assesses investee companies' governance over many criteria: Board assessment, Board independence and diversity, shareholder rights, remuneration. In general, we will not support resolutions that propose: changes to the corporate structure that curtail shareholder rights; or changes to the capital structure that could dilute shareholders' voting and/or economic rights. We expect remuneration structures to be simple, long-term oriented, aligned with shareholder value/return. A low governance score likely eliminates the stocks from our investible universe. During the financial year, there were instances where the team engaged with either executive management or the Board with regards to corporate proposals which we viewed as not in the best interest of the shareholders. The team assessed the outcome on a case by case basis and made our decisions accordingly, eg. some led to "against management" proxy votes, followed by a downgrade of ESG score and complete disposal of the stocks. The chart below demonstrate our in-house research and analysis capability through independent voting process:

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

N/A Reference benchmark is not available.

- How does the reference benchmark differ from a broad market index? n/a
 - How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? n/a
 - *How did this financial product perform compared with the reference benchmark?* n/a
- How did this financial product perform compared with the broad market index? n/a

NNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

549300SVCX8IKHXVNY34

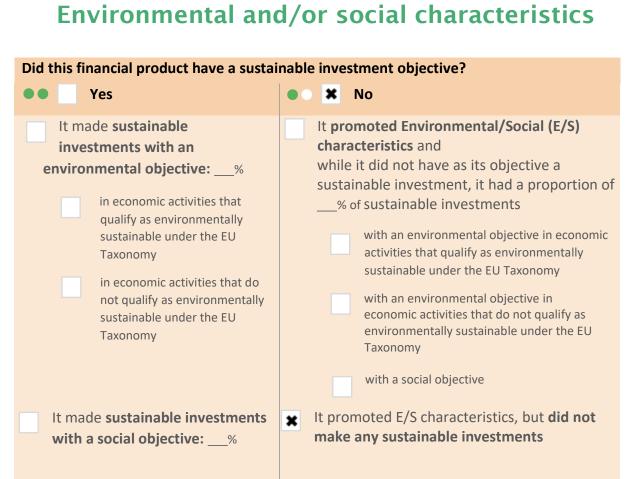

Sustainable

Product name:

FSSA China Focus Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted

by this financial product met? The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

-	al to diasta as		
Environmental Indicators			
Fossil fuel exposure	• Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.		
Social In	dicators		
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year. 		
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 		
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is not exposed to thermal coal revenues from mining or processing, verified by 0% revenues from the last three years.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI China Index) for the reported year.

On social characteristics:

• The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- ...and compared to previous periods? The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments? Not applicable.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	15.0
Consumer Discretionary	29.2
Consumer Staples	12.3
Financials	7.7
Health Care	7.0
Industrials	17.6
Information Technology	8.0
Real Estate	2.2
Utilities	0.2
Cash and cash equivalents	0.8

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

□ In fossil gas □ In nuclear energy

🛛 No

To comply with the EU Taxonomy, the criteria for **fossil** gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

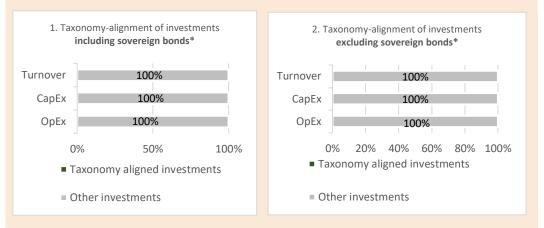

- turnover reflects the "greenness" of investee
- companies today.
- expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting Information:	
Total proposals voted on	730
Number of meetings voted at	78
Number of votes for management proposals	694
Number of votes against management proposals	35
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and	a/or social characteristics
Did this financial product have a sustai	nable investment objective?
Yes	🔹 🗶 No
 It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	 It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes the following environmental and social characteristics:

Environmental characteristics:

The environmental characteristic promoted by the Fund is climate change mitigation, namely a reduction in carbon intensity (measured as carbon emissions per MWh) in respect of any utility company with material generation assets.

Product name: First Sentier Global Listed Infrastructure Fund

Environmental and/or social characteristics

Legal entity identifier:

549300UHIVWX4YGY6160

Social characteristics:

The social characteristics promoted by the Fund are the protection of labour rights, and the provision of safe and secure working environments for all workers.

The Investment Manager analysed these criteria by monitoring the carbon intensity of the portfolio's utility holdings; by assessing where investee companies were spending capital expenditure; and by using Sustainalytics to check portfolio holdings for alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises.

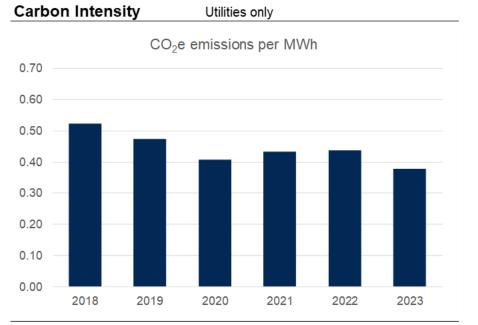

Analysis in these areas showed that the environmental and social characteristics promoted by this financial product were met during the 2024 calendar year.

How did the sustainability indicators perform?

The following shows the indicators used by the portfolio to measure those characteristics, and the Fund's performance against those indicators, using the most recent date that the relevant data is available for.

Environmental: For utility companies, demonstrating declining carbon intensity (as measured by tons of carbon emitted per MWh of electricity generated) over rolling retrospective five year periods; or carbon intensity at least 25% below the average of utility companies in the Investment Manager's investment universe.

Power generated by utilities typically represents around 90% of portfolio emissions. Emissions per MWh declined by 27% over the preceding 5 years. Adjusting for changes in corporate structure, such as an investment's acquisition or divestment of energy generation assets; or changes in capacity factors i.e how often different power plant types are being run at maximum power, each utility in the portfolio reduced their carbon intensity over this period.

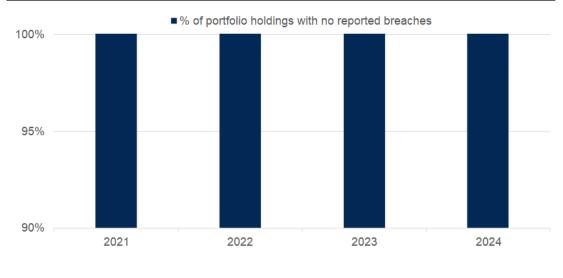

Power generated by utilities represents 90% of portfolio emissions

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

Social: Alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

Alignment with UN GC and OECD Guidelines

Data as at 31 December 2024

...and compared to previous periods?

Please refer to the charts above for an overview of previous periods' performance against these sustainability indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such

objectives? Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-

bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors? The Investment Manager has committed that for every active equity investment, the corresponding issuer should be assessed for relevant PAIs and the results of this assessment documented.

Where PAIs are identified (based on the research and analysis described in the response above) the Investment Manager engages with the company in accordance with the commitments made under First Sentier Investors' Responsible Investment and Stewardship Policy and Principles.

Where engagement is unsuccessful, the Investment Manager considers escalating the issue by:

□ wider engagement with other investors;

 $\hfill\square$ writing to or meeting with the chairperson or lead independent director;

□ voting against directors they feel are not providing appropriate oversight; or

□ making their views public.

If an appropriate response is not received from the company or engagement on the topic is otherwise deemed to have been unsuccessful, the Investment Manager will consider divestment.

Principal Adverse Impact data is sourced from a third-party ESG data provider. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

In which economic sectors were the investments made?

The Fund invests in the shares of companies from around the world that own or operate infrastructure assets.

Its holdings during the 2024 calendar year were constituents of the following Global Industry Classifiation Standard sub-sectors:

Sector	% Assets
Communication Services	1.0
Energy	8.9
Industrials	34.7
Real Estate	6.5
Utilities	47.8
Cash and cash equivalents	1.1

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities

□ Yes

□ In fossil gas □ In nuclear energy

□⊠ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The share of investments in enabling activities based on Capex was 4.40%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	2023	2024	
Turnover	2.2%	6.98%	
Сарех	2.5%	9.12%	
Opex	1.1%	5.75%	

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy N/A

What was the share of socially sustainable investments? N/A

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" consisted of a small cash weight, maintained for efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the 2024 calendar year, the team carried out engagement activity and cast proxy votes in support of the environmental and characteristics promoted by the financial product.

Voting activity:	
Total proposals to vote on	642
Number of meetings to vote at	46
Number of companies that held voting meetings	40
Number of votes against management proposals	64
Number of votes abstained from voting	28
Number of shareholder proposals to vote on	31
Number of shareholder proposals voted against	12
Number of shareholder proposals abstained from voting	0

Engagement

When we engage, we first raise issues in meetings with company management, in order to put our view across and to understand the situation from the company's perspective. If we don't see change, we will then contact the Board, for example by writing a formal letter, outlining our concerns. If we feel that our concerns are still not being addressed, we may vote against the company via proxy shareholder voting.

In instances where management does not respond adequately to engagement, this may negatively affect our quality scores for ESG-related factors for that company, which could result in our divesting ownership. We view this approach as being an important element of our fiduciary responsibilities.

Topics of engagement during the year included climate change mitigation, climate change adaptation, worker safety and corporate governance.

Proxy voting

The global listed infrastructure investment team votes on all issues at company meetings where it has the authority to do so. We believe voting rights are a valuable asset, which should be managed with the same care and diligence as any other asset.

Ultimately, shareholders' ability to influence management depends on shareholders' willingness to exercise those rights.

Recommendations are sought from a selection of independent corporate governance research providers; however, our investment teams retain full control of their voting decisions.

When we intend to vote against a proposal, we may choose to make representations to a company prior to the vote, so that appropriate consultation may take place with a view to achieving a satisfactory solution.

Our team maintains records when they vote against management or against the recommendations of the proxy voting advisors (Glass Lewis).

Key proxy voting themes for the financial product include climate change and best-practice corporate governance.

Sustainable

Product name:

FSSA Asia Pacific Equity Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

Envi	ronmental Indicators
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment Revenue tolerance is 0% monitored throughout the year.
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year.

The fund promotes the following environmental and social characteristics and are defined as follows:

How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, we verified coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI AC Asia Pacific ex Japan Index) for the reported year.

On social characteristics:

The fund is indirectly exposed to revenues from gambling via HCL Technologies Ltd., which provides IT solutions/software services used by casino operators. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold.

The product does not have any exposure to companies with tobacco revenues, pornography and controversial weapons as outlined above.

- ...and compared to previous periods? The fund was exposed to coal revenues for part of the reporting year. The remaining indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
 - How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

 How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the

most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments? Not applicable.

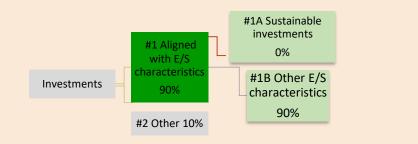

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

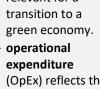

The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	9.5
Consumer Discretionary	11.0
Consumer Staples	18.1
Financials	26.8
Health Care	9.4

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee
- companies today. capital

(OpEx) reflects the green operational activities of investee companies.

Industrials	6.2
Information Technology	15.3
Materials	1.2
Cash and cash equivalents	2.5

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

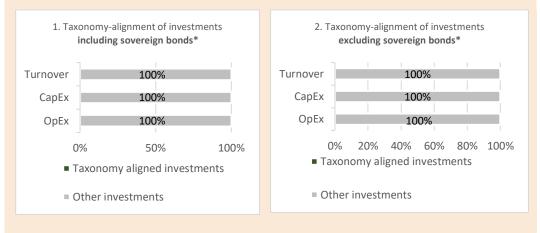

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

□ In fossil gas □ In nuclear energy

⊠ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable.

What was the share of socially sustainable investments? Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment Manager's AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain over the long term and where management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies we raise legitimate concerns and encourage them to address any issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting activity:	
Total proposals voted on	466
Number of meetings voted at	67
Number of votes for management proposals	448
Number of votes against management proposals	17
Number of votes abstained from voting	1
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform compared to the reference benchmark? Not applicable.

• How does the reference benchmark differ from a broad market index? Not applicable.

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable.
- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

549300A1EKDFU3L8BY90

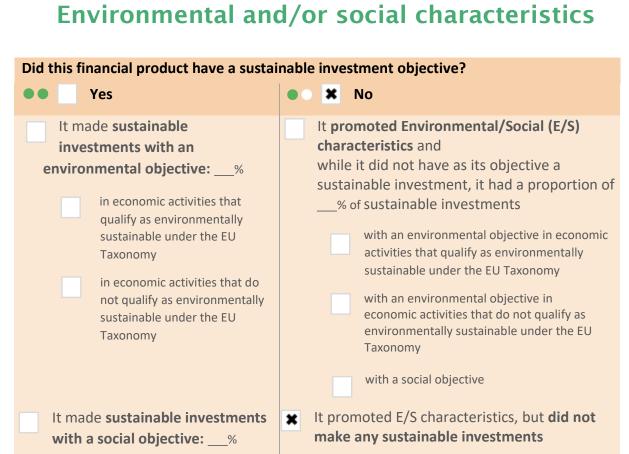

Sustainable

Product name:

FSSA Asia Pacific All Cap Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

ows:	
Environment	al Indicators
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average.
Social In	dicators
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year.
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year.

The fund promotes the following environmental and social characteristics and are defined as follows:

How did the sustainability indicators perform?

On environmental characteristics:

The fund is exposed to coal revenues. By reviewing the companies' primary documents, we verified coal revenues do not exceed the 10% revenue threshold on a retrospective rolling 3-year average.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI AC Asia Pacific ex Japan Index) for the reported year.

On social characteristics:

The fund is indirectly exposed to revenues from gambling via HCL Technologies Ltd., which provides IT solutions/software services used by casino operators. The estimated exposure of products that support the gambling industry does not exceed the 10% annual revenue threshold.

The product does not have any exposure to companies with tobacco revenues, pornography and controversial weapons as outlined above.

...and compared to previous periods? The fund is exposed to coal revenues for the reporting year. The remaining indicators have performed similarly to the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

What were the top investments of this financial product?

	Largest Investments	Sector	% Assets	Country

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes × No It made **sustainable** It promoted Environmental/Social (E/S) Х characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of in economic activities that 78% of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally Х economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ___%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund seeks to promote sustainable development as guided by the United Nations' Sustainable Development Goals (SDGs).

The main focus of the Investment Manager is on the following SDGs while acknowledging that infrastructure companies may also contribute to other SDGs at times:

• SDG 6: Clean Water and Sanitation

- SDG 7: Affordable and Clean Energy
- SDG 9: Industry, Innovation and Infrastructure
- SDG 11: Sustainable Cities and Communities
- SDG 12: Responsible Consumption and Production
- SDG 13: Climate Action.

The Investment Manager considers that alignment with the above SDGs is likely to lead to positive environmental or social outcomes (dependent on the infrastructure sector).

In addition, the Fund seeks to promote climate change mitigation via a reduction in carbon intensity (measured as carbon emissions per MWh of electricity generated by utility companies held in the portfolio), the establishment of energy infrastructure required for enabling the de-carbonisation of energy systems, and the production of clean and efficient fuels from renewable or carbon-neutral sources. Social characteristics:

The Social characteristics promoted by the Fund are: the protection of labour rights, and the provision of safe and secure working environments for all workers

These criteria were analysed by monitoring the carbon intensity of the portfolio's utility holdings; by assessing each company's capital expenditure, and how that expenditure will help achieve specific SDG sub goals; and by using Sustainanlytics to check portfolio holdings for alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises.

Our analysis in these areas showed that the environmental and social characteristics promoted by this financial product were met during the 2024 calendar year.

How did the sustainability indicators perform?

The Investment Manager considers the extent to which each company contributes to, or benefits from, sustainable development. This is assessed by reference to the SDGs. This assessment and analysis involves looking at the capital expenditure of each current or potential portfolio holding, and then mapping this expenditure against the SDGs to determine whether the net contribution being made is positive, neutral or negative.

As regards the promotion of climate change mitigation, for utility companies with material (over 2GW of energy generation capacity) energy generation assets, the relevant indicators are;

- demonstrating declining carbon intensity* (as measured by tons of carbon emitted per MWh of electricity generated) over rolling retrospective five year periods, or a carbon intensity at least 25% below the average of utility companies in the Investment Manager's investment universe; and

*The measure of carbon intensity over time may be adjusted to take into account circumstances including but not limited to corporate restructurings such as an investment's acquisition or divestment of energy generation assets, or changes in

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. capacity factors i.e. how often different power plants with different carbon intensities, are being run.

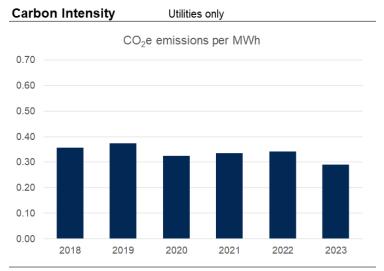

• The imposition of a 20% limit to coal generation exposure as measured by proportion of a company's overall assets that consist of coal-fired generation assets.

As regards the promotion of the protection of labour rights, and the provision of safe and secure working environments for all workers, the relevant indicators are adherence to the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises.

The following shows the indicators used by the portfolio to measure those characteristics, and the Fund's performance against those indicators, using the most recent date that the relevant data is available for.

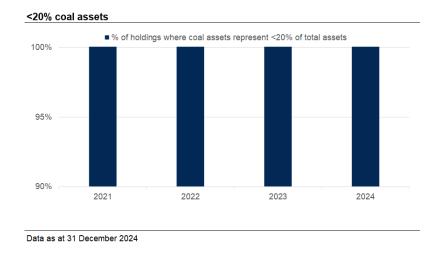

Environmental: For utility companies, demonstrating declining carbon intensity (as measured by tons of carbon emitted per MWh of electricity generated) over rolling retrospective five year periods; or carbon intensity at least 25% below the average of utility companies in the Investment Manager's investment universe. The measure of carbon intensity over time may be adjusted to take into account circumstances including but not limited to corporate restructurings such as an investment's acquisition or divestment of energy generation assets or changes in capacity factors i.e how often different power plants are being run at maximum power requiring non-renewable energy sources.

Power generated by utilities typically represents around 90% of portfolio emissions. Emissions per MWh declined by 19% over the preceding 5 years. Adjusting for changes in corporate structure, such as an investment's acquisition or divestment of energy generation assets; or changes in capacity factors ie how often different power plant types are being run at maximum power, each utility in the portfolio reduced their carbon intensity.

Power generated by utilities represents 90% of portfolio emissions

20% limit to coal generation exposure (as measured by the proportion of a company's overall assets that consist of coal-fired generation assets)

Each electricity-generating utility held by the portfolio during the reference period was compliant with this sustainability indicator.

Alignment with the United Nations' Sustainable Development Goals.

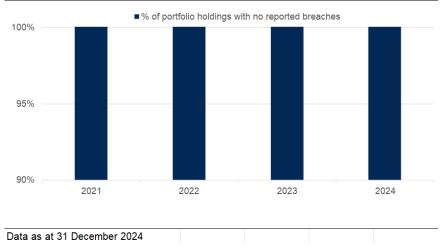

The portfolio's holdings were all compliant with this sustainability indicator during the reference period.

Social: Alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

Any breaches of the OECD Guidelines for Multinational Enterprises or the UN Global Compact identified are reviewed and assessed by the Investment Manager. Such failures or breaches do not automatically prevent the Fund from investing in the relevant company, or lead to divestment from the company by the Fund. Rather, the Investment Manager will monitor and assess the situation and, where deemed necessary, engage with entity management to determine how the entity is responding to the relevant failure or breach. Persistent or systematic failures or breaches may lead to divestment by the Fund, in circumstances where the Investment Manager considers that an entity has not responded adequately to the engagement process.

Alignment with UN GC and OECD Guidelines

... and compared to previous periods?

Please refer to the charts above for an overview of previous periods' performance against these sustainability indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments held by the Fund are to contribute to or benefit from sustainable development, as defined by the SDGs. Such investments must also pass the SFDR "do no significant harm" test. Infrastructure companies provide essential services such as energy, transportation, water and telecommunications that are vital to the functioning of societies and economies. They are often large scale projects with significant capital expenditure requirements.

The sustainable investments of the Fund contribute to climate change mitigation via its utility holdings needing to demonstrate a declining carbon intensity over rolling five year periods. The measure of carbon intensity over time may be adjusted to take into account circumstances including but not limited to corporate restructurings such as an investment's acquisition or divestment of energy generation assets or changes in capacity factors i.e how often different power plants are being run at maximum power requiring non-renewable energy sources. Furthermore, the Fund will only invest in utility companies where coal generation assets represent less than 20% of their total assets. See above for performance on the sustainable investment objectives.

Additionally, the objectives of the sustainable investments held by the Fund are to contribute to or benefit from sustainable development, as defined by the SDGs. The main focus of the Investment Manager is on the following SDGs:

SDG 6: Clean Water and Sanitation SDG 7: Affordable and Clean Energy SDG 9: Industry, Innovation and Infrastructure SDG 11: Sustainable Cities and Communities SDG 12: Responsible Consumption and Production SDG 13: Climate Action.

The sustainable investments held by the Fund contributed to these objectives by allocating capital expenditure in ways that the Investment Manager deems to be supportive of these SDGs.

The Investment Manager analysed the last reported year's capital expenditure of each current or potential portfolio holding, and then mapped this expenditure against the SDGs to determine whether the net contribution being made is positive, neutral or negative.

The other objective of the sustainable investments that the financial product made is climate change mitigation.

During the period under review, the sustainable investments held by the product contributed to this objective in the following ways.

- Investment in renewable energy
- Investment in recycling facilities
- Investing in EV charging infrastructure an
- Investment in LED re-lamping

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's investment process considers "Do No Significant Harm" (DNSH) factors through its quality score assessment. Within the investment managers quality score assessment, sustainability factors are captured both explicitly, through the respective scores assigned to the Environmental, Social and Governance criteria, and implicitly, where ESG factors are relevant to the other 22 criteria considered by the Investment Manager.

In addition, relevant Principal Adverse Impact (PAI) criteria are assessed for each of the portfolio's sustainable investments, providing further data points.

Other information referenced in this assessment included (i) ESG disclosure for companies through SFDR Principal Adverse Impacts (ii) the Investment Manager's own proprietary research and (iii) company engagement.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. -How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has established an in-house model to measure and monitor indicators for each of the mandatory PAIs. These statistics play a key role in determining what score should be assigned to each of the sustainability-related quality criteria, for each company that the team researches and invests in. As we go forward, indicator trends will become increasingly meaningful as data points accumulate.

The information sourced here helps to inform the team's Quality Ranking model, which consists of 25 criteria that the Investment Manager believes influence stock returns in general and infrastructure securities in particular.

Information from a broad range of additional sources is also used by the Investment Manager to determine what quality scores to assign to each company. These include company meetings and visits, companies' annual reports, corporate social responsibility reports, regulatory reports, industry analysis and government studies.

The Quality Ranking of each company is combined with its Value Ranking, which seeks to rank stocks in the Investment Manager's focus list according to their relative mispricing. This combined ranking provides an overall ranking of the securities on the focus list, which, along with the Investment Manager's Sustainability Analysis, underpins the investment Manager's stock selection and portfolio construction process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Third party ESG data provider, Sustainalytics, reports are used to assess on a monthly basis to check that all portfolio holdings were deemed to be aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Asset allocation describes the share of investments in specific assets. Throughout the 2024 calendar year company, all investee companies were deemed to be in alignment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager has committed that for every active equity investment, the corresponding issuer should be assessed for relevant PAIs and the results of this assessment documented.

Where PAIs are identified (based on the research and analysis described in the response above) the Investment Manager engages with the company in accordance with the commitments made under First Sentier Investors' Responsible Investment and Stewardship Policy and Principles.

Where engagement is unsuccessful, the Investment Manager considers escalating the issue by:

□ wider engagement with other investors;

□ writing to or meeting with the chairperson or lead independent director;

 $\hfill\square$ voting against directors they feel are not providing appropriate oversight; or

□ making their views public.

If an appropriate response is not received from the company or engagement on the topic is otherwise deemed to have been unsuccessful, the Investment Manager will consider divestment.

Principal Adverse Impact data is sourced from a third-party ESG data provider. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies

What were the top investments of this financial product?

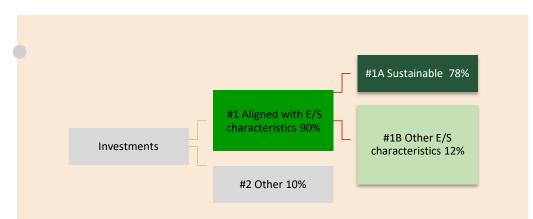

Largest Investments	Sector	% Assets	Country
NextEra Energy, Inc.	Utilition	8.00	United States
Union Pacific Corporation	Industrials	8.00	United States
American Tower Corporation	Real Estate	5.57	United States
Exelon Corporation	Utilities	5.17	United States

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January to 31st of December 2024

Norfolk Southern Corporation	Industrials	4.91	United States
Eversource Energy	Utilities	4.36	United States
Dominion Energy Inc	Utilities	4.23	United States

78% of the portfolio was invested in sustainability-related investments.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The Fund invests in infrastructure companies that can contribute or benefit from sustainable development. Its holdings during the 2024 calendar year were constituents of the following Global Industry Classification Standards (GICS) subsectors:

Sector	% Assets
Communication Services	0.9
Industrials	33.0
Real Estate	8.2
Utilities	56.2
Cash and cash equivalents	1.6

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

 operational expenditure (OpEx) reflects the green operational activities of investee companies. To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product investment in fossil gas and/or nuclear energy related activities

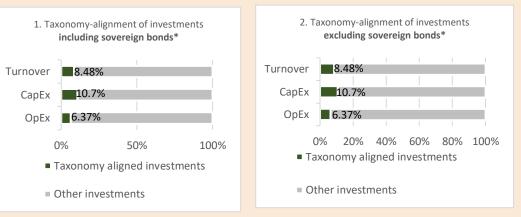

□ Yes

🗆 In fossil gas 🛛 In nuclear energy

🛛 No

N/A. The sustainable investments with an environmental objective that the Fund invested in during this period were not aligned with EU taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in enabling activities based on Capex was 3.90%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

2023	2024	
2.8%	8.48%	
3.2%	10.7%	
1.3%	6.37%	
	2.8%	2.8% 8.48% 3.2% 10.7%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The above table reflects the funds Climate Change mitigation taxonomy alignment based on reported company data. The remaining portion of sustainable investments with an environmental objective are not aligned with the EU Taxonomy

What was the share of socially sustainable investments?

N/A. The product invests in environmentally rather than socially sustainable investments.

What investments were included under "other", what was their purpose and were ever any minimum environmental or social safeguards?

The investments included under "Other" consisted of a small cash weight, maintained for efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the 2024 calendar year, the team carried out engagement activity and cast proxy votes in support of the environmental and social characteristics promoted by the financial product.

Voting activity:

Total proposals to vote on	617
Number of meetings to vote at	41
Number of companies that held voting meetings	38
Number of votes against management proposals	56
Number of votes abstained from voting	3
Number of shareholder proposals to vote on	29
Number of shareholder proposals voted against	13
Number of shareholder proposals abstained from voting	0

Engagement

When we engage, we first raise issues in meetings with company management, in order to put our view across and to understand the situation from the company's perspective.

If we don't see change, we will then contact the Board, for example by writing a formal letter, outlining our concerns. If we feel that our concerns are still not being addressed, we may vote against the company via proxy shareholder voting.

In instances where management does not respond adequately to engagement, this may negatively affect our quality scores for ESG-related factors for that company, which could result in our divesting ownership. We view this approach as being an important element of our fiduciary responsibilities.

Topics of engagement during the year included climate change mitigation, climate change adaptation, worker safety and corporate governance.

Proxy voting

The global listed infrastructure investment team votes on all issues at company meetings where it has the authority to do so. We believe voting rights are a valuable asset, which should be managed with the same care and diligence as any other asset.

Ultimately, shareholders' ability to influence management depends on shareholders' willingness to exercise those rights.

Recommendations are sought from a selection of independent corporate governance research providers; however, our investment teams retain full control of their voting decisions.

When we intend to vote against a proposal, we may choose to make representations to a company prior to the vote, so that appropriate consultation may take place with a view to achieving a satisfactory solution.

Our team maintains records when they vote against management or against the recommendations of the proxy voting advisors (Glass Lewis).

Key proxy voting themes for the financial product include climate change and bestpractice corporate governance.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

N/A The product does not use a reference benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A The product does not use a reference benchmark.

How did this financial product perform compared with the reference benchmark?

N/A The product does not use a reference benchmark.

How did this financial product perform compared with the broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

549300SL3RBSIYHE9F49

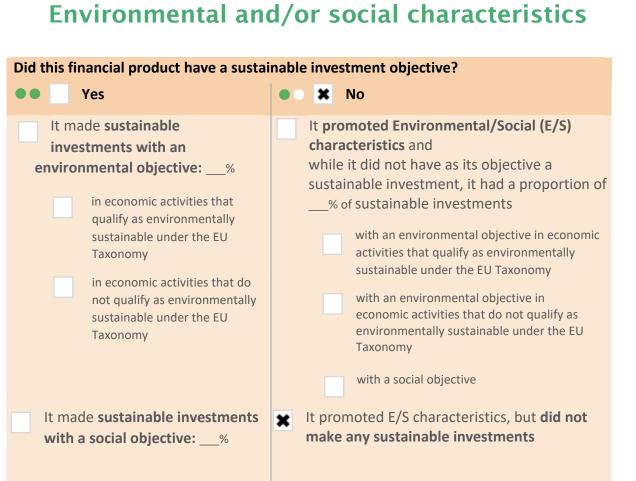

Sustainable

Product name:

FSSA Global Emerging Markets Focus Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

Environment	tal Indicators		
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average. 		
Social In	dicators		
Human health	• Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year.		
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 		
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is not exposed to thermal coal revenues from mining or processing, verified by 0% revenues from the last three years.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI Emerging Markets Index) for the reported year.

On social characteristics:

• The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- ...and compared to previous periods? The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- —— How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

What were the top investments of this financial product?

	Largest Investments	Sector	% Assets	Country
	Taiwan Semiconductor	Information	7.74	Taiwan
	Manufacturing Co., Ltd. HDFC Bank INR1	Technology Financials	6.43	India
The list includes the	Alsea, S.A.B. de C.V.	Consumer Discretionary	5.60	Mexico
investments constituting the	Tencent Holdings Ltd.	Communication Services	5.21	Hong Kong China
greatest proportion	ICICI Bank Limited	Financials	4.72	India
of investments of the financial product during the reference	Prosus N.V. Eur0.05	Consumer Discretionary	4.61	South Africa
period which is: 1 January to 31st of	ICICI Lombard General Insurance Co. Ltd.	Financials	4.25	India
December 2024	Tsingtao Brewery	Consumer Staples	4.04	Hong Kong China
	Despegar.com, Corp.	Consumer Discretionary	3.95	United States
	Credicorp Ltd.	Financials	3.78	United States

	Sichuan Swellfun 'A'CNYI	Consumer Staples	2.40	China
	Shenzhen Mindray Bio-Medic-A	Health Care	2.33	China

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments? Not applicable.

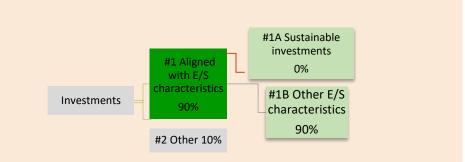

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	6.5
Consumer Discretionary	26.3
Consumer Staples	15.4
Financials	31.3
Health Care	3.5
Industrials	2.2
Information Technology	13.5
Cash and cash equivalents	1.2

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

- capital expenditure

(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

 operational expenditure (OpEx) reflects the green operational activities of investee companies.

□ In fossil gas □ In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable

What was the share of socially sustainable investments Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Total proposals voted on	450
Number of meetings voted at	63
Number of votes for management proposals	439
Number of votes against management proposals	8
Number of votes abstained from voting	3
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

How did this financial product perform compared to the reference benchmark? Not applicable

- How does the reference benchmark differ from a broad market index? Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable
- How did this financial product perform compared with the reference benchmark? Not applicable

How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

Product name:

Stewart Investors Worldwide All Cap Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Legal entity identifier:

549300CUQ1MDVG6JSB91

Did t	Did this financial product have a sustainable investment objective?				
••	× Yes	• No			
×	It made sustainable investments with an environmental objective: 76% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective 			
×	It made sustainable investments with a social objective: 100%	It promoted E/S characteristics, but did not make any sustainable investments			

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **49** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **116 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- Transport efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **49** companies. **37 companies (76%)** were contributing to **climate change solutions**. These companies were contributing to **35** different solutions and, in total, were making **116 contributions** to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

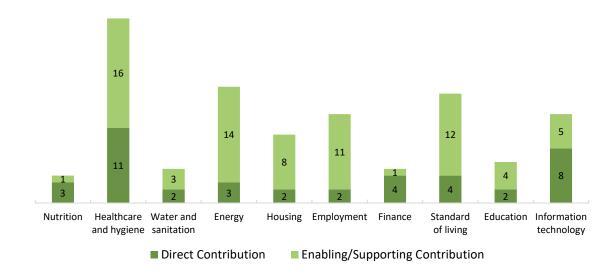

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

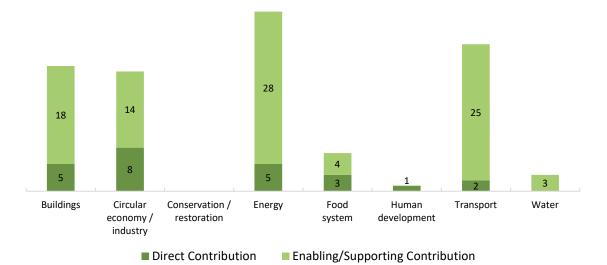

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

…and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

Human development pillars	Contribution	31-Dec- 2023	31-Dec- 2022	31-Dec- 2021

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

ESAB Corporation

Activity exposure >5% revenue: Supporting Oil & Gas

Reason for exception/holding: The company provides welding and cutting and gas control equipment and systems for a variety of industries including manufacturing, infrastructure, energy, shipbuilding and rail.

The external research provider estimates that revenues from products and services supporting oil and gas accounted for 20% of ESAB's overall revenue in FY2022, when the company had not yet begun to report revenue split by end market. The company released its inaugural sustainability report in 2023, coinciding with its first year as an independent corporation. The Investment Manager met with the company and based on their own analysis on the latest (2023) company data and believe the exposure to products and services supporting oil and gas within the business to be no greater than 9% which is lower than the external estimate but higher than their materiality threshold of 5%. They also believe exposure to oil and gas will continue to fall in the company continues to focus on growing sales in renewable energy. They will continue to engage with the company on their progress in this area.

Spirax-Sarco Engineering

Activity exposure >5% revenue: Supporting Oil & Gas.

Reason for exception/holding: The company provides precision heat and control equipment and systems that improve energy efficiency for customers operating in the oil industry.

Revenues derived from oil and gas supporting products and services accounted for 5% of the company's overall revenue in FY2022.

The Investment Manager sold the company during the period.

WEG

Activity exposure >5% revenue: Supporting Oil & Gas and Supporting Thermal Coal

Reason for exception/holding: The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. WEG also manufacture and sell energy efficient electric motors, which help their customers reduce their energy requirements and greenhouse gas emissions.

Revenues derived from oil and gas supporting products and services, and thermal coal supporting products and services accounted for an estimated 2.5% per activity (5% in total) of the company's overall revenue in FY2022, according to the external research provider.

Thermal coal exposure for supporting products and services was added by the external research provider in early 2023 and the Investment Manager contacted the company directly to check the 2.5% revenue estimates provided. Given that coal is not a strategic market segment for their products or customers, the company estimate that <1% revenues to be a more accurate reflection of their exposure.

Updated research provided during 2024: WEG flagged against the policy for the first half of 2024 and the wording above relates to this. In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The Investment Manager removed WEG from their material exposure disclosures.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

Mandatory indicators	Metrics	2024	2023	2022
Exposure	(EUR m)	147	211	247
	Scope 1 (tCO2eq)	473	452	424

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for **WEG** and **Westinghouse Air Brake Tech (Wabtec)**. WEG manufactures and sells efficient electrical motors, which help customers across a variety of industrial sectors reduce their energy requirements. The thirdparty data provider estimates WEG as having 1% of their total revenue derived from products supporting thermal coal. Wabtec is a leading supplier of locomotives, brakes and other rail equipment. The third-party data provider estimates that the company derives 1% of revenue from products used by customers operating thermal coal mines.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

What were the top investments of this financial product?

Assa Abloy	Industrials	2.2	Sweden

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

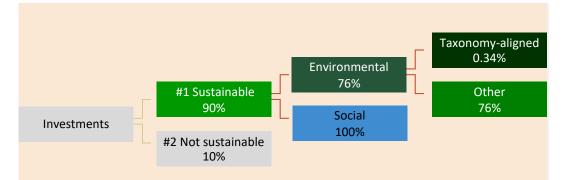

The list includes the

investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January

2024 to 31 December 2024.

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#1 Sustainable covers sustainable investments with environmental or social objectives. **#2 Not sustainable** includes investments which do not aualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100. The 0.34% Taxonomy-aligned figure is weighted contribution based on reported turnover reflecting the share of revenue from green activities of investee companies. Separately, the 76% 'Other' figure is based on those companies contributing towards the Investment Manager's climate solutions assessment detailed above.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	3.3
Consumer Discretionary	1.7
Consumer Staples	9.8
Energy	-
Financials	10.0
Health Care	17.9
Industrials	23.6
Information Technology	31.1
Materials	1.6
Real Estate	-
Utilities	-
Cash and cash equivalents	1.0

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

For part of the period, the Fund held **Spirax-Sarco Engineering** which derives 5% of revenues from products and services supporting the oil & gas industry. The company provides precision heat and control equipment and systems that improve

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the

share of revenue from green activities of investee companies capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

energy efficiency for customers operating in the oil industry. The Fund also held **WEG** which derives revenues from oil and gas supporting products and services, and thermal coal supporting products and services estimated as 2.5% per activity (5% in total). In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. Finally, the Fund held **ESAB Corporation** which derives c.20% of revenues from products and services supporting the oil & gas industry according to the external research provider but the Investment Manager believes this to be much lower. The company provides welding and cutting and gas control equipment and systems for a variety of industries including manufacturing, infrastructure, energy, shipbuilding and rail. (Full details are in the 'do no harm' section above).

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

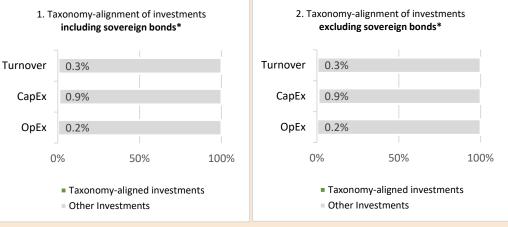

🛛 Yes

□ In fossil gas □ In nuclear energy

🛛 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

% figures represent taxonomy-aligned investments *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Based on reported turnover, the share of investments that the Fund made in transitional activities was **0.02%** and enabling activities was **0.32%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Based on reported turnover, the percentage of investments aligned with the EU Taxonomy for the previous reference period was **1.0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **49** companies. Based on reported turnover data, **45** of the **49** companies had **no alignment** with the EU Taxonomy.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

sustainable economic activities under the EU

Taxonomy.

tor environmentally sustainable economic activities under the EU

Taxonomy.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below:

Stewardship and corporate	Engagement	Proxy voting	Annual review
engagement policy	booklet		Annual review

During the reporting period, the Investment Manager met with 76% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- Diversity, equity and inclusion diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure.

During the period the Investment Manager engaged with **60%** of Fund companies on the following topics -

- Environment: 18%
- Social: 20%
- Governance: 61%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	49
Number of meetings to vote at	57
Total proposals to vote on	675
Number of votes against management proposals	34
Number of votes abstained from voting	2
Number of shareholder proposals to vote on	7
Number of shareholder proposals voted against	4
Number of shareholder proposals abstained from voting	1

Voting rationales: 1 January 2024 to 31 December 2024

Company	Proposal	No. of proposals	Voting decision	
A.O. Smith Advanced Drainage	Appointment of auditor	16	Against management recommendation	
Systems Arista Networks Edwards Lifesciences EPAM Systems Fortinet Markel Nordson Roche Roper Technologies Spirax Group Synopsys Texas Instruments Veeva Systems Vitasoy Zebra Technologies	Rationale The auditor has been in place for over ten years and the companies have given no information on intended rotation which the Investment Manager believes is important for ensuring a fresh perspective on the accounts.			
	Shareholder proposal: hiring practices	1	Against shareholder proposal	
A.O. Smith	Rationale The shareholder proposal requested the company to report on hiring practices for people with arrest records. The Investment Manager did not deem this necessary or productive and support the company's hiring process.			
	Remuneration	2	Against management recommendation	
Ashtead Group	Rationale The Investment Manager was concerned about excesses in the CEO salary.			
	Remuneration	2	Against management recommendation	
Assa Abloy	Rationale The Investment Manager believes that acquisition-centric businesses should incentivise management on returns as well as shares held.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

• How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Stewart Investors Global Emerging Markets All Cap Fund

Sustainable investment objective

Legal entity identifier:

549300V44ENSGLMQBN36

Did this financial product have a sustainable investment objective? × Yes No It made sustainable It promoted Environmental/Social (E/S) × investments with an characteristics and while it did not have as its objective a environmental objective: 62% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that gualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It promoted E/S characteristics, but did not It made **sustainable** × make any sustainable investments investments with a social objective: 100%

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **47** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **138 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **47** companies. **29** companies (62%) were contributing to climate change solutions. These companies were contributing to **32** different solutions and, in total, were making **90** contributions to the solutions.

Sustainability indicators measure how the sustainable objectives of this financial product are attained. Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions</u>

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

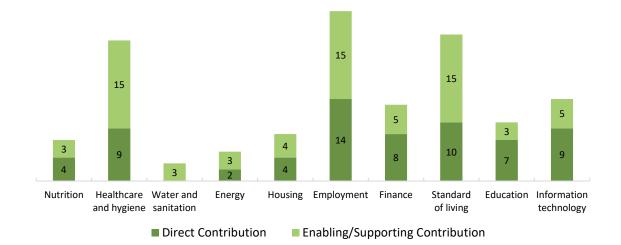

• How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

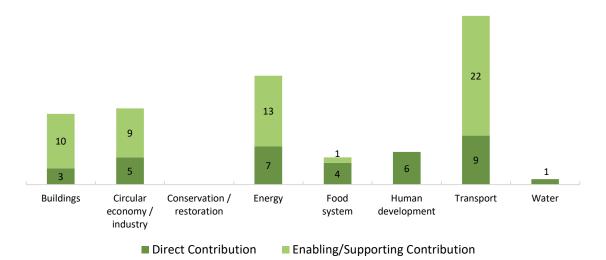

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

...and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

Human development pillars	Contribution	31-Dec- 2023	31-Dec- 2022	31-Dec- 2021

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

WEG

Activity exposure >5% revenue: Supporting Oil & Gas and Supporting Thermal Coal

Reason for exception/holding: The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. WEG also manufacture and sell energy efficient electric motors, which help their customers reduce their energy requirements and greenhouse gas emissions.

Revenues derived from oil and gas supporting products and services, and thermal coal supporting products and services accounted for an estimated 2.5% per activity (5% in total) of the company's overall revenue in FY2022, according to the external research provider.

Thermal coal exposure for supporting products and services was added by the external research provider in early 2023 and the Investment Manager contacted the company directly to check the 2.5% revenue estimates provided. Given that coal is not a strategic market segment for their products or customers, the company estimate that <1% revenues to be a more accurate reflection of their exposure.

Updated research provided during 2024: WEG flagged against the policy for the first half of 2024 and the wording above relates to this. In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The Investment Manager removed WEG from their material exposure disclosures.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024	2023	2022

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for **WEG**. WEG manufactures and sells efficient electrical motors, which help customers across a variety of industrial sectors reduce their energy requirements. The third-party data provider estimates WEG as having 1% of their total revenue derived from products supporting thermal coal.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

Largest investments Sector % assets Country Mahindra & Mahindra **Consumer Discretionary** 7.3 India TSMC Information Technology 6.0 Taiwan HDFC Bank **Financials** 5.1 India India Tube Investments **Consumer Discretionary** 5.0 4.5 India **Tata Consultancy Services** Information Technology WEG Industrials 3.0 Brazil Unicharm **Consumer Staples** 2.9 Japan Voltronic Power Industrials 2.8 Taiwan Jerónimo Martins Portugal **Consumer Staples** 2.8 RaiaDrogasil **Consumer Staples** 2.6 Brazil **EPAM Systems** Information Technology 2.5 United States Samsung Electronics Information Technology 2.4 South Korea 2.4 Globant Information Technology Argentina Quálitas Financials 2.3 Mexico AirTAC International Industrials 2.3 Taiwan

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

Asset allocation describes the share of investments in specific assets.

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

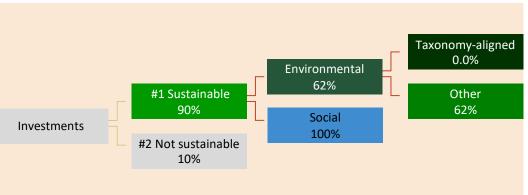

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#2 Not sustainable includes investments which do not quality as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	0.6
Consumer Discretionary	18.8
Consumer Staples	15.6
Energy	-
Financials	14.1
Health Care	5.4
Industrials	17.0
Information Technology	24.7
Materials	-
Real Estate	-
Utilities	-
Cash and cash equivalents	3.7

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution,

including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

During the period the Fund held **WEG** which derives revenues from oil and gas supporting products and services, and thermal coal supporting products and services estimated as 2.5% per activity (5% in total). In Q2 2024, the thermal coal exposure estimated by the external service provider reduced from 2.5% to 1%, meaning the company's overall fossil fuel revenue exposure reduced below the 5% threshold. The company manufactures and sells renewable energy solutions used in solar and wind power generation, hydroelectric power plants and biomass helping society to shift away from fossil fuel energy production. (Full details are in the 'do no harm' section above).

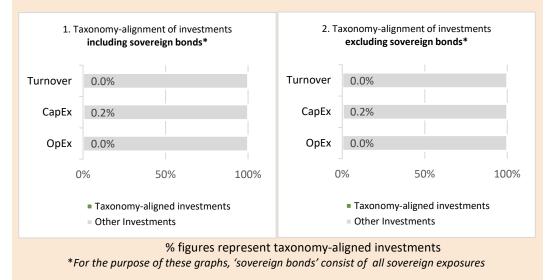

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

- Did the financial product invest in fossil gas and/or nuclear energy related activities?
- 🛛 Yes
- □ In fossil gas □ In nuclear energy
- 🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
 capital

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy for the previous reference period was **0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **47** companies. Based on reported turnover data, **46** of the **47** companies had **no alignment** with the EU Taxonomy.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporateEngagementProxy votingAnnual reviewengagement policybooklet

During the reporting period, the Investment Manager met with 81% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives
- Animal testing/welfare animal testing exposure
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health
- **Diversity, equity and inclusion** diversity, particularly gender, in senior management and on boards
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food
- Governance corporate strategy and legal structure

During the period the Investment Manager engaged with **56%** of Fund companies on the following topics -

- Environment: 34%
- Social: 18%
- Governance: 48%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below.

Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	56
Number of meetings to vote at	94
Total proposals to vote on	783
Number of votes against management proposals	24
Number of votes abstained from voting	17
Number of shareholder proposals to vote on	1
Number of shareholder proposals voted against	1
Number of shareholder proposals abstained from voting	0

Voting rationales: 1 January 2024 to 31 December 2024

TOTVS	Approval for establishment of supervisory council and cumulative voting	2	Against management recommendation			
	Rationale No detail on the candida	tes had bee	n provided.			
	Approval for recasting and cumulative voting	3	Against management recommendation			
	Rationale The recasting and cumulative voting would allow the board to make changes without shareholder assessment or knowledge of candidates.					
WEG	Supervisory council election Separate board election	2	Abstained from voting			
	Rationale The Investment Manager did not receive enough information on the motions and they also preferred the current family stewards remain in place.					

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Stewart Investors Asia Pacific Leaders Fund

Legal entity identifier: 549300VKJEPJT5Q4V960

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes No It made **sustainable** It promoted Environmental/Social (E/S) × characteristics and investments with an while it did not have as its objective a environmental objective: 68% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do × with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but **did not** × investments with a social make any sustainable investments objective: 100%

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **40** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **121 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website - <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- **Food system** sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **40** companies. **27** companies (68%) were contributing to climate change solutions. These companies were contributing to **32** different solutions and, in total, were making **91** contributions to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions</u>

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

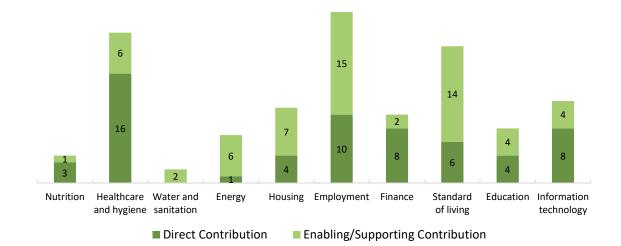

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

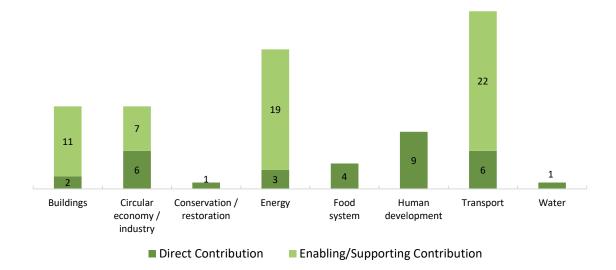

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

...and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics (EUR m)	2024 889	2023 854	2022 976

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for **Samsung C&T** and **Wesfarmers**. Samsung C&T, which was held for part of the reporting period, is a holding company with direct operating businesses in construction and trade, plus high-value holdings in health and electronics. The third-party data provider estimates that the company derives c.1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production. Wesfarmers is an Australian conglomerate with businesses in home improvement, retail, health, chemicals and fertilisers. The third-party data provider estimates that the company derives c.1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

Largest investments	Sector	% assets	Country
Mahindra & Mahindra	Consumer Discretionary	8.2	India
HDFC Bank	Financials	5.4	India
OCBC	Financials	5.1	Singapore
Ноуа	Health Care	5.1	Japan
Samsung Electronics	Information Technology	4.6	South Korea
TSMC	Information Technology	4.3	Taiwan
Tata Consultancy Services	Information Technology	3.8	India
CSL	Health Care	3.8	Australia
Dr. Reddy's Laboratories	Health Care	3.5	India
Unicharm	Consumer Staples	3.5	Japan
Midea	Consumer Discretionary	3.3	China
Tech Mahindra	Information Technology	3.1	India
Fisher & Paykel Healthcare	Health Care	3.0	New Zealand
Godrej Consumer Products	Consumer Staples	3.0	India
Kotak Mahindra Bank	Financials	2.8	India

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	3.9
Consumer Discretionary	11.8
Consumer Staples	12.7
Energy	-
Financials	16.9
Health Care	20.5
Industrials	5.8
Information Technology	24.5
Materials	-
Real Estate	-
Utilities	-
Cash and cash equivalents	4.0

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

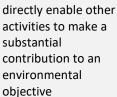

🛛 Yes

□ In fossil gas □ In nuclear energy

🛛 No

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

turnover

 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
 capital
 expenditure
 (CapEx) showing
 the green
 investments made

by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. T		iment of investr vereign bonds*		2. Ta		ignment of inves sovereign bonds

% figures represent taxonomy-aligned investments *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy for the previous reference period was **0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **40** companies. Based on reported turnover data, there was no alignment with the EU taxonomy from any of these companies.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporateEngagementProxy votingAnnual reviewengagement policybooklet

During the reporting period, the Investment Manager met with 80% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- Pollution, natural resource degradation, biodiversity and climate change packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- **Diversity, equity and inclusion** diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- **Governance** corporate strategy and legal structure.

During the period the Investment Manager engaged with **54%** of Fund companies on the following topics -

- Environment: 28%
- Social: 32%
- Governance: 40%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	41
Number of meetings to vote at	70
Total proposals to vote on	496
Number of votes against management proposals	14
Number of votes abstained from voting	0
Number of shareholder proposals to vote on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

Voting rationales: 1 January 2024 to 31 December 2024

Company	Proposal	No. of proposals	Voting decision

Electronics	Rationale The Investment Manager non-family associated dire		e preferred more independent,	

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective Did this financial product have a sustainable investment objective? × Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an

environmental objective: 65% in economic activities that qualify as environmentally sustainable under the EU

Stewart Investors Asia Pacific All Cap Fund

Product name:

×

in economic activities that do × not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: 100%

Taxonomy

while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic

Legal entity identifier:

549300BZRT184DKU8I49

activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in

economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

×

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **65** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **183 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **65** companies. **42** companies (**65%**) were contributing to climate change solutions. These companies were contributing to **39** different solutions and, in total, were making **136** contributions to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

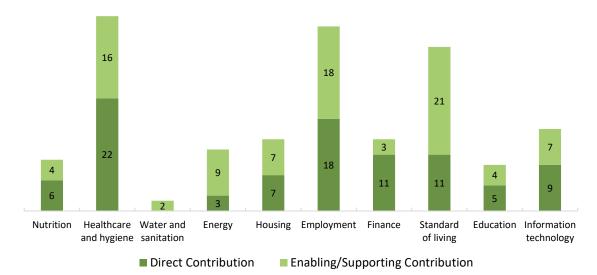

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

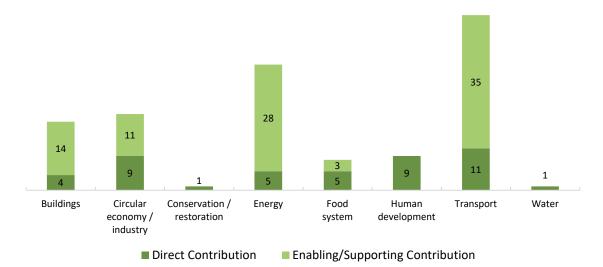

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

…and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024	2023	2022

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above for the reporting period is for **Samsung C&T** and **Wesfarmers**. Samsung C&T, which was held for part of the reporting period, is a holding company with direct operating businesses in construction and trade, plus high-value holdings in health and electronics. The third-party data provider estimates that the company derives c.1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production. Wesfarmers is an Australian conglomerate with businesses in home improvement, retail, health, chemicals and fertilisers. The third-party data provider estimates that the company derives c.1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

Largest investments	Sector	% assets	Country
Mahindra & Mahindra	Consumer Discretionary	7.7	India
Tube Investments	Consumer Discretionary	4.7	India

Ноуа	Health Care	2.5	Japan
Inovance	Industrials	2.4	China
MediaTek	Information Technology	2.3	Taiwan

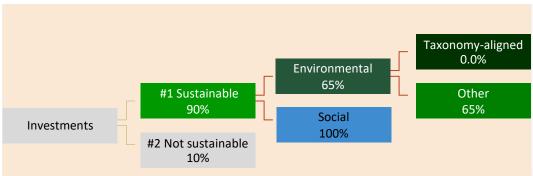

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#1 Sustainable covers sustainable investments with environmental or social objectives. **#2 Not sustainable** includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

Sector	% assets
Communication Services	3.3
Consumer Discretionary	18.6
Consumer Staples	9.4
Energy	-
Financials	8.7
Health Care	15.2
Industrials	20.9
Information Technology	22.1
Materials	-
Real Estate	-
Utilities	-
Cash and cash equivalents	1.8

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

🛛 Yes

□ In fossil gas □ In nuclear energy

🛛 No

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic

activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

% figures represent taxonomy-aligned investments *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy for the previous reference period was **0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **65** companies. Based on reported turnover data, there was no alignment with the EU taxonomy from any of these companies.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

Taxonomy-aligned activities are expressed as a share of:

- turnover

reflecting the share of revenue from green activities of investee companies

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

are

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporateEngagementProxy votingAnnual reviewengagement policybooklet

During the reporting period, the Investment Manager met with 73% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- Pollution, natural resource degradation, biodiversity and climate change packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- Diversity, equity and inclusion diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure.

During the period the Investment Manager engaged with **51%** of Fund companies on the following topics -

- Environment: 31%
- Social: 27%
- Governance: 42%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	66
Number of meetings to vote at	109
Total proposals to vote on	695
Number of votes against management proposals	19
Number of votes abstained from voting	2
Number of shareholder proposals to vote on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

Voting rationales: 1 January 2024 to 31 December 2024

Company	Proposal	No. of proposals	Voting decision	
Glodon Philippine Seven	Appointment of auditor	7	Against management recommendation	
ResMed Unilever Indonesia Vitasoy Yifeng Pharmacy Chain Zhejiang Supor	Rationale The auditor has been in place for over ten years and the companies have given no information on intended rotation which the Investment Manager believes is important for ensuring a fresh perspective on the accounts.			
	Transaction of business	2	Against management recommendation	
Kasikornbank Philippine Seven	Rationale The companies did not provide enough information about the proposals and the Investment Manager wanted to avoid giving them unrestricted decision-making power without sufficient clarity.			
Amoy Diagnostics	Amendments to work systems and procedural rules	2	Abstained from voting	
	Rationale The company did not provide sufficient information on the proposed amendments.			
	Remuneration	1	Against management recommendation	
Bank Central Asia				
Mideo	Adjustment of the guarantee for controlled subsidiaries assets pool business Employee stock ownership plan	4	Against management recommendation	
Midea	Rationale On the guarantee for controlled subsidiaries assets pool business, the Investment Manager found the guarantee amount to be excessive. On the proposed employee stock ownership plan, the Investment Manager believed that non-executive director involvement could lead to a conflict of interest.			

Pentamaster	Authority to issue shares without pre-emptive rights	1	Against management recommendation	
Pentamaster	Rationale The Investment Manager does not believe shares should be issued without pre-emptive rights.			
	Direction election	3	Against management	
	Remuneration		recommendation	
	Rationale			
	The Investment Manager	believed tha	t a director who has retired	
ResMed	from the company should step down from the board. Their vote against the re-election of the Chair of the nominating and governance committee was due to decreasing gender diversity on the board. In addition, they voted against executive remuneration and payment terms due to concerns about the complexity and use			
	of many adjusted metrics.			
	Direction election	1	Against management recommendation	
Samsung	Rationale			
Electronics	The Investment Manager would have preferred more independent, non-family associated directors.			

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the

sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

5493003H85K45YEMYA03

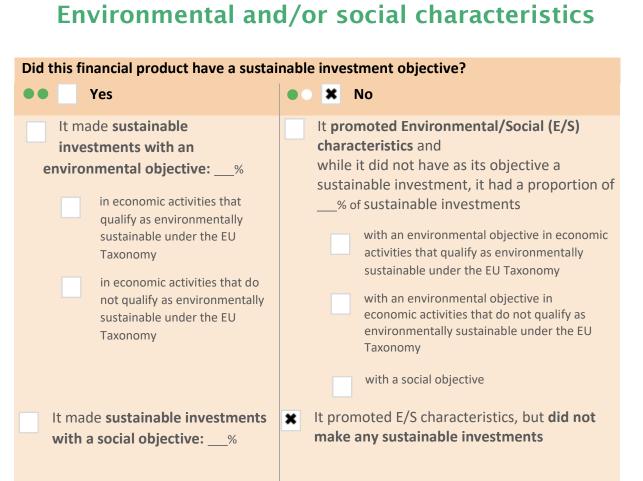

Sustainable

Product name:

FSSA China A Shares Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted

by this financial product met? The Investment Manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

[al Indicators			
Environmental Indicators				
Fossil fuel exposure	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average. 			
Social In	dicators			
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year. 			
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 			
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

The fund is not exposed to thermal coal revenues from mining or processing, verified by 0% revenues from the last three years.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI China A Onshore Index) for the reported year.

On social characteristics:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- *...and compared to previous periods?* The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

What were the top investments of this financial product?

	Largest Investments	Sector	% Assets	Country
The list includes the	China Mengniu Dairy Co., Ltd.	Consumer Staples	8.12	Hong Kong China
investments constituting the greatest proportion	China Merchants Bank Co., Ltd. Class A	Financials	7.31	China

	Yifeng Pharmacy Chain Co Ltd Class A	Consumer Staples	2.27	China

What was the proportion of sustainability-related investments? Not applicable.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	13.4
Consumer Staples	16.9
Financials	20.6
Health Care	9.9
Industrials	31.1
Information Technology	5.0
Materials	2.9
Real Estate	0.6
Cash and cash equivalents	0.0

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product investment in fossil gas and/or nuclear energy related activities
- □ Yes

□ In fossil gas □ In nuclear energy

🖾 No

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

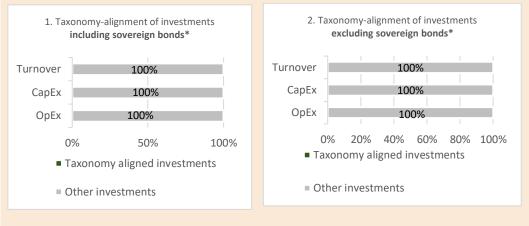

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a

green economy. - operational expenditure (OpEx) reflects the green operational activities of investee

companies.

transition to a

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment manager's (FSSA Investment Managers) AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain in the long run and where there is the management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies (frequent meetings, conversations, letters and collaborative engagement), we raise legitimate concerns and encourage them to address the issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting activity:

<u> </u>	
Total proposals voted on	813
Number of meetings voted at	95
Number of votes for management proposals	796
Number of votes against management proposals	17
Number of votes abstained from voting	0

- Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

Product name:

Stewart Investors European All Cap Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Legal entity identifier:

254900AC9R2R60MRRP06

Did this financial product have a sustainable investment objective?			
🔹 🗶 Yes	• No		
 It made sustainable investments with an environmental objectiv in economic activities qualify as environmen sustainable under the Taxonomy in economic activities not qualify as environ sustainable under the Taxonomy 	that sustainable investment, it had a proportion of% of sustainable investments tally EU with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in		
It made sustainable investments with a soci objective: 100%	al It promoted E/S characteristics, but did not make any sustainable investments		

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **42** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **102 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **42** companies. **32 companies (76%)** were contributing to **climate change solutions**. These companies were contributing to **38** different solutions and, in total, were making **106 contributions** to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

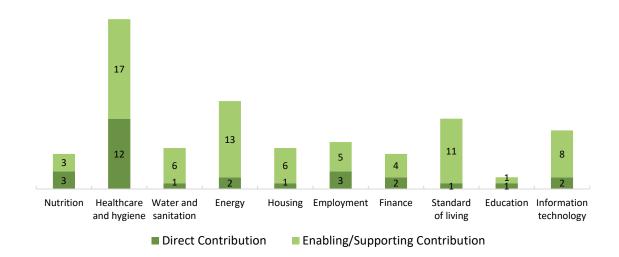

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

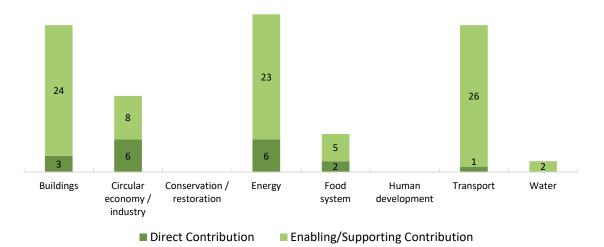

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

...and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

Human development pillars	Contribution	31-Dec- 2023	31-Dec- 2022	31-Dec- 2021

During 2022 and following feedback from clients, the Investment Manager removed the Indirect Contribution from their climate solutions measures.

Indirect Contribution – providing generic products or services to companies making direct or enabling contributions or making operational decisions which have a material contribution.

In 2022, Project Drawdown added 11 new climate solutions to their framework. The Investment Manager considered these new solutions for their 2022 reporting measures. More detail on these changes are available on the Investment Manager's website: stewartinvestors.com/all/insights/climate-solutions-update

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy.

During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Air Liquide

Activity exposure >5% revenue: Supporting Oil & Gas.

Reason for exception/holding: The company produces essential gases which are necessary inputs for a variety of end customers including healthcare, chemicals, energy, manufacturing, electronics and food & beverages.

The external research provider estimates that revenues from products and services supporting oil and gas accounted for 15% of Air Liquide's overall revenue in FY2023. Oil and gas revenues are within their large industries segment which is c.28% of revenue and includes chemicals, metals and energy.

The most prominent product sold to the oil and gas industry is hydrogen used to remove sulphur from material during refining. This has environmental benefits such as reducing acid rain. They also provide nitrogen to the oil and gas industry for safety purposes.

The company plans to further develop products to support the energy transition, including carbon capture and storage (CCS). They also plan to invest EUR8 billion to reduce emissions from hydrogen production.

Spirax-Sarco Engineering

Activity exposure >5% revenue: Supporting Oil & Gas.

Reason for exception/holding: The company provides precision heat and control equipment and systems that improve energy efficiency for customers operating in the oil industry.

Revenues derived from oil and gas supporting products and services accounted for 5% of the company's overall revenue in FY2022.

The Investment Manager sold the company during the period.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024	2023	2022
Exposure	(EUR m)	2	2	2
	Scope 1 (tCO2eq)	12	13	10
	Scope 2 (tCO2eq)	11	9	8
	Scope 3 (tCO2eq)	1,238	2,130	348
1. GHG Emissions	Total Emissions Scope 1+2 (tCO2eq)	24	21	18

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

What were the top investments of this financial product?

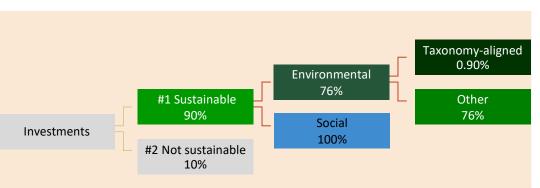

Largest investments	Sector	% assets	Country
Judges Scientific	Industrials	4.9	United Kingdom
Roche	Health Care	4.0	Switzerland
Halma	Information Technology	3.7	United Kingdom

Jerónimo Martins	Consumer Staples	2.6	Portugal
DHL Group	Industrials	2.6	Germany
EPAM Systems	Information Technology	2.5	United States

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#1 Sustainable covers sustainable investments with environmental or social objectives. **#2 Not sustainable** includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100. The 0.90% Taxonomy-aligned figure is weighted contribution based on reported turnover reflecting the share of revenue from green activities of investee companies. Separately, the 76% 'Other' figure is based on those companies contributing towards the Investment Manager's climate solutions assessment detailed above.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	2.2
Consumer Discretionary	1.6
Consumer Staples	9.3
Energy	-
Financials	6.2
Health Care	18.9
Industrials	33.9
Information Technology	20.1
Materials	5.0
Real Estate	-
Utilities	1.2
Cash and cash equivalents	1.6

Asset allocation describes the share of investments in specific assets.

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not

yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

turnover
reflecting the
share of revenue
from green
activities of
investee
companies
capital
expenditure
(CapEx) showing
the green
investments made
by investee
companies, e.g. for
a transition to a

green economy. - operational expenditure (OpEx) reflecting green operational activities of investee companies.

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

For part of the reporting period the Fund held **Spirax-Sarco Engineering** which derives 5% of revenues from products and services supporting the oil & gas industry. The company provides precision heat and control equipment and systems that improve energy efficiency for customers operating in the oil industry. It also held **Air Liquide** which derives >5% of revenues from products and services supporting the oil & gas industry. The company produces essential gases which are necessary inputs for a variety of end customers including healthcare, chemicals, energy, manufacturing, electronics and food & beverages. (Full details are in the 'do no harm' section above).

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

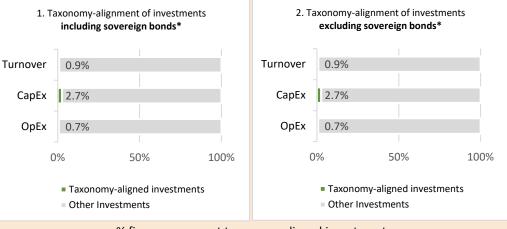

- Did the financial product investment in fossil gas and/or nuclear energy related activities
- □ Yes

□ In fossil gas □ In nuclear energy

🛛 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

% figures represent taxonomy-aligned investments *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Based on reported turnover, the share of investments that the Fund made in transitional activities was **0.02%** and enabling activities was **0.75%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Based on reported turnover, the percentage of investments aligned with the EU Taxonomy for the previous reference period was **3.8%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **42** companies. Based on reported turnover data, **34** of the **42** companies had **no alignment** with the EU Taxonomy.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporate	Engagement	Proxy voting	Annual review
engagement policy	booklet	, ,	Annual Teview

During the reporting period, the Investment Manager met with 77% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period the Investment Manager engaged on topics such as:

- Pollution, natural resource degradation, biodiversity and climate change packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- **Diversity, equity and inclusion** diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure.

During the period the Investment Manager engaged with **50%** of Fund companies on the following topics -

- Environment: 20%
- Social: 17%
- Governance: 63%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	46
Number of meetings to vote at	49
Total proposals to vote on	916
Number of votes against management proposals	26
Number of votes abstained from voting	0

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:

254900FSTFJ4FRX4O843

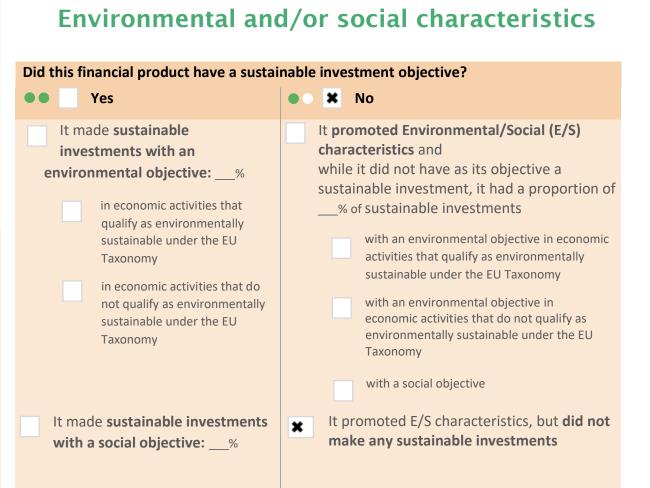

Sustainable

Product name:

FSSA All China Fund

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment manager performs checks against all defined environmental and social characteristics and monitor results on an ongoing basis for each company in the fund. Additionally, each company must pass our exclusions policy and be deemed to contribute meaningfully to society (have a license to operate) before investment.

The fund met all the defined environmental and social characteristics and performed as expected. Please see the following question for more details.

The fund promotes the following environmental and social characteristics and are defined as follows:

Environmental Indicators			
Fossil fuel exposure Social Inc	 Number of companies with material exposure to thermal coal defined as revenues from thermal coal mining and processing in excess of 10% monitored on a retrospective rolling 3-year average. 		
Human health	 Number of companies with revenues from tobacco production. Revenue tolerance is 0% monitored throughout the year. 		
Adverse social impacts	 Number of companies which primarily operate in the gambling industry defined as revenues from gambling in excess of 10% monitored annually. Number of companies involved in the production and distribution of pornography or adult entertainment. Revenue tolerance is 0% monitored throughout the year. 		
Human rights	 Number of companies involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons and chemical weapons, depleted uranium and white phosphorus munitions. Revenue tolerance is 0% monitored throughout the year. 		

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On environmental characteristics:

• The fund is not exposed to thermal coal revenues from mining or processing, verified by 0% revenues from the last three years.

While not a promoted characteristic, the Investment Manager also periodically reviews the carbon footprint for the product's absolute and weighted average carbon intensity of Scope 1 and Scope 2 greenhouse gas emissions for performance below the respective benchmark (MSCI China All Shares Index) for the reported year.

On social characteristics:

• The product does not have any exposure to companies with tobacco revenues, gambling, pornography and controversial weapons as outlined above.

- *...and compared to previous periods?* The indicators have performed similarly to the previous period.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable.
 - How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

 How were the indicators for adverse impacts on sustainability factors taken into account? Not applicable.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January to 31st of December 2024

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager (FSSA Investment Managers) periodically reviews and considers Principal Adverse Impacts (PAI) on sustainability factors for companies across the portfolio. Assessment of key adverse impacts relevant to the portfolio is based on coverage and availability of reliable data.

Where adverse sustainability impacts are identified, the Investment Manager considers engaging with the company in accordance with the commitments made under the Responsible Investment and Stewardship Policy and Principles and as part of FSSA's investment process.

Additionally, beginning in 2025, the Investment Manager is enhancing its considerations of PAI to include a summary of these metrics in new company research documentation.

What were the top investments of this financial product?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	16.4
Consumer Discretionary	22.3
Consumer Staples	15.4

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? Not Applicable.

Did the financial product investment in fossil gas and/or nuclear energy related activities

🗆 Yes

□ In fossil gas □ In nuclear energy

X	No
---	----

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy Not applicable.

What was the share of socially sustainable investments? Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

On average, approximately <5% of the Investment Manager's AUM is held in cash and cash equivalents included in the "other" category. These do not contribute to environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

FSSA invests in companies that it believes will sustain over the long term and where management has the foresight and ideas to address changing societal and environmental expectations.

Through active engagement with companies we raise legitimate concerns and encourage them to address any issues over time. The results of these engagements are documented, distributed, and discussed weekly with all analysts and portfolio managers. Where an investment team has been engaging with a company on an environmental or social issue and does not feel that the company is making progress against the defined objectives outlined as part of the engagement strategy, the team shall consider supporting shareholder resolutions related to the issue and/or voting against directors. The investment team may also consider filing or co-filing a shareholder resolution. A summary of our voting throughout the year is as follows.

Specific to fossil fuel exposure, the Investment Manager verifies performance against the threshold at least once annually.

Voting Information:	
Total proposals voted on	780
Number of meetings voted at	85
Number of votes for management proposals	732
Number of votes against management proposals	47
Number of votes abstained from voting	0
Number of shareholder proposals voted on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0
Number of say-on-pay 1 year votes	1

How did this financial product perform compared to the reference benchmark? Not applicable.

• How does the reference benchmark differ from a broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. • How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index? Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Stewart Investors Indian Subcontinent All Cap Fund

Legal entity identifier: 549300KV9RVYY1I3UF70

Sustainable investment objective

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **36** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **94 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **36** companies. **22** companies (61%) were contributing to climate change solutions. These companies were contributing to **37** different solutions and, in total, were making **75** contributions to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

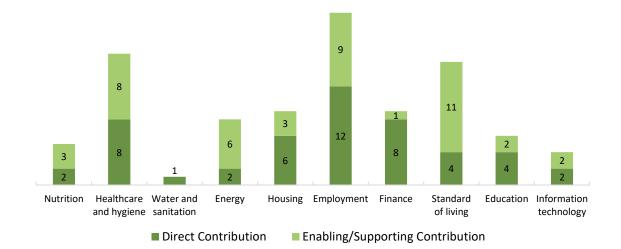

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

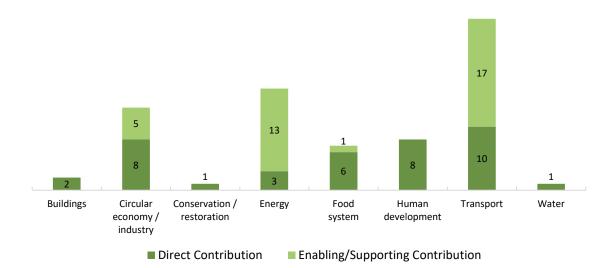

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

…and compared to previous periods?

Changes in the sustainability outcomes for the Fund year-on-year are related to bottom-up changes in the portfolio and/or changes in the sustainability profile of individual investee companies.

The social and environmental outcomes for the Fund over previous periods are provided in the tables below.

Positive social outcomes

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in question below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy. During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

The Investment Manager sold the company during the period.

Triveni Turbines

Activity exposure >5% revenue: Supporting Nuclear Power

Reason for exception/holding: The company designs and manufactures steam turbines, with a focus on renewable, efficient industrial heat and power solutions.

Revenues derived from products and services supporting nuclear power accounted for an estimated 5% of the company's overall revenue in FY2023, according to the external research provider.

Nuclear power exposure for supporting products and services was added by the external research provider in early 2024 and the Investment Manager contacted the company directly to check the 5% revenue estimate provided. Given their nuclear power exposure is related to servicing old steam turbines within the industry, the company estimates around 1% of revenue to be a more accurate reflection of their exposure.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for

controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

Mandatory indicators	Metrics	2024	2023
Exposure	(EUR m)	9	5
	Scope 1 (tCO2eq)	207	133

Number of Identified Cases of Severe Human Rights Issues & Incidents	Weighted number of incidents	0.0	0.1

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024.

Largest investments	Sector	% assets	Country
Mahindra & Mahindra	Consumer Discretionary	8.8	India
Tube Investments	Consumer Discretionary	6.4	India
HDFC Bank	Financials	4.8	India
Triveni Turbines	Industrials	4.7	India
CG Power	Industrials	4.2	India
Cholamandalam Financial Holdings	Financials	3.8	India
Aavas Financiers	Financials	3.7	India
Dr. Reddy's Laboratories	Health Care	3.6	India
Blue Dart Express	Industrials	3.5	India
Godrej Consumer Products	Consumer Staples	3.3	India
Cyient	Information Technology	3.1	India
Tech Mahindra	Information Technology	3.0	India
Marico	Consumer Staples	2.9	India
Dr. Lal PathLabs	Health Care	2.8	India
Elgi Equipments	Industrials	2.7	India

Asset allocation describes the share of investments in specific assets. What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	4.3
Consumer Discretionary	19.6
Consumer Staples	8.2
Energy	-
Financials	15.9
Health Care	10.6
Industrials	24.4
Information Technology	8.3
Materials	3.7
Real Estate	-
Utilities	-
Cash and cash equivalents	5.0

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration,

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic

activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

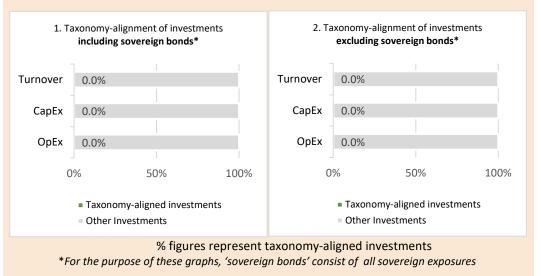

Did the financial product investment in fossil gas and/or nuclear energy related activities

□ Yes

□ In fossil gas □ In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

Taxonomy-aligned activities are expressed as a share of:

turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies

capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.

operational expenditure (OpEx) reflecting green operational activities of investee

companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy for the previous reference period was **0%**.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **36** companies. Based on reported turnover data, there was no alignment with the EU taxonomy from any of these companies.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporate	Engagement	Proxy voting	Annual review
engagement policy	booklet	, 0	Annual review

During the reporting period, the Investment Manager met with 66% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period the Investment Manager engaged on topics such as:

- Pollution, natural resource degradation, biodiversity and climate change packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- **Diversity, equity and inclusion** diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure,

During the period the Investment Manager engaged with **27%** of Fund companies on the following topics -

- Environment: 47%
- Social: 6%
- Governance: 47%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below.

Voting activity: 1 January 2024 to 31 December 2024

Number of companies that held voting meetings	39
Number of meetings to vote at	68
Total proposals to vote on	332
Number of votes against management proposals	0
Number of votes abstained from voting	0
Number of shareholder proposals to vote on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

The Investment Manager did not vote against any resolutions during the period.

Reference benchmarks are indexes to measure

whether the financial product attains the

sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Stewart Investors Global Emerging Markets (ex China) Leaders Fund Legal entity identifier: 25490012JPCPAREL2Q93

The Fund launched during the period.

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes No It made **sustainable** It promoted Environmental/Social (E/S) × characteristics and investments with an while it did not have as its objective a environmental objective: 68% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable It promoted E/S characteristics, but **did not** × make any sustainable investments investments with a social objective: 100%

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- Opportunity and empowerment improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **28** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **86 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- Energy adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- Human development advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- Conservation and restoration supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held 28 companies. **19 companies (68%)** were contributing to **climate change solutions**. These companies were contributing to **24** different solutions and, in total, were making **64 contributions** to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions</u>

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

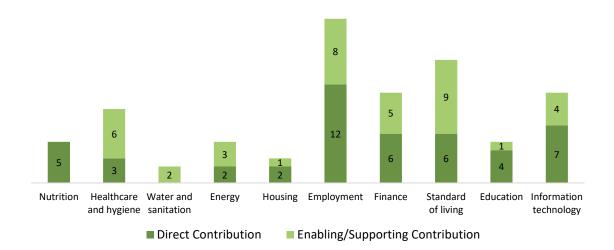

How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

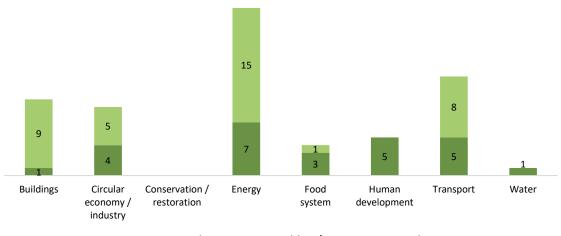

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Direct Contribution
Enabling/Supporting Contribution

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

…and compared to previous periods?

Not applicable, the Fund launched during the period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes.

All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

— How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy. During the reporting period the Fund held the following companies which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

Mandatory indicators	Metrics	2024
Exposure	(EUR m)	1

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel

exposure % shown in the table above is for WEG. WEG manufactures and sells efficient electrical motors, which help customers across a variety of industrial sectors reduce their energy requirements. The third-party data provider estimates WEG as having 1% of their total revenue derived from products supporting thermal coal.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

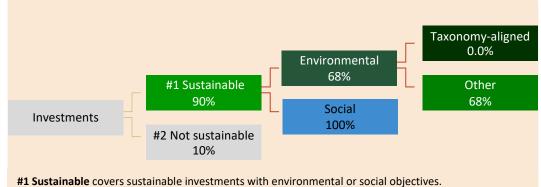

Mexico

Taiwan

2.8

2.8

Asset allocation describes the share of investments in specific assets.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	1.1
Consumer Discretionary	12.5
Consumer Staples	18.7
Energy	-
Financials	10.0
Health Care	-
Industrials	9.3
Information Technology	44.3
Materials	-
Real Estate	-
Utilities	-
Cash and cash equivalents	4.1

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To comply, with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or lower-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the share of revenue
 from green
 activities of
 investee
 companies
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

🛛 Yes

🗆 In fossil gas 🛛 In nuclear energy

🛛 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 Taxonomy-alignment of investments including sovereign bonds* 		2. Taxonomy-alignment of investments excluding sovereign bonds*					
Turnover	0.0%			Turnover	0.0%		
CapEx	0.4%			CapEx	0.4%		
OpEx	0.0%			OpEx	0.0%		
C)%	50%	100%	0	%	50%	100%
 Taxonomy-aligned investments Other Investments 			Taxonomy-aligned investmentsOther Investments				
% figures represent taxonomy-aligned investments							

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable, the Fund launched during the period.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **28** companies. Based on reported turnover data, **27** of the **28** companies had **no alignment** with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporateEngagementProxy votingAnnual reviewengagement policybooklet

During the reporting period, the Investment Manager met with 62% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- Diversity, equity and inclusion diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- **Governance** corporate strategy and legal structure.

During the period the Investment Manager engaged with $\bf 31\%$ of Fund companies on the following topics -

- Environment: 50%
- Social: 17%
- Governance: 33%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below.

Voting activity: 11 July 2024 to 31 December 2024

Number of companies that held voting meetings	9
Number of meetings to vote at	10
Total proposals to vote on	88
Number of votes against management proposals	0
Number of votes abstained from voting	0
Number of shareholder proposals to vote on	0
Number of shareholder proposals voted against	0
Number of shareholder proposals abstained from voting	0

The Investment Manager did not vote against any resolutions during the period.

How di benchr

Reference

benchmarks are indexes to measure

whether the financial product attains the

sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?

Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Stewart Investors Asia Pacific and Japan investment means All Cap Fund an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not Did this financial product have a sustainable investment objective? significantly harm •• X Yes No any environmental or social objective and It made sustainable It promoted Environmental/Social (E/S) that the investee × investments with an characteristics and companies follow good governance while it did not have as its objective a environmental objective: 61% practices. sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally The EU Taxonomy is with an environmental objective in economic sustainable under the EU a classification Taxonomy activities that qualify as environmentally system laid down in sustainable under the EU Taxonomy Regulation (EU) in economic activities that do × 2020/852 with an environmental objective in not qualify as environmentally establishing a list of economic activities that do not qualify as sustainable under the EU environmentally environmentally sustainable under the EU Taxonomy sustainable Taxonomy economic activities. **That Regulation** with a social objective does not lay down a list of socially

It made sustainable

objective: 100%

investments with a social

×

economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

sustainable

To what extent was the sustainable investment objective of this financial product met?

The Fund has a sustainable objective to invest in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, while many also contribute to positive environmental outcomes. The contribution to sustainable development is assessed under two frameworks, social and environmental.

Positive social outcomes

The Investment Manager assesses positive social outcomes by reference to the below human development pillars. Stewart Investors has developed these human development pillars by reference to, amongst other things, the UN Human Development Index.

Legal entity identifier: 549300G4DULVSULOBZ21

It promoted E/S characteristics, but **did not**

make any sustainable investments

The Fund launched during the period.

Sustainable investment objective

must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

Notes: The percentages are defined and measured on the basis that each sustainable investment

- Health and well-being improved access to and affordability of nutrition, health care, hygiene, water and sanitation,
- Physical infrastructure improved access to and affordability of energy and housing,
- Economic welfare safe employment offering a living wage and opportunities for advancement, access to finance and improved standards of living,
- **Opportunity and empowerment** improved access to and affordability of education and information technology.

As of 31 December 2024, the Fund held **49** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, were making **133 contributions** to the pillars.

Further information about how the Investment Manager uses the human development pillars is available on the Investment Manager's website – <u>stewartinvestors.com/all/how-we-invest/our-approach/human-development-pillars</u>

Positive environmental outcomes

The Investment Manager assesses positive environmental outcomes by reference to the climate solutions developed by Project Drawdown, a non-profit organisation that has mapped, measured and modelled over 90 different solutions that it believes will contribute to reaching 'drawdown', – i.e. the future point in time when levels of greenhouse gases in the atmosphere stop climbing and start to steadily decline.

Below is a list of the climate solutions captured in eight broader categories together with corresponding examples that the Investment Manager believes lead to positive environmental outcomes:

- Food system sustainable farming, food production and the distribution of products and services,
- **Energy** adoption of renewable energy and other clean energy and related technologies,
- Circular economy and industries improved efficiency, reduced waste, and new business models for closing resource loops in linear value chains and production processes,
- **Human development** advancement of human rights and education that drive environmental conservation and sustainable use of resources,
- **Transport** efficient transport technologies and growth in fossil fuel-free transportation options,
- Buildings products and services which reduce the environmental footprint of the built environment, including energy efficiency, electrification, improved design, and use of alternative materials,
- Water less energy-intensive methods for treating, transporting and heating water
- **Conservation and restoration** supporting deforestation-free and environmentally regenerative supply chains, operations and end-of-life impacts.

As of 31 December 2024, the Fund held **49** companies. **30 companies (61%)** were contributing to **climate change solutions**. These companies were contributing to **34** different solutions and, in total, were making **100 contributions** to the solutions.

Further information about how the Investment Manager uses the Project Drawdown climate solutions is available on the Investment Manager's website – stewartinvestors.com/all/how-we-invest/our-approach/climate-solutions

Assessment

In assessing whether a company "contributes to and benefits from" sustainable development, the Investment Manager will consider whether:

1. there is either a direct or enabling link between the activities of the company and the achievement of a positive social or environmental outcome;

2. the company can benefit from any contribution to positive social or environmental outcomes through revenue or growth drivers inherent in the company's business model, strategic initiatives that are backed by research and development or capital expenditure, or from the company's strong culture and sense of stewardship e.g. for equity and diversity; and

3. the company recognises potential negative social or environmental outcomes associated with its product or services and works towards minimising such outcomes, e.g. a company that sells affordable nutritious food products in plastic packaging but is investigating alternative packaging options.

Notes:

Any reference to **Project Drawdown** is to describe the publicly available materials utilised by Stewart Investors in formulating its sustainability analysis. It is not intended to be, and should not be, read as constituting or implying that Project Drawdown has reviewed or otherwise endorsed the Stewart Investors sustainability assessment framework.

A direct link would arise where the goods an entity produces or the services it provides are the primary means through which the positive social or environmental outcome can be achieved (e.g. solar panel manufacturers or installers).

An **enabling link** would arise if the goods a company produces or services it provides enable other companies to contribute towards the achievement of the positive social or environmental outcome (e.g. manufacturers of critical components that are used as inputs in the manufacture of solar panels).

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

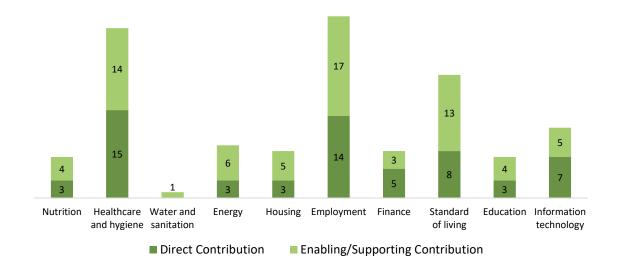

• How did the sustainability indicators perform?

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and areas for improvement. Click on the link below to access the tool.

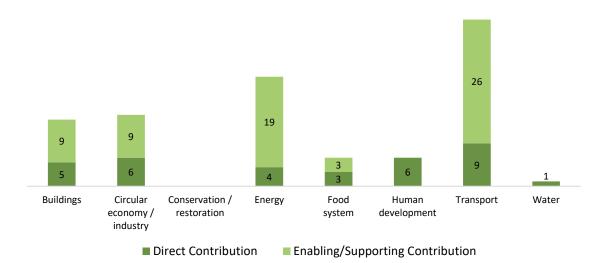

stewartinvestors.com/all/how-we-invest/our-approach/portfolio-explorer

The social and environmental outcomes for the Fund as of 31 December 2024 are provided in the charts below.

Human development pillars (number of companies contributing to each pillar)

Climate change solutions (number of companies contributing to each solution)

Notes: Direct Contribution - directly attributable to products, services or practices provided by that company. Enabling/Supporting Contribution - supported or made possible by products or technologies provided by that company.

…and compared to previous periods?

Not applicable, the Fund launched during the period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund only invests in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental outcomes. All investee companies contribute to improving human development, and may also contribute to positive environmental outcomes.

The Fund's exposure to harmful or controversial products, services or practices is monitored on at least a quarterly basis. For harmful products and services which are revenue-generating, the Investment Manager applies a 5% revenue threshold (controversial weapons and tobacco production are 0%). In other areas where harmful or controversial activities are not attributable to revenue (for example, employee or supply chain issues) the Investment Manager uses internal analysis and research from external providers to monitor and assess companies.

Where any material exposure to these harmful activities is found, the Investment Manager will:

- review the company research and investment case, noting the response where they believe it is adequate,
- engage with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- exit the Fund's position in the company where engagement has been unsuccessful, or where part of a pattern of behaviour raises concerns regarding the quality and integrity of the company's management. If an investment is held in a company that has material exposure to harmful products and services, this will be disclosed on the Stewart Investors website, and the reasons for the exception and for maintaining the holding explained. Exceptions may occur if a company is winding down a legacy commercial activity (in which case the company will be engaged and encouraged to cease the commercial activity concerned), or where the company is not increasing capital expenditure or if a company is only indirectly exposed to a harmful industry or activity, for example, a company making safety products for a wide range of industries may also have customers in the fossil fuel or defence industries.

The Investment Manager's position on harmful and controversial products and services and investment exclusions is available on the Stewart Investors website:

stewartinvestors.com/all/insights/our-position-on-harmful-and-controversialproducts-and-services

— How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators relevant to each Fund investee company are taken into account through the Investment Manager's bottom-up research, company engagement, adherence to their position statement on harmful and controversial products and services, Group-wide exclusion policies and third-party research providers.

The Investment Manager meets and liaises with companies on an on-going basis and is continuously assessing their sustainability credentials and quality. Where the Investment Manager has identified changes to a company's quality or sustainability positioning through either meetings, ongoing monitoring and reviewing their annual reports, the Investment Manager will re-evaluate the investment case.

In addition, the Fund portfolio is assessed on an ongoing basis by external service providers including controversy monitoring, product involvement, carbon footprints and other impact measures, and breaches of social norms.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The Principal Adverse Impacts (as prescribed under the SFDR) are incorporated into the Investment Manager's company analysis, team discussion and engagement programme. Every investment in the portfolio must do no significant harm, based on the adverse impact indicator assessment. It is possible that an investor does no significant harm but still have some adverse sustainability impacts. In those cases, the Investment Manager shall engage with the company either directly or as part of collaborations with other investment institutions.

Depending on the nature of the issue and the response by the company, the Investment Manager's actions can range from:

- reviewing the company research and investment case, noting the response where they believe it is adequate,
- engaging with the company where they require further information or wish to encourage improved practices and an appropriate resolution of the issues,
- Where engagement has been unsuccessful or where the harmful activities are part of a pattern of behaviour that raises concerns regarding the quality and integrity of the company's management, the Investment Manager will not invest or will exit the Fund's position in the company in an orderly manner, having regard to the best interest of investors.

The Investment Manager includes product level data on Principal Adverse Impact (PAI) indicators in the question below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments are aligned with these Guidelines and Principles.

The Investment Manager continually monitors the companies owned to understand any changes to the strategies. The Fund's portfolio is assessed quarterly by an external service provider for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN global norms and exposure to high-risk sectors. The Investment Manager also receives regular updates from a controversy monitoring service. Where issues are raised by these services, the Investment Manager will review and consider as part of the investment analysis and depending on the detail may engage with the company in question, and if necessary will divest to ensure the portfolio continues to meet the principles which sit at the heart of the investment philosophy. During the reporting period the Fund held the following company which flagged against the Investment Manager's policy.

Tata Consultancy Services (TCS)

UN Global Compact Principle 2 (Breach): Businesses should make sure that they are not complicit in human rights abuses.

Reason for exception/holding: TCS has no direct involvement in nuclear weapons or energy, however the external research provider considers the company to be involved because its parent company, Tata Sons, owns greater than 50% of TCS.

Tata Sons involvement is due to the company owning Tata Advanced Systems which acquired Tata Power's Strategic Engineering Division. The Strategic Engineering Division provides control systems for the Indian Navy's nuclear missile submarines.

As India has not signed the Treaty on the Non-Proliferation of Nuclear Weapons, the external data provider considers Tata Sons and by extension TCS to be in support of the nuclear weapons programme of India. The Investment Manager disagrees with this assessment and does not see anything in the activities or conduct of the company to question its sustainability positioning or the investment case.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the detail described above, the Investment Manager has set a materiality threshold of 5% of revenue for direct involvement in companies materially involved in the exploration, production or generation of fossil fuel energy and a threshold of 0% for controversial weapons. Portfolio companies are checked against the thresholds each quarter by an external third-party research platform.

The below table sets out the PAI indicators for the Fund.

The SFDR PAI methodology for fossil fuel sector exposure considers Oil & Gas Production, Thermal Coal Extraction and Thermal Coal Supporting Products/Services. The fossil fuel exposure % shown in the table above is for **Samsung C&T** which was held for part of the reporting period. Samsung C&T is a holding company with direct operating businesses in construction and trade, plus high-value holdings in health and electronics. The third-party data provider estimates that the company derives c.1% of revenue from one its subsidiaries which is involved in oil and gas exploration, development, and production.

Notes: PAI data is sourced from third-party ESG data providers. Limitations to the data provided from third parties will stem from their coverage and methodologies and from limited disclosures by issuer companies. Where data is not available, third-party providers may use estimation models or proxy indicators. Methodologies used by data providers may include an element of subjectivity. Whilst data is collected on an ongoing basis, in this rapidly evolving environment, data can become outdated within a short time period. Data for certain metrics may be based on limited data across the portfolio companies.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 13 August 2024 to 31 December 2024.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund invested at least 90% of its Net Asset Value in companies that are positioned to contribute to, and benefit from, sustainable development. Sustainable development is based on the Investment Manager's own philosophy explained in the Investment Policy of the Prospectus.

#1 Sustainable covers sustainable investments with environmental or social objectives. **#2 Not sustainable** includes investments which do not qualify as sustainable investments.

Notes: The percentages are defined and measured on the basis that each sustainable investment must contribute to a social objective and may also contribute to an environmental objective. The percentages will therefore not add to 100.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

The average holdings (excluding cash) over the reporting period in Global Industry Classification Standard (GICs) sectors:

Sector	% assets
Communication Services	1.1
Consumer Discretionary	12.0
Consumer Staples	9.6
Energy	-
Financials	6.5
Health Care	14.7
Industrials	37.4
Information Technology	15.9
Materials	-
Real Estate	-
Utilities	-
Cash and cash equivalents	2.9

The Fund has no direct holdings in companies materially involved in the exploration, production or generation of fossil fuel energy.

The Investment Manager checks investee companies (via a third-party research platform and on a quarterly basis) for any revenues derived from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. They disclose any companies above their material threshold (5% of revenues) on their website.

Additional transparency is provided by the Investment Manager in their annual report (Annual Review 2023 pg.20), where they disclose companies that are providing services to the fossil fuel industry directly or via their underlying subsidiaries.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

Did the financial product investment in fossil gas and/or nuclear energy related activities

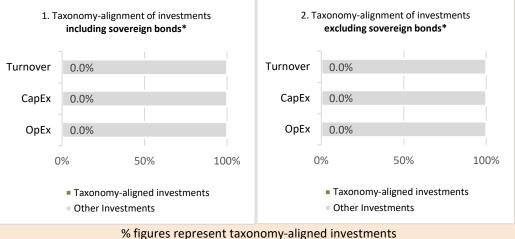

□ Yes

□ In fossil gas □ In nuclear energy

🛛 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory notes in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The reported share of investments made in transitional and enabling activities for the Fund is **0%**.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable, the Fund launched during the period.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund does not actively target EU Taxonomy-aligned assets.

As of 31 December 2024, the Fund held **49** companies. Based on reported turnover data, there was no alignment with the EU taxonomy from any of these companies

What was the share of socially sustainable investments?

All companies in the Fund were aligned to socially sustainable investments as defined by the Investment Manager's human development pillars.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" assets are cash and near-cash assets held pending investment, to meet liquidity requirements, or assets held in order to allow efficient operational exit of positions. Cash is held by the depositary.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund's service providers for these assets are reviewed and assessed for compliance with FSI's modern slavery policy.

What actions have been taken to attain the sustainable investment objective during the reference period?

No company is perfect and engagement and voting are key responsibilities for the Investment Manager as long-term shareholders. They believe that engagement is a means to mitigate business risks, protect against potential headwinds and improve sustainability outcomes. Engagement is fully integrated into the responsibilities of the investment team and contributes invaluable insights into their understanding of each company.

More information is available on the Investment Manager's website (links below):

Stewardship and corporate	Engagement	Proxy voting	Annual review
engagement policy	booklet		Annual review

During the reporting period, the Investment Manager met with 60% of Fund companies.

All engagement starts with bottom-up analysis, with responsibility shared across the investment team. Over the period and across their funds, the Investment Manager engaged on topics such as:

- **Pollution, natural resource degradation, biodiversity and climate change** packaging, plastic pellets, deforestation, sustainability of supply chains (soy, palm oil and coffee), fossil fuel versus renewables, water, waste and energy efficiency,
- Aligned remuneration and incentives living wage, gender pay gap and complexity of incentives,
- Animal testing/welfare animal testing exposure,
- Human rights and modern slavery conflict minerals in the supply chains of semiconductors, trafficking, forced labour and child labour in the Asia Pacific region and public health,
- Diversity, equity and inclusion diversity, particularly gender, in senior management and on boards,
- Addictive products indirect exposure to tobacco, chemicals, gaming, adult entertainment, and sugar content in food,
- Governance corporate strategy and legal structure.

During the period the Investment Manager engaged with **28%** of Fund companies on the following topics -

- Environment: 37%
- Social: 16%
- Governance: 47%

Engagements may relate to one or multiple environmental, social or governance topics.

Proxy voting is an extension of the Investment Manager's engagement activities. It is not outsourced to an external provider or separate proxy voting/engagement team. The Investment Manager considers each proxy vote individually and on its own merits in the context of their knowledge about that particular company. A breakdown of voting activity for the Fund is detailed below. Voting activity: 13 August 2024 to 31 December 2024

The Investment Manager did not vote against any resolutions during the period.

How did this financial product perform compared to the reference sustainable benchmark?

A sustainable benchmark has not been designated to compare the performance for this Fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial

product attains the

sustainable objective.
